

Funding Opportunity: National Federal Partnership Liaisons

Chiara Zuccarino-Crowe (Great Lakes Environmental Research Laboratory Liaison) and Meaghan Gass share their love for the Great Lakes at the Smithsonian National Museum of Natural History. Photo credit: Michigan Sea Grant

In an effort to increase collaboration and effective use of federally-funded ocean, coastal and Great Lakes research, the NSGO is looking for proposals to develop National Federal Partnership Liaison positions in coordination with other federal agencies or programs whose project goals align with and support national Sea Grant focus area or vision plan goals. We expect to fund 2-3 liaisons at up to \$100K of Sea Grant federal dollars annually for four years. State match of 50% of NSGO funds and 'substantial' federal partner funding required.
