

Freshwater Fish Marketing Corporation

FIRST QUARTER FINANCIAL REPORT

Fiscal 2020/21

Narrative Discussion.....Page 2
Financial Statements and Notes.... Page 6

NARRATIVE DISCUSSION

BASIS OF PRESENTATION

The Freshwater Fish Marketing Corporation ("FFMC") has prepared this report as required by section 131.2 of the *Financial Administration Act* using the standard issued by the Treasury Board of Canada Secretariat. This narrative should be read in conjunction with the unaudited financial statements.

FFMC has prepared these unaudited financial statements for the 13 weeks ended July 31, 2020 and July 31, 2019 in compliance with International Financial Reporting Standards (IFRS). Financial results reported in this narrative are presented in Canadian dollars and rounded to the nearest million, unless otherwise noted. The information in this narrative is current to October 5th, 2020.

MATERIALITY

In assessing what information to provide in the narrative, management applies the materiality principle as guidance for disclosure. Management considers information material if its omission or misstatement could reasonably be expected to influence decisions that the primary users make based on financial information included in this narrative.

FORWARD LOOKING STATEMENTS

This report contains forward looking statements about FFMC's strategy and expected financial and operational results. Forward-looking statements are based on the following broad assumptions: Government of Canada approval of FFMC's fiscal year 2020/21 to 2024/25 Corporate Plan and no change to FFMC's current mandate. Key risks and uncertainties are by definition difficult to predict and beyond our control. They include, but are not limited to, economic, competitive, financial, environmental and regulatory conditions. These factors may cause actual results to differ substantially from the expectations stated or implied in forward-looking statements.

Readers are advised to refer to the cautionary language included at the end of this narrative when reading any forward-looking statements.

OVERVIEW OF THE BUSINESS

FFMC is a self-sustaining federal Crown Corporation, the buyer, processor and marketer of commercially caught freshwater fish. It remains a top choice for chefs in the United States when picking walleye for their menus. Freshwater is the largest and most trusted supplier of lake whitefish and whitefish caviar to Finland, and the number one supplier for buyers of tullibee roe in Scandinavia. FFMC continues to be the dominant supplier to the northern pike market in France with both minced and new product innovations. It is the largest individual supplier of freshwater fish products to the United States gefilte fish market and maintains a kosher certified plant.

In five decades of business, FFMC has established and sustained a solid reputation based on product reliability, quality and food safety. FFMC is recognized as an industry leader with an internationally established and highly endorsed brand of excellence.

SIGNIFICANT CORPORATE EVENTS

COVID-19 Pandemic

The COVID-19 pandemic continues to impact FFMC's business including customer demand, initial fish prices and fish deliveries, processing costs, employee health and safety, production efficiencies and supply chain stability. Financial and operating performance continues to be materially impacted by the repercussions of COVID-19 on FFMC.

Surplus Food Rescue Program

Impacts from COVID-19 have resulted in disruptions to many areas of Canada's food system as it forced the near closure of the restaurant and hospitality industry in Canada and the United States, resulting in excess food throughout the food service supply chain. In June 2020, the Government of Canada announced the Food Surplus Food Rescue Program, an initiative to help support Canada's food system, food processors, and food producers and distributors to help ensure food availability for all Canadians. In August 2020, Fisher River Cree Nation (FRCN) received approval to participate in the program. FRCN will rescue up to 650,000 kilograms of freshwater walleye caught from the inland lakes of Canada. FRCN is working with FFMC to distribute the surplus walleye to more than 75 Indigenous communities throughout Manitoba, Saskatchewan and the North.

OPERATING HIGHLIGHTS AND ANALYSIS OF RESULTS

Loss before provision for final payment to fishers and income tax was \$455 thousand compared to the 2020/21 planned loss of \$311 thousand. Sales revenues were 23.6% lower than plan for the three months ending July 31, 2020. Expenses were 22.1% lower than plan and 27.8% lower than the comparable period last year. To achieve its objectives, FFMC strives to continually improve profitability and returns to fishers through prudent financial management and efficient operations. FFMC measures its performance by using key performance indicators meaningful to all stakeholders, including fishers, employees and the Government of Canada. The financial measures below allow the Corporation to monitor and improve performance to create value for its stakeholders.

(in thousands)	3 months ended							
	July 31, 2020	July 31, 2019	Fiscal 2020/21	\$ Change	% Change	\$ Change	% Change	
Sales revenue	\$ 11,131	\$ 15,794	\$ 14,562	\$ (4,663)	-29.5%	\$ (3,431)	-23.6%	
Expenses	11,586	16,047	14,873	(4,461)	-27.8%	(3,287)	-22.1%	
Profit (loss) before taxes	(455)	(253)	(311)	(202)	79.8%	(144)	-46.3%	
Profit (loss) after taxes	\$ (341)	\$ (190)	\$ (233)	\$ (151)	79.5%	\$ (108)	-46.4%	

Sales revenue for the three months ended July 31, 2020 decreased 29.5% to \$11.1 million from \$15.8 million in the same period in 2019. The primary contributor to the decreased sales revenue was a reduction in customer demand for walleye due to the COVID-19 pandemic.

Expenses for the three months ended July 31, 2020 were \$4.5 million lower than the previous year as FFMC adjusted its operations to meet the lower demand and expected lower sales volumes.

Loss before taxes and final payment increased by \$0.21 million from \$0.25 million loss in 2019/20 to \$0.46 million in 2020/21.

Capital expenditures were \$0.38 million during the three months ending July 31, 2020 compared to \$0.14 million in the comparable period last year. Capital expenditures included investment in processing equipment and facilities.

OUTLOOK AND RISKS TO PERFORMANCE

The financial goal for FY 2020/21 is a loss before final payment and income tax of \$852. FFMC is working diligently to mitigate the impacts of COVID-19 on its business performance while following government guidance and prioritizing the health and safety of its employees and fishers that supply fish.

Mandate

FFMC is a Crown corporation solely-owned by the Government of Canada and governed primarily under the *Freshwater Fish Marketing Act (FFMA)* and the *Financial Administration Act (FAA)*. The successive withdrawal of provinces as signatories to the *FFMA* and the subsequent transformation process currently in progress regarding the future of the Corporation may create changes to shareholder objectives or legislation that could have an impact on performance. The situation creates uncertainty over the long term.

COVID-19

FFMC is a key component of the Canadian inland freshwater fish supply chain and is managing the unparalleled impact of the COVID-19 pandemic on its operations, profitability and liquidity. FFMC's revenues are dependent on the food service industry. Analysts have concluded that the restaurant, hospitality and food service industry are among the most severely impacted sectors of the economy affected by the COVID-19 pandemic. Full economic recovery for the food service industry continues to be slow, lagging well behind most other sectors. Although most jurisdictions are progressively re-opening their economies, many rules and regulations affecting restaurants remain in place, limiting their ability to sustain financial viability. Concerns persist regarding a resurgence – a second wave of COVID-19 - that could be particularly devastating to economic recovery and the food service industry. In light of the ongoing uncertainty regarding the COVID-19 pandemic, the full extent and duration of its impact on FFMC remains unknown. FFMC cannot fully predict the full impact or the timing of when economic conditions will improve. FFMC is closely monitoring the impact of COVID-19 on its operations and the impact on its stakeholders including fishers, customers and employees. FFMC is complying with government directives and prioritizing the health and safety of its employees.

Fish Deliveries

Environmental, biological and economic factors affect the volume of fish delivered to FFMC in any given year. On a regular basis, FFMC uses effective operational planning and daily management to address these and other issues to meet its mandate and strategic

objectives. Lake Erie walleye fishing quota increases, individual quota entitlement (IQE) buy-backs from fishers by the Government of Manitoba, and mesh size increases, both on Lake Winnipeg will affect fish deliveries.

Transformation of FFMC

In support of *The Report of the Ministerial Advisory Panel on the Transformation of the Freshwater fish Marketing Corporation* released by the Government of Canada in 2019, the appointed interlocutor continues to engage with stakeholders and a delegate committee of fish harvesters regarding the future of FFMC.

FORWARD LOOKING STATEMENTS

The unaudited financial statements and the management report contain forward looking statements that reflect management's expectations regarding FFMC's objectives, plans, strategies, results of operations and performance. Forward-looking statements are typically identified by words or phrases such as "plans", "anticipates", "expects", "believes", "estimates", "intends", or other similar expressions. These forward-looking statements are not facts, but only estimates regarding results of operations, performance and opportunities. While management considers these assumptions to be reasonable based on available information, they may prove to be incorrect. These estimates of future results are subject to a number of risks, uncertainties and other factors that could cause actual results to differ materially from what FFMC expects. These risks, uncertainties and other factors include, but are not limited to, those risks and uncertainties set forth above in the Risks to Performance, as well as in Note 5 – Financial Instruments and Financial Risk Management.

To the extent FFMC provides future oriented financial information or a financial outlook, such as future operational and financial performance, FFMC is providing this information for the purpose of describing future expectations. Therefore, readers are cautioned that this information may not be appropriate for any other purpose. Furthermore, future-oriented financial information and financial outlooks, as with forward-looking information generally, are based on the assumptions and subject to the risks.

Readers are urged to consider these factors carefully when evaluating these forward-looking statements. In light of these assumptions and risks, the events predicted in these forward-looking statements may not occur. FFMC cannot assure that projected results or events will be achieved. Accordingly, readers are cautioned not to place undue reliance on the forward-looking statements.

FFMC cannot predict the full impact or the timing for when business conditions will improve or how they may change from the impact of the COVID-19 pandemic. FFMC is actively monitoring and responding to the situation as the COVID-19 pandemic evolves, which will depend on a number of factors including the course of the virus and government actions which cannot be predicted with any degree of certainty.

The forward-looking statements included in this unaudited financial report are made only as of October 5, 2020 and FFMC does not undertake to publicly update these statements to reflect new information, future events or changes in circumstances for any other reason after his date.

Management's Responsibility for Financial Reporting

Management is responsible for the preparation and fair presentation of these unaudited financial statements in accordance with IAS 34 Interim Financial Reporting and requirements in the Treasury Board of Canada Standard on Quarterly Financial Reports for Crown Corporations and for such internal controls as management determines are necessary to enable the preparation of financial statements that are free from material misstatement. Management is also responsible for ensuring all other information in these quarterly financial report is consistent, where appropriate, with the unaudited financial statements.

To the best of our knowledge, these unaudited financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of the Freshwater Fish Marketing Corporation as at the date of and for the periods presented in the unaudited financial statements.

Notes to the Financial Statement

AS AT JULY 31, 2020 (in thousands of Canadian dollars)

1. NATURE AND DESCRIPTION OF THE CORPORATION

The Freshwater Fish Marketing Corporation was established in 1969 pursuant to the *Freshwater Fish Marketing Act* for the purpose of marketing and trading in fish, fish products and fish by-products in and outside of Canada.

The Corporation is required to purchase all fish legally caught in the mandate region, which currently encompasses the province of Alberta and the Northwest Territories. Participation of these jurisdictions was established by agreement with the Government of Canada. The Corporation is required to conduct its operations on a self-sustaining basis without appropriations from Parliament. In accordance with the *Freshwater Fish Marketing Act*, the legislative borrowing limit of the Corporation is \$50 million. As at July 31, 2020, the total borrowings of the Corporation may not exceed \$40.0 million as authorized by the Minister of Finance.

The address of the Corporation's registered office and principal place of business is 1199 Plessis Road in Winnipeg, Manitoba. The Corporation is an agent Crown corporation listed in Part I of Schedule III of the *Financial Administration Act*. The Corporation is a prescribed federal Crown corporation for tax purposes and is subject to federal income tax under the Income Tax Act.

In July 2015, the Corporation was issued a directive (P.C. 2015-1108) pursuant to section 89 of the *Financial Administration Act* to align its travel, hospitality, conference and event expenditure policies, guidelines and practices with Treasury Board policies, directives and related instruments on travel, hospitality, conference and event expenditures in a manner that is consistent with its legal obligations, and to report on the implementation of this directive in the Corporation's next corporate plan. The Corporation finalized its implementation of this directive on January 31, 2018. The Corporation has remained compliant since then.

2. FUTURE OF THE CORPORATION

GOING CONCERN

These financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards (IFRS). The going concern basis of presentation assumes that the Corporation will continue in operation for the foreseeable future and contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business.

Operating and financial results have been significantly impacted by the COVID-19 health crisis, which was declared a pandemic by the World Health Organization on March 11, 2020. Reduced customer demand and sales revenues, production inefficiencies and supply chain instability including increased processed fish inventory levels have all contributed to the Corporation's reported results as of July 31, 2020. In response to the pandemic, the Corporation has taken decisive action by reducing operating costs, deferring or eliminating capital expenditures, laying off employees, reducing pay for remaining employees, only purchasing fish which there is customer demand and aggressively expanding sales opportunities into new markets and sectors. The Corporation cannot fully or reasonably estimate the duration and severity of the health crisis, however, management has evaluated the events and conditions related to COVID-19 and has determined that its plans to mitigate the pandemic's impact are expected to continue to allow the Corporation to operate for the upcoming fiscal year.

The Corporation continues to manage additional risks to its business, in particular, the open-market fish supply environment, individual quota entitlement buyback from commercial fishers on Lake Winnipeg by the Government of Manitoba, mesh size increases on Lake Winnipeg and increasing supplies of walleye into Freshwater's sales markets from the Great Lakes. Strategies including plans and objectives to address these risks are outlined in the 2021 to 2025 Corporate Plan which has been submitted to the Government of Canada for approval.

In support of *The Report of the Ministerial Advisory Panel on the Transformation of the Freshwater Fish Marketing Corporation*, released in 2019, the Government of Canada has appointed an interlocutor who is engaging with stakeholders and a delegate committee of fish harvesters regarding the future of the Corporation.

Retained earnings are \$15.8 million and are above the threshold required by the Corporation's Retained Earnings and Long Term Debt Policy. Borrowing levels are forecast to remain under the legislated borrowing authority of \$50 million.

These financial statements do not include any adjustments to the carrying value of assets and liabilities and the reported revenues and expenses that might be necessary if the Corporation was not successful in achieving its strategies.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1 Basis of presentation

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS). The financial statements were prepared on the historical cost basis, except for derivative instruments which were measured at fair value.

The significant accounting policies summarized below have been applied consistently to all periods presented in the financial statement balances.

Unless otherwise stated, these financial statements are presented in thousands of Canadian dollars, which is the functional currency of the Corporation.

The financial statements were approved and authorized for issue by the Board of Directors of the Corporation on July 9, 2020

3.2 Cash and bank overdraft

Cash is composed of money in the bank.

Bank overdraft is composed of accounts with negative cash balances.

3.3 Accounts receivable

Accounts receivable are recognized at their anticipated realizable value, which is the original invoice amount less an estimated allowance amount equal to lifetime expected credit losses.

3.4 Inventories

Processed fish products are recorded at the actual cost of fish purchases throughout the year plus direct labour and overhead directly related to processing. The Corporation uses a weighted-average cost formula to assign fixed and variable overhead costs to processed fish product inventory. At the reporting date inventories are valued at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale. Inventory write-downs and reversals of write-downs are included in cost of sales in the statement of comprehensive income.

Included in supplies inventory are inventories of spare parts. These spare parts are measured at lower of cost and net realizable value.

3.5 Financial instruments

Financial assets and financial liabilities are recognized when the Corporation becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss – FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

3.5.1 Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset or liability and of allocating interest expense over the relevant periods. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or where appropriate, a shorter period to the net carrying amount on initial recognition.

3.6 Financial assets

The Corporation's financial assets are classified into the following specified categories: FVTPL and at amortized cost. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular purchases or sales of financial assets are recognized and derecognized on a trade date basis.

3.6.1 Financial assets at fair value through profit or loss (FVTPL)

Financial assets are classified as FVTPL when the financial asset is either held for trading or it is designated as FVTPL. The derivative related assets used by the Corporation are held for trading and therefore classified as FVTPL. No other financial assets are at FVTPL.

Financial assets classified as FVTPL are presented at fair value, with any gains or losses arising on re-measurement recognized in profit or loss. Fair value is determined in the manner described in Note 5.2.

3.6.2 Financial assets at amortized cost

Financial assets at amortized cost are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets are measured at amortized cost using the effective interest method, less any impairment write-downs. Assets in this category include accounts receivable and are classified as current assets in the statement of financial position.

Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be insignificant.

3.6.3 Impairment of financial assets

The Corporation recognizes loss allowances for expected credit losses (ECLs) on financial assets measured at amortized cost.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

ECLs are recognized at each reporting period, even if no actual loss events have taken place. In addition to past events and current conditions, reasonable and supportable forecasts affecting collectability are also considered when determining the amount of impairment.

The Corporation applies a single impairment model to all financial instruments subject to impairment testing. The impairment model is based on a forward-looking ECL model. The model applies to trade receivables as defined in IFRS 15. In addition to past events and

current conditions, reasonable and supportable forecasts affecting collectability are also considered when determining the amount of impairment.

Objective evidence of impairment could include:

- significant financial difficulty of the debtor;
- breach of contract, such as a default or delinquency in payments;
- it becoming probable that the debtor will enter bankruptcy or financial re-organization; or
- significant decrease in creditworthiness of the debtor.

Loss allowances for financial asset measured at amortized cost are deducted from the gross carrying amount of the assets.

3.6.4 Derecognition of financial assets

The Corporation derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

3.7 Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or at amortized cost.

3.7.1 Financial liabilities at fair value through profit or loss

Financial liabilities are classified as FVTPL when the financial liability is either held for trading or it is designated as FVTPL. The derivative related liabilities used by the corporation are held for trading and therefore classified as FVTPL. No other financial liabilities are at FVTPL.

Financial liabilities classified as FVTPL are presented at fair value, with any gains or losses arising on re-measurement recognized in profit or loss. Fair value is determined in the manner described in Note 6.2.

3.7.2 Financial liabilities at amortized cost.

Financial liabilities are initially measured at fair value net of transaction costs. Financial liabilities (including borrowings such as loans payable) are subsequently measured at amortized cost using the effective interest method.

3.7.3 Derecognition of financial liabilities

The Corporation derecognizes financial liabilities when the Corporation's obligations are discharged, cancelled or they expire.

3.8 Derivative financial instruments

The Corporation selectively utilizes derivative financial instruments primarily to manage financial risks and to manage exposure to fluctuations in foreign exchange rates and interest rates. The Corporation's policy is not to enter into derivative instruments for trading or speculative purposes.

Derivatives are initially recognized at fair value when the Corporation becomes a party to the contractual provisions of the instrument and are subsequently re-measured to their fair value at the end of each reporting period. The hedges entered into represent economic hedges. Attributable transaction costs are recognized in profit or loss as incurred. The resulting gain or loss is recognized in profit or loss immediately.

A derivative with a positive fair value is recognized as a financial asset; a derivative with a negative fair value is recognized as a financial liability. A derivative is presented as a non-current asset or a non-current liability on the statement of financial position if the remaining contractual maturity of the instrument is more than 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

The Corporation does not apply hedge accounting.

3.9 Property, plant and equipment

3.9.1 Asset recognition

Property, plant and equipment are recorded at cost less accumulated depreciation and any accumulated impairment losses. Costs include directly attributable costs. The cost of self-constructed assets includes the cost of materials and direct labour, and other costs directly attributable to bringing the assets to a working condition for their intended use, the cost of dismantling and removing the items and restoring the site on which they are located, and borrowing costs on qualifying assets for which the commencement date for capitalization is on or after May 1, 2010.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

3.9.2 Depreciation

Depreciation is based on the estimated useful lives of the assets using the straight-line method.

Buildings:	
Lake stations and other building improvements	5 to 65 years
Plant	40 years
Equipment:	
Machinery and office equipment	3 to 40 years
Automotive	5 years

Fresh fish delivery tubs/totes	3 to 10 years
Vessels	3 to 35 years

The cost for plant assets being upgraded or purchased that are not yet operational are charged to construction in progress. When the assets become operational, the cost is transferred to the appropriate property, plant and equipment classification and depreciated accordingly.

Freehold land is not depreciated.

Useful lives, residual values and depreciation methods are reviewed at each reporting period and necessary adjustments are recognized on a prospective basis as changes in estimates.

3.9.3 Subsequent costs

Repairs and maintenance costs are expensed when incurred.

Costs incurred on a replacement part for property, plant and equipment are recognized in the carrying amount of the affected item when the costs are incurred.

The costs of major inspections or overhauls are recognized in the carrying amount of the item or as a replacement. Any remaining carrying amount of the cost of the previous inspection is derecognized.

3.9.4 Derecognition

An item of property, plant and equipment is derecognized upon disposal or when no further future economic benefit is expected from its use or disposal. The gain or loss on disposal or retirement of an item is determined to be the difference between the net disposal proceeds, if any, and the carrying amount of the item.

3.10 Intangible assets

Intangible assets include costs associated with information systems software, including initial set-up and configuration costs. These costs are amortized, after technological feasibility is established, using a straight-line method over the estimated useful life of five years. The Corporation has no indefinite intangible assets. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at each reporting period. If the expected useful life of the asset is different from previous estimates, the amortization period shall be changed accordingly on a prospective basis as a change in estimate.

3.11 Impairment of tangible and intangible assets

The Corporation assesses at each reporting date whether there is an indication that an asset may be impaired. If such an indication exists, or when annual testing for an asset is required, the Corporation estimates the asset's recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Value in use is determined by discounting estimated future cash flows using a pre-tax discount rate that reflects the current market assessment of the time value of money and the specific risks of the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Corporation bases its impairment calculation on a detailed budget and forecast to which the assets are allocated. The budget and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

An impairment loss is recognized in the statement of comprehensive income if an asset's carrying amount is higher than its recoverable amount. Impairment losses are recognized in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Corporation estimates the asset's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in a prior period. Such a reversal is recognized in the statement of comprehensive income.

3.12 Payments to fishers and retained earnings

The Corporation purchases fish at initial prices established by the Board of Directors based upon operational forecasts prepared by the Corporation and the cost of such purchases is included in cost of sales. Final payments to fishers, if any, are approved by the Board of Directors. The Corporation recognizes the final payment to fishers as a liability in the statement of financial position and as an expense on the statement of comprehensive income.

A final payment to fishers is calculated based on the following formula: Annual comprehensive income before income tax plus annual depreciation less the three-year rolling average (the current and previous two fiscal years) of cash purchases of property plant and equipment.

However, regardless of the formulated final payment calculation, the Board of Directors reserves final decision as to when and how much cash and/or retained earnings will be distributed to fishers in the form of a final payment.

3.13 Foreign currency translation

Revenues and expenses are translated into Canadian dollars using the monthly average exchange rate for the month in which the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the exchange rate in effect at the reporting date. All foreign exchange gains and losses incurred are included in net foreign exchange gain or loss in the statement of comprehensive income.

3.14 Employee benefits**3.14.1 Current employee benefits**

Current employee benefits are employee benefits that are due to be settled within twelve months after the end of the period in which the employees render their related service. The Corporation's current benefits include wages and salaries, annual leave and other types of current benefits.

The Corporation recognizes the undiscounted amount of current employee benefits earned by an employee in exchange for services rendered during the period as a liability in the statement of financial position, after deducting any amounts already paid as an expense in profit and loss.

3.14.2 Pension benefits

Substantially all of the employees of the Corporation are covered by the Public Service Pension Plan (the Plan), a contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the Corporation to cover current service cost. Pursuant to legislation currently in place, the Corporation has no legal or constructive obligation to pay further contributions with respect to any past service or funding deficiencies of the Plan. Consequently, contributions are recognized as an expense in the year when employees have rendered service and represent a pension obligation of the Corporation.

The accrued obligation for employee benefits includes the net present value of the liability for the employer's cost of buyback service related to an agreement with the Corporation's union that established the employment status of its fish plant employees on a go forward basis and retroactively to April 1, 1973. The Corporation is required to fund the employer's portion of any employee contributions that arise from this agreement.

3.14.3 Accrued obligation for workers' compensation

The Corporation is subject to the Government Employees Compensation Act and, therefore, is self-insured for benefits for work-related injuries of the employees of the Freshwater Fish Marketing Corporation. As a self-insured employer, the Corporation is accountable for all such liabilities incurred since incorporation. Liabilities for workers' compensation benefits are recorded based on known injuries or illnesses that have occurred.

The accrued obligation for workers' compensation represents the actuarially determined net present value of liabilities for benefits for work-related injuries of the employees of the Freshwater Fish Marketing Corporation when awards are approved by the Workers Compensation Board of Manitoba, or when legislative amendments are made and the anticipated future costs can be reasonably calculated.

Changes in the net present value of this unfunded liability are based on updated actuarial estimates of future costs as a result of actual experience and changes in actuarial assumptions. Adjustments arising from actuarial gains and losses are recognized in the year in which they occur.

3.14.4 Accrued obligation for sick leave benefits

The Corporation's sick leave benefit plan provides accumulating sick leave benefits to eligible employees. The plan is an unfunded defined benefit plan paid on a cash basis by contributions from the Freshwater Fish Marketing Corporation.

The accrued obligation for sick leave benefits represents the actuarially determined net present value of liabilities for sick leave benefits for eligible employees of the Freshwater Fish Marketing Corporation.

Changes in the net present value of this unfunded liability are based on updated actuarial estimates of future costs as a result of actual experience and changes in actuarial assumptions. Adjustments arising from actuarial gains and losses are recognized in the year in which they occur.

3.15 Revenue recognition

Sales, net of promotional allowances and sales returns, are recorded on an accrual basis and are recognized when a customer obtains control of the goods or services. The sales revenue reflects the consideration expected in exchange for the goods or services. For the majority of the Corporation's sales transactions, control transfers upon delivery to the shipping dock of the customer or their representative. For sales transactions to overseas customers, the Corporation's sales contracts are based on industry accepted incoterms known as CIF (Cost, Insurance and Freight). Under CIF the risk of loss of or damage to the goods passes to the customer when goods are on the vessel.

3.16 Provisions

Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the Corporation expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of

comprehensive income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

3.17 Income tax

Income tax expense comprises the sum of the tax currently payable and deferred tax.

3.17.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the statement of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Corporation's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3.17.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Corporation expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3.17.3 Current and deferred tax for the period

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

Preparation of the financial statements requires the use of estimates and assumptions to be made in applying the accounting policies that affect the reported amounts of assets, liabilities, income, expenses and the disclosure of contingent liabilities. The estimates and related assumptions are based on previous experience and other factors considered reasonable under the circumstances, the results of which form the basis of making assumptions about the carrying values of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Judgements made by management in the application of IFRS that have significant effect on the financial statements relate to the following:

4.1 Impairment of non-financial assets

The Corporation's impairment test is based on value in use calculations that use a discounted cash flow model. The cash flows are derived from the budget for the next five years and are sensitive to the discount rate used as well as the expected future cash inflows and the growth rate used for extrapolation purposes. Refer to Note 3.11.

4.2 Capital assets

Capital assets, comprising property, plant and equipment and intangible assets with finite useful lives are depreciated or amortized over their useful lives. Useful lives are based on management's estimates of the periods of service provided by the assets. The useful lives of these assets are periodically reviewed for continued appropriateness. Changes to the useful life estimates would affect future depreciation and amortization expense and the future carrying value of assets. Refer to Notes 3.9.2 and 3.10.

4.3 Inventory valuation allowance

Inventory valuation allowance is estimated for slow moving or obsolete inventories. Management reviews the estimation regularly. Any change in the estimation will impact the inventory valuation allowance.

4.4 Income tax

The Corporation operates in a jurisdiction which requires calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Liabilities are recognized for anticipated tax exposures based on estimates of the additional taxes that are likely to become due. Where the final tax outcome of these matters is different from the amount that was initially recorded, such differences will affect the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax liabilities are comprised of temporary differences between the carrying values and tax basis of liabilities. The timing of the reversal of temporary differences may take many years and the related deferred tax is calculated using substantively enacted tax rates for the related period.

If future outcomes were to adversely differ from management's best estimate of future results from operations affecting the timing of reversal of deductible temporary differences, the Corporation could experience material deferred income tax adjustments. Such deferred income tax adjustments would not result in an immediate cash outflow nor would they affect the Corporation's immediate liquidity.

5. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

5.1 Capital risk management

The Corporation is subject to the Freshwater Fish Marketing Act and the Financial Administration Act and any directives issued pursuant to these Acts. These Acts affect how the Corporation manages its capital by, among other things, setting broad objectives for the Corporation. Specifically, the Corporation must have regard for the need to conduct its operations on a self-sustaining financial basis while generating a return to fishers.

The Corporation defines and computes its capital as follows:

	As at July 31, 2020	As at July 31, 2019
Retained earnings	\$ 15,755	\$ 18,251
Loans payable	29,208	35,708
	<u>\$ 44,963</u>	<u>\$ 53,959</u>

The Corporation's objectives in managing its capital are to:

provide sufficient liquidity to support its financial obligations and its operating and strategic plans;

generate increasing returns to the fishers; and

maintain financial capacity and access to credit facilities to support future development of the business, including for capital expenditures.

During the year, the Corporation primarily relied on cash flows provided by operating activities to support its objectives.

The Corporation's ability to obtain additional capital is subject to market conditions and pursuant to the provisions of the above-noted Acts. The limitations on the borrowings of the Corporation and its access to credit facilities are outlined in Note 1. Pursuant to Part X of the *Financial Administration Act*, the Corporation must indicate its intention to borrow money in its annual corporate plan, or in an amendment thereto, which are subject to the approval of the Board of Directors and the Governor in Council. The timing of future borrowings is not determinable.

These objectives and strategies are reviewed during the annual corporate planning process and are approved by the Minister of Finance. Borrowings must also be approved by the Board of Directors. The Corporation's overall strategy with respect to capital risk management remains unchanged from the year ended April 30, 2020 as payouts to fishers are based on annual comprehensive income before income tax plus annual depreciation less the three-year rolling average of cash purchases of capital assets.

The Corporation is not subject to any externally imposed capital requirements.

5.2 Fair value measurements of financial instruments

5.2.1 Carrying amount and fair value of financial instruments

The carrying amounts of the Corporation's financial assets and financial liabilities approximate the fair values of the financial assets and liabilities.

The Corporation estimated the fair values of its financial instruments as follows:

- i) The carrying amounts of cash, accounts receivable and accounts payable and accrued liabilities approximate their fair values as a result of the relatively short-term nature of these financial instruments.
- ii) The fair value of loans payables has been estimated based on a discounted cash flow approach using current market rates appropriate as at the respective date presented.
- iii) The fair values of the Corporation's derivative-related assets and derivative-related liabilities are based on estimated credit-adjusted market prices. The Corporation takes counterparty risk and its own risk into consideration for the fair value of financial instruments.

5.2.2 Fair value hierarchy

Financial instruments, other than those that are not subsequently measured at fair value and for which fair value approximates carrying value, whether or not they are carried at fair value in the statement of financial position, must have their fair value disclosed and be classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value measurement of cash is classified as Level 1 of the fair value hierarchy as at July 31, 2020 and April 30, 2020. The fair value measurements of all other financial instruments held by the Corporation are classified as Level 2 of the fair value hierarchy as at July 31, 2020 and April 30, 2020

There were no transfers of financial instruments between levels during the year ended July 31, 2020.

The fair value measurements of the derivative financial instruments as recorded in the statement of financial position are classified as follows:

	As at July 31, 2020	As at April 30, 2020
Derivative-related liabilities	\$ 1,060	\$ 1,799

5.2.3 Finance costs

The Corporation has recorded the following finance costs on loans and other payables:

	July 31, 2020	July 31, 2019
Interest expense	\$ 106	\$ 193
Stamping fee	49	53
Bank Charges	6	6
	<u>\$ 161</u>	<u>\$ 252</u>

5.3 Financial risk management objectives and framework

The Corporation has exposure to the following risks from its use of financial instruments:

- i) credit risk
- ii) liquidity risk
- iii) market risk (includes currency risk and interest rate risk)

The Board of Directors has overall responsibility for the establishment and oversight of the Corporation's risk management framework. The Audit and Risk Committee assists the Board of Directors and is responsible for review, approval and monitoring the Corporation's risk management policies including the development of a risk management program which involves establishing corporate risk tolerance, identifying and measuring the impact of various risks, and developing risk management action plans to mitigate risks that exceed corporate risk tolerance. The Audit and Risk Committee regularly reports to the Board of Directors on its activities.

5.3.1 Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Corporation's cash, accounts receivable and derivative financial instruments. The Corporation has adopted a policy of only dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Corporation's exposure and the credit ratings of its counterparties are continuously monitored.

The carrying amount of financial assets recorded in the financial statements represents the maximum risk exposure.

Accounts receivable

The Corporation's exposure to credit risk associated with accounts receivable is influenced mainly by the demographics of the Corporation's customer base, including the risk associated with the type of customer and the country in which customers operate.

The Corporation manages this risk by monitoring the creditworthiness of customers. The Corporation has established processes when dealing with foreign customers in order to manage the risk relating to foreign customers. The Corporation's management reviews the detailed accounts receivable listing on a regular basis for changes in customer balances which could present collectability issues.

The maximum exposure to credit risk for accounts receivable by geographic region was as follows:

	July 31, 2020			April 30, 2019		
	Original currency (CAD \$)	Original currency (U.S. \$)	(CAD \$)	Original currency (CAD \$)	Original currency (U.S. \$)	(CAD \$)
Canada	\$ 428	\$ -	\$ 428	\$ 284	\$ -	\$ 284
United States	-	3,065	4,109	-	2,547	3,544
Europe	1,131	-	1,131	2,252	-	2,252
Asia	-	-	-	-	-	-
Non-trade accounts receivable	960	-	960	896	-	896
			<u>\$ 6,628</u>			<u>\$ 6,976</u>

Accounts receivable are classified as financial assets and are measured at amortized cost.

At July 31, 2020, five customers represented 52% of the trade accounts receivable balance. At April 30, 2020, five customers represented 51% of the trade accounts receivable balance. Customers primarily represent distributors.

The Corporation measures loss allowances for trade receivables at an amount equal to lifetime expected credit losses. The Corporation uses the expected credit loss model for calculating impairment and recognizes expected credit losses as a loss allowance for financial assets measured at amortized cost.

The Corporation's main source of revenue is derived from the food service industry. This industry has been severely affected by the economic slowdown resulting from the COVID-19 pandemic. Management is monitoring the credit ratings of its large food service customers. At the date of the financial statements, no significant changes to risk ratings were made that impacted expected credit losses.

The aging of accounts receivable, net of allowance, is as follows:

	As at July 31, 2020	As at April 30, 2019
Current 0 - 30 days	\$ 4,583	\$ 4,508
Past due 31 - 60 days	546	715
Past due over 61 days	539	857
Non-trade accounts receivable	960	896
	<u>\$ 6,628</u>	<u>\$ 6,976</u>

The Corporation does not hold any collateral in respect of accounts receivable.

Cash

The Corporation manages its exposure to credit risk for its cash by depositing only with creditworthy counterparties, such as major Canadian financial institutions. The maximum exposure to credit risk for cash at July 31, 2020 was \$3,732 (April 30, 2020 – \$2,629).

Derivative financial instruments

The Corporation manages its exposure to credit risk on its derivative financial instruments by contracting only with creditworthy counterparties, such as major Canadian financial institutions. The Corporation considers that it is exposed to minimal credit risk in the event of non-performance as the counterparty is considered to be of high credit quality.

5.3.2 Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they become due. The Corporation manages liquidity risk by continuously monitoring actual and forecasted cash flows to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Corporation's reputation.

5.3.3 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Corporation's future cash flows or the fair values of its financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return on risk.

Foreign exchange risk

The Corporation is exposed to currency risk on a significant portion of its sales transactions which are denominated in U.S. dollars. The Corporation manages its exposure to exchange rate fluctuations between U.S. and the Canadian dollar by entering into currency forward contracts.

The net foreign exchange gain of \$83 (2019 – loss of \$33) represents the net realized and unrealized gains and losses on settlement of financial instruments during the period

The Corporation is exposed to currency risk through its cash, accounts receivable, accounts payable and accrued liabilities as follows:

(in U.S. \$ thousands)	As at July 31, 2020	As at July 31, 2019
Cash	\$ 1,998	\$ 1,294
Accounts receivable	3,065	4,446
Accounts payable and accrued liabilities	(60)	(32)
Net assets exposed to currency risk	<u>\$ 5,003</u>	<u>\$ 5,708</u>

Based on the net exposure, including the derivative financial instruments described above and assuming that all other variables remain constant, a hypothetical 10 percent appreciation in the Canadian dollar against the U.S. dollar would result in a decrease in

comprehensive income of \$500 (2019 – \$571). A hypothetical 10 percent depreciation in the Canadian dollar against the U.S. dollar would result in an increase in comprehensive income of \$500 (2019 – \$571).

Interest rate risk

The Corporation is exposed to interest rate risk on its loans payables of \$10,008 (April 30, 2020 – \$10,164). The Corporation manages its exposure to fluctuations of interest rates by entering into interest rate swaps that are approved by the Board of Directors.

The Corporation uses an interest rate swap to limit exposure to fluctuations in interest rates. Interest rate swaps a

Construction in progress	195	184
Carrying amount	\$ 19,397	\$ 19,478

Depreciation expense of \$414 (2019 – \$361) is recorded on the statement of comprehensive income in cost of sales, \$7 (2019 – \$7) in marketing and administrative expenses and \$37 (2019 – \$37) in other expenses.

Retirement of property, plant and equipment occurs when an asset is removed due to obsolescence resulting from physical deterioration or economic or technological factors. Disposal of property, plant and equipment assets occurs when the asset is sold to another entity.

The Corporation assesses at each reporting date whether there is an indication that an asset value may be impaired. The assessment as at July 31, 2020 included the effect of the COVID-19 pandemic on the operating assets of the Corporation. No indicators of impairment were identified for property, plant and equipment.

8. INTANGIBLE ASSETS

Informations systems software	As at July 31, 2020		As at April 30, 2020	
Cost	\$	711	\$	711

Carrying amount at July 31, 2020	\$	144		
---	-----------	------------	--	--

Amortization of intangible assets of \$13 (2019 – \$7) is recorded on the statement of comprehensive income in marketing and administrative expenses.

Retirement of intangible assets occurs when an asset is removed due to obsolescence resulting from physical deterioration or economic or technological factors. Disposal of intangible assets occurs when the asset is sold to another entity.

No indicators of impairment were identified for intangible assets as at July 31, 2020.

9. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	As at July 31, 2020		As at April 30, 2020	
Canadian dollars	\$	3,227	\$	3,642
Denominated in U.S. dollars		80		112
Total accounts payable and accrued liabilities	\$	3,307	\$	3,754

10. LOANS PAYABLE

The loans payable consist of the following borrowing facilities:

	As at July 31, 2020		As at April 30, 2020	
Banker's acceptances	\$	29,208	\$	32,864

A \$19,200 (April 30, 2020 – \$22,700) bankers' acceptance bearing interest at an annual rate of 0.51% (April 30, 2020 – 0.60%) and maturing on August 6, 2020. The weighted-average interest rate during the period was 0.55% (July 31, 2020 – 1.96%). Subsequent to August 6, 2020, new bankers' acceptances were entered into at a rate of 0.52%.

A \$6,000 (April 30, 2020 – \$6,083) bankers' acceptance with an interest rate swap bearing an interest rate at 2.82% if the floating rate option on any reset date is less than or equal to 3.00%. If the floating rate option on any reset date is greater than 3.00%, the fixed rate for the calculation period is 3.57%. The Corporation hedges the loan for interest rate risk via an interest rate swap exchanging variable rate interest for fixed rate interest. The structure of the loan involves the use of a revolving bankers' acceptance and an interest rate swap to lock in the interest rate for 12 years.

A \$4,008 (April 30, 2020 – \$4,081) bankers' acceptance with an interest rate swap bearing an interest rate at 2.85% if the floating rate option on any reset date is less than or equal to 3.15%. If the floating rate option on any reset date is greater than 3.15%, the fixed rate for the calculation period is 3.60%. The Corporation hedges the loan for interest rate risk via an interest rate swap exchanging variable rate interest for fixed rate interest. The structure of the loan involves the use of a revolving bankers' acceptance and an interest rate swap to lock in the interest rate for 9.25 years.

Interest payable on amounts drawn under each facility is at the prevailing bankers' acceptance rates plus stamping fees of 0.65%.

The principal of the bankers' acceptances as at July 31, 2020 is \$29,208 (April 30, 2020 – \$32,864) and the fair value of the loans are \$29,208 (April 30, 2020 – \$32,864).

The bankers' acceptances are authorized by the Minister of Finance (Note 1).

11. RECONCILIATION OF LIABILITIES ARISING FROM FINANCING ACTIVITIES

The Corporation's liabilities from financing activities is borrowing in the form of its bank loans.

	As at July 31, 2020	As at April 30, 2020
Loans payable, beginning of the period	\$ 32,864	\$ 32,942
Cash provided by additional borrowing (used for repayment)	(3,500)	700
Cash used for term debt payments	(156)	(778)
Loans payable, end of the period	<u>\$ 29,208</u>	<u>\$ 32,864</u>

12. EMPLOYEE BENEFITS

12.1 Pension benefits

Substantially all of the employees of the Corporation are covered by the Public Service Pension Plan (the Plan), a contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the Corporation. The President of the Treasury Board of Canada sets the required employer contributions based on a multiple of the employees' required contribution. The employer's contribution rate effective at July 31, 2020 for employees enrolled in the Plan prior to January 1, 2013 was 1.01 (2019 – 1.01) and for employees enrolled in the Plan beginning January 1, 2013 was 1.00 (2019 – 1.00). Total contributions of \$158 (July 30, 2019 – \$218) were recognized as an expense in the current year. The estimated contributions for the fiscal year 2020-2021 are \$1,050.

The Government of Canada holds a statutory obligation for the payment of benefits relating to the Plan. Pension benefits generally accrue up to a maximum period of 35 years at an annual rate of two percent of pensionable service times the average of the best five consecutive years of earnings. The benefits are coordinated with the Canada Pension Plan benefits and are indexed to inflation.

Contributions to the Public Service Pension Plan consisted of:

	As at July 31, 2020	As at July 31, 2019
Contributions by the Corporation	\$ 158	\$ 223
Contributions by employees	\$ 158	\$ 218

Effective June 1, 2007, the Corporation concluded an agreement with its union that established the employment status of its fish plant employees on a go forward basis and retroactively to April 1, 1973. During 2011, the Corporation agreed to terms with the Public Service Pension Centre (PSPC) that established the manner in which the Corporation will document cases for employees who should become members under the Public Service Superannuation Act (PSSA) retroactively and on a go forward basis. It also established how the PSPC will deal with those cases in establishing the pension status of the Corporation's fish plant employees. The PSPC establishes the employee's eligibility to contribute, the periods of service countable for pension purposes and the periods of service that an employee can buy back. As employee contributions are made to the pension plan, the Corporation is required to fund the employer's portion of these contributions.

	As at July 31, 2020	As at April 30, 2019
Accrued liability for the Corporation's cost of buyback of service	\$ 86	\$ 90
Less: current portion	13	13
Non-current portion	<u>\$ 73</u>	<u>\$ 77</u>

The Corporation estimates that it has a discounted pension obligation of \$86 for future matching contributions required under this agreement.

13. REVENUE

13.1 Disaggregation of Sales

Sales is disaggregated by primary geographical region in the following table.

Primary Geographical Regions	July 31, 2020	July 31, 2019
North America	\$ 7,872	\$ 12,273
Europe	2,548	2,763
Asia	711	758
	<u>\$ 11,131</u>	<u>\$ 15,794</u>

14. SALES COMMISSIONS

During the period, the Corporation paid commissions of \$217 (July 31, 2019 – \$247) to foreign sales agents. Commissions are included in marketing and administrative expenses on the statement of comprehensive income.

15. OTHER REVENUE AND EXPENSES

Other revenue comprises the operation of the Poplar River Barge and dry-dock facility on Lake Winnipeg and the sale of fishing supplies to fishers. The revenue earned from the operation of the Poplar River Barge and sales of fishing supplies is \$246 (July 31, 2019 – \$369).

Other expenses of \$268 (April 30, 2019 – \$426) consist of costs incurred to earn revenue for the Poplar River Barge and dry-dock facility, as well as the sales of fishing supplies to fishers.

16. RELATED PARTY TRANSACTIONS

The Corporation is related in terms of common ownership to all Government of Canada owned entities.

The Corporation enters into transactions with these entities in the normal course of business, at fair value, under the same terms and conditions that apply to unrelated parties. In accordance with the disclosure exemption regarding government-related entities, the Corporation is exempt from certain disclosure requirements of IAS 24 relating to its transactions and outstanding balances with:

- a government that has control, joint control or significant influence over the reporting entity; or
- another entity that is a related party because the same government has control, joint control or significant influence over both the reporting entity and the other entity.

Based on this exemption, as the Corporation has not entered into any transactions with these related parties which are considered to be individually or collectively significant, the Corporation has not disclosed any details of its transactions with:

- the Government of Canada, and departments and agencies thereof; or
- other federal Crown corporations.

Certain members of the Board of Directors and their closely-related family members are fishers who sell their catch to the Corporation. These transactions are measured at fair value and were incurred during the normal course of business on similar terms and conditions to those entered into with unrelated parties.

Compensation of key management personnel

Compensation of key management personnel includes members of the Board of Directors and executive officers of the Corporation who have the authority and responsibility for planning, directing and controlling the activities of the Corporation.

Compensation for executive officers of the Corporation is recorded on the statement of comprehensive income as salaries and benefits in marketing and administrative expenses. Compensation for members of the Board of Directors is recorded on the statement of comprehensive income as meeting fees and expenses in marketing and administrative expenses.

	2020	2019
Total compensation paid to key management personnel	\$ 255	\$ 253

17. CONTINGENCIES

17.1 Contingencies and provisions

The Corporation is involved in various legal claims arising from the normal course of business. The outcome of these claims is currently not determinable, and accordingly, no amounts have been recorded in the financial statements. Amounts payable, if any, will be recorded when any liability is considered likely and the associated costs can be reasonably estimated.

The total provision for environmental liabilities for the site in Hay River, NWT is \$386 (April 30, 2020 – \$407). The Corporation spent \$21 (July 31, 2019 – nil) for site remediation in Hay River during the period. The Corporation expects to complete the remediation of the Hay River site within the next two years.

A number of other vacant facilities may contain some environmental risk with associated remediation costs. The Corporation's ongoing efforts to assess these sites may result in environmental liabilities related to the sites. A provision will be recorded when the Corporation considers that it is probable that it will remediate these contaminated sites and a reliable estimate can be determined for the amount of the obligations. As of July 31, 2020, no liability has been recognized in the financial statements for any other contaminated site.

The Board of Directors of the Corporation reserves the final decision regarding the amount and timing of a final payment to fishers.

The following details the changes in the provision for final payment over the period.

	As at July 31, 2020	As at July 31, 2019
Provision for final payment to fishers, beginning of period	\$ -	\$ 500
Payment to fishers	-	-
Provision added during the period	-	-
Provision for final payment to fishers, end of period	<u>\$ -</u>	<u>\$ 500</u>
