We embrace a broad scope of environmental, social and governance imperatives in our daily operations and our supply chain because it makes our business, our employees, third-party providers and our communities better.

How we act is as important as the results we achieve. Ethical behavior and acting with integrity are non-negotiables in our company. SAIC and its employees are dedicated to upholding the highest ethical standards in all of our business activities. These commitments enable growth in all other areas. We have the same expectations for our suppliers. We trust that they will have goals, management and business systems in place to support compliance with the letter, spirit and intent of applicable laws, regulations and expectations related to or addressed expressly within this Supplier Code of Conduct. For the purposes of this code, “supplier” is defined as any party that directly or indirectly sells, or seeks to sell, any goods or services to our company or on our company’s behalf, including suppliers, contractors, subcontractors, distributors, dealers, sales or marketing representatives, intermediaries, agents, partners, consultants, resellers, systems integrators or similar entities.

As a member of the Defense Industry Initiative (DII) on Business Ethics and Conduct, we are committed to complying with all laws and regulations, ensuring fair competition and upholding the highest standards in all our business dealings with the U.S. Government, protecting taxpayer resources and providing high-quality products and services for the U.S. Intelligence Community, the U.S. Armed Forces and their allies. We require our suppliers to share this commitment.

Our Supplier Code of Conduct aligns with the recommendations of the DII and establishes expectations for all SAIC and SAIC subsidiary suppliers, subcontractors, consultants and other third-party providers. SAIC takes our partnerships seriously and strives to work with suppliers to meet the principles of this code of conduct. We encourage our suppliers to train their employees on our code of conduct, to implement their own codes of conduct, and to flow down the principles of their codes of conduct to the entities that support them. We also encourage our suppliers to proactively manage and mitigate risks in their supply chain and, where appropriate, report risks to us so we can ensure that they are mitigated.

At SAIC, making a difference for our stakeholders, the environment and our communities is at the core of who we are. We are committed to ethics, integrity and accountability and are proud of our work to make the world a better place—and we strive to do more.
