A few trees were blown down on Paul Mills Road, east of the Echola community.				
TUSCALOOSA COUNTY --- 5.2 E SHIRLEY [33.34, -87.64]				
	04/02/09 14:40 CST		0.50K	Thunderstorm Wind (EG 40 kt)
	04/02/09 14:40 CST		0	Source: Emergency Manager
A few trees were blown down on Sawmill Road, west of Lake Tuscaloosa.				
TUSCALOOSA COUNTY --- 1.8 NW SAMANTHA [33.44, -87.64], 1.9 NNW SAMANTHA [33.44, -87.64]				
	04/02/09 14:43 CST		5K	Tornado (EF1, L: 0.59 mi , W: 150 yd)
	04/02/09 14:44 CST		0	Source: NWS Storm Survey
The tornado touched down near the intersection of Lesueur Road and Old Fayette Road, near the Samantha community. It then moved northeastward for about one half of a mile, and lifted just north of Brady Montgomery Road. The most significant damage occurred as the tornado crossed Brady Montgomery Road. Numerous hardwood and softwood trees were snapped off and uprooted.				
TUSCALOOSA COUNTY --- 7.6 WNW BURCHFIELD [33.38, -87.44]				
	04/02/09 14:55 CST		0	Hail (0.75 in)
	04/02/09 14:55 CST		0	Source: Emergency Manager

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Penny sized hail was reported at the intersection of Watermelon Road and Lock 15 Road.

TUSCALOOSA COUNTY --- 7.6 WNW BURCHFIELD [33.38, -87.44]

04/02/09 14:55 CST			0.50K	Thunderstorm Wind (EG 50 kt)
04/02/09 14:55 CST			0	Source: Emergency Manager

A few trees were blown down near the intersection of Watermelon Road and Lock 15 Road.

WALKER COUNTY --- 2.1 ENE SARAGOSSA [33.91, -87.36], 3.3 NNW MARIGOLD [33.97, -87.28]

04/02/09 18:15 CST			5K	Thunderstorm Wind (EG 39 kt)
04/02/09 18:28 CST			0	Source: Emergency Manager

Thunderstorm winds produced sporadic, isolated, tree damage in several locations of northern Walker County, from near the area around the Walker County Airport, northeastward to the Fall City Road area near the Winston County line. Single trees were reported blown down at each location.

LAMAR COUNTY --- 0.7 S CREWS [33.89, -88.13]

04/02/09 18:47 CST			3K	Thunderstorm Wind (EG 50 kt)
04/02/09 18:47 CST			0	Source: Emergency Manager

Numerous trees and signs were blown down in and around Sulligent.

MARION COUNTY --- 8.5 SW BARNESVILLE [34.04, -88.18], 2.2 WNW THORN HILL [34.19, -87.70]

04/02/09 18:50 CST			0.20M	Thunderstorm Wind (EG 70 kt)
04/02/09 19:15 CST	2		0	Source: Emergency Manager

A large swath of damaging winds, with peak gusts estimated around 80 mph, swept across a large portion of Marion County, from near the Mississippi state line and Lamar County line, eastward to near the Winston County line. The heaviest damage was in a swath from near the Detroit community, to east of Hamilton. Hundreds of trees were either snapped off or uprooted. Several of the trees landed on both mobile homes and permanent site homes, as well as several vehicles. Two people in the Byrd community were injured when a tree fell on their mobile home. A restaurant near Guin had its windows blown out and its roof partially removed. A metal billboard structure was bent to the ground, and several other business signs were damaged by the wind. At least one small barn sustained major damage.

WINSTON COUNTY --- 0.8 ESE HALEYVILLE [34.23, -87.61]

04/02/09 19:16 CST			60K	Thunderstorm Wind (EG 60 kt)
04/02/09 19:16 CST	1		0	Source: Emergency Manager

Windows were blown out, a ball field dugout, and a baseball batting cage, all sustained damage at Haleyville High School. About 50 students and adults, preparing for the school's prom in the gym, heard about the oncoming storm from a police officer. They took shelter in the basement/locker room area under the gym, and were not injured. Numerous trees and power lines were blown down around the rest of the city of Haleyville. Power lines landed on a vehicle, and briefly trapped its occupants. A tree fell onto a mobile home, slightly injuring one occupant. At least two other homes sustained damage from fallen trees.

FAYETTE COUNTY --- 0.7 N FAYETTE [33.69, -87.83]

04/02/09 19:17 CST			5K	Thunderstorm Wind (EG 50 kt)
04/02/09 19:17 CST			0	Source: Emergency Manager

Numerous trees were blown down in the city of Fayette.

FAYETTE COUNTY --- 1.1 ESE STOUGH [33.69, -87.73]

04/02/09 19:18 CST			1K	Thunderstorm Wind (EG 50 kt)
04/02/09 19:18 CST			0	Source: Department of Highways

Several trees were blown down on CR-77 and AL-18, completely blocking the road.

WINSTON COUNTY --- ASHBANK [34.02, -87.50]

04/02/09 19:30 CST			10K	Thunderstorm Wind (EG 50 kt)
04/02/09 19:30 CST	1		0	Source: Emergency Manager

Trees were blown down in the Ashbank community. One of the trees landed on a vehicle, and the occupant suffered a compound fracture.

WALKER COUNTY --- 2.9 WSW GAMBLE [33.86, -87.37]

Several trees were blown down and landed on a house, near the intersection of US-80 and Brooks Road, near the Crawford community.				

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
TALLAPOOSA COUNTY --- 2.1 E REELTOWN [32.59, -85.76], 4.0 ESE REELTOWN [32.58, -85.73]				
	04/10/09 19:26 CST		5K	Tornado (EF0, L: 1.91 mi , W: 25 yd)
	04/10/09 19:29 CST		0	Source: Emergency Manager
A long tracked tornado, which would eventually track into two other counties, first touched down on Happy Hollow Road just northwest of the Liberty City community, near the Tallapoosa and Macon County line. The tornado was in Tallapoosa County for less than two miles, and caused generally light damage.				
MACON COUNTY --- 3.9 WNW NOTASULGA [32.58, -85.73], 2.4 NNE SOCIETY HILL [32.46, -85.44]				
	04/10/09 19:29 CST		0.20M	Tornado (EF1, L: 19.22 mi , W: 440 yd)
	04/10/09 19:57 CST		0	Source: Emergency Manager
The tornado that touched down near Liberty City in Tallapoosa County crossed into Macon County, and continued to travel southeast, staying just southwest of the Lee County line for most of its path. In Macon County, thousands of trees were either snapped off or uprooted along the damage path. A few mobile homes suffered varying degrees of damage, and one mobile home was knocked off its foundation. Several barns had their roofs partially removed, and several other structures suffered varying degrees of roof damage. Several homes and vehicles had windows broken out.				
RUSSELL COUNTY --- 0.6 W PHENIX CITY [32.47, -85.01]				
	04/10/09 19:30 CST		20K	Thunderstorm Wind (EG 50 kt)
	04/10/09 19:30 CST		0	Source: Emergency Manager
Numerous trees were blown down, and 4 to 5 homes were damaged, in Phenix City.				
MONTGOMERY COUNTY --- 2.6 NNE PINEDALE [32.34, -86.22], 4.6 E MATHEWS [32.28, -85.92]				
	04/10/09 19:48 CST		0.35M	Tornado (EF1, L: 17.62 mi , W: 440 yd)
	04/10/09 20:16 CST		0	Source: NWS Storm Survey
A long-tracked tornado, that would eventually move into portions of Macon and Bullock Counties, first touched down near the intersection of US-80 (Eastern Blvd.) and AL-110 (Vaughan Road), on the east side of the city of Montgomery. The storm then moved east southeast through the eastern part of the Montgomery metro area, later crossing AL-271 (Taylor Road) and CR-85. It then impacted the Cecil community in the far eastern portion of the county, before moving into Macon County. At least 3 barns and several outbuildings were damaged or destroyed along the path. Dozens of homes suffered minor to moderate roof damage and numerous windows were broken. Thousands of trees were either snapped off or were uprooted along the path. Several homes and vehicles were damaged from flying or falling debris. An apartment complex on Vaughan Road sustained damage. The most concentrated damage occurred along Ray Thorington Road, where extensive tree damage was apparent, a school was damaged and a few homes were damaged.				
LEE COUNTY --- 5.0 W BUPREE [32.46, -85.44], 1.1 WNW MARVYN [32.44, -85.37]				
	04/10/09 19:57 CST		5K	Tornado (EF1, L: 4.40 mi , W: 50 yd)
	04/10/09 20:04 CST		0	Source: Emergency Manager
The tornado that had previously moved through Tallapoosa and Macon Counties completed its journey in Lee County. It entered Lee County near Lee Road 812 and Long Branch Creek. It traveled another 4.4 miles southeast, before finally lifting near the intersection of US-80 and AL-51, near the Marvyn community. Most of the path in Lee County was across rural forest or farm land, and damage was relatively minor.

	04/10/09 19:59 CST		0	Source: Emergency Manager
Several trees were blown down near CR-2 and CR-6, southeast of Shorter.				
MACON COUNTY --- 1.3 S CHESSON [32.28, -85.92], 1.9 SE CHESSON [32.28, -85.90]				
	04/10/09 20:16 CST		3K	Tornado (EF0, L: 1.39 mi , W: 50 yd)
	04/10/09 20:18 CST		0	Source: NWS Storm Survey
The long tracked tornado that tracked across a large section of Montgomery County made its first of three county line crossings, into Macon County. In this portion of Macon County, the tornado track was just over a mile long, and through a largely rural area.				
AUTAUGA COUNTY --- 2.4 E BOOTH [32.50, -86.54]				
	04/10/09 20:17 CST		2K	Thunderstorm Wind (EG 50 kt)
	04/10/09 20:17 CST		0	Source: Emergency Manager
Trees were blown down and blocked the road, at the intersection of CR-10 and CR-57, near the Booth community.				
BULLOCK COUNTY --- 2.7 NE MITCHELL [32.28, -85.90], 3.8 ENE MITCHELL [32.28, -85.87]				

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/10/09 20:18 CST		3K	Tornado (EF0, L: 1.51 mi , W: 50 yd)
	04/10/09 20:20 CST		0	Source: NWS Storm Survey

The long tracked Montgomery-Cecil tornado moved out of Macon County, and cut across the far northwestern tip of Bullock County. The track was through a rural part of the county, and damage was light.

MACON COUNTY --- 1.4 WSW HARDAWAY [32.28, -85.87], 0.5 S DOWN [32.26, -85.78]

	04/10/09 20:20 CST		10K	Tornado (EF1, L: 5.55 mi , W: 250 yd)
	04/10/09 20:29 CST		0	Source: NWS Storm Survey

After its brief journey across the tip of Bullock County, the Montgomery-Cecil tornado moved back into Macon County, near Bughall Creek. These last several miles of the path caused damage mainly to trees. Along the entire path, 3 buildings were destroyed, and another 20 structures suffered varying degrees of damage. Despite the long path, no injuries were reported.

RUSSELL COUNTY --- 0.2 SSE SEALE [32.30, -85.17]

	04/13/09 18:38 CST		0	Hail (0.75 in)
	04/13/09 18:38 CST		0	Source: Public

An intense atmospheric gravity wave brought a period of high winds to central Alabama late in the evening on April 12, lasting into the early morning hours on April 13. The gravity wave, which formed on the back edge of a large precipitation area, moved into west central Alabama from Mississippi around 9 pm CDT, moved across the middle of the state, and exited the east central counties by 8 am CDT the next morning. As the wave moved through, it produced a 1 to 2 hour long period of strong winds, with frequent gusts above 30 mph, and peak gusts averaging 40 to 50 mph. A larger number of trees were blown down than one may usually expect from these wind speeds, since many trees were weakened by a recent drought, and because the gusty winds lasted for up to two hours. The downed trees caused numerous power outages, and as many as 165,000 customers lost power during the storm.

FAYETTE COUNTY --- 0.5 SSW FAYETTE [33.67, -87.83]

	04/19/09 13:47 CST		2K	Thunderstorm Wind (EG 40 kt)

A couple of trees were blown down near the intersection of CR-79 and CR-10, near the Creek Stand community.

TALLADEGA COUNTY --- TALLADEGA [33.43, -86.10]				
	04/19/09 21:00 CST		15K	Thunderstorm Wind (EG 50 kt)
	04/19/09 21:00 CST		0	Source: Emergency Manager

Several trees were blown down in the city of Talladega. At least two trees fell onto houses, and another fell onto a car.

RUSSELL COUNTY --- 1.5 WNW GIRARD [32.46, -85.02], 0.3 SSE PHENIX CITY [32.47, -85.00]				
	04/19/09 21:33 CST		0.50M	Tornado (EF2, L: 1.47 mi , W: 250 yd)
	04/19/09 21:35 CST		0	Source: NWS Storm Survey

The tornado touched down near the intersection of 22nd Avenue and 17th Street in Phenix City. It then traveled northeast through the south end of Phenix City, and crossed the Chattahoochee River and moved into Muscogee County Georgia. Five businesses sustained major damage, and seven homes received varying degrees of roof damage. At least 100 and as many as 200 trees were snapped or uprooted.

A powerful spring storm system and associated cold front brought numerous thunderstorms to central Alabama. Many of the storms produced large hail, damaging winds, and tornadoes.

ALABAMA, North

COLBERT COUNTY --- 2.7 N OLD BETHEL [34.62, -87.53], 2.4 SW BINGHAM [34.62, -87.53]				
	04/02/09 14:46 CST		33K	Tornado (EF1, L: 0.26 mi , W: 75 yd)
	04/02/09 14:48 CST		0	Source: NWS Storm Survey

This was an EF-1 tornado with a peak wind of 100 mph, path length of 0.26 miles, and a maximum path width of 75 yards. The tornado touched down along County Line Road about one mile south of Whiteoak and moved northward before lifting before reaching Alabama Highway 157 near Bingham. The roof of a church was heavily damaged and several large trees were snapped or uprooted. Also, numerous power lines were blown down.

LIMESTONE COUNTY --- 0.8 WNW MURPHREE PLACE [34.70, -86.98], 1.0 SE TANNER [34.72, -86.96]				
	04/02/09 15:35 CST		11K	Tornado (EF0, L: 1.69 mi , W: 50 yd)

	04/02/09 16:29 CST		0	Source: NWS Storm Survey
An EF-1 tornado with a peak wind of 105 mph, path length of 1.2, and a maximum path width of 200 yards touched down in a field south of Lower Dry Creek Road. This tornado tracked northeast across Kay Road and across Sherbrook Drive before lifting. Several large trees were uprooted or snapped. Multiple residences sustained minor damage and a shed was destroyed. Greater structural damage resulted from large trees falling on structures and not the tornado itself.				

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
MADISON COUNTY --- 1.6 NE HUNTSVILLE [34.74, -86.60], 1.8 E HUNTSVILLE [34.73, -86.59], 2.5 S HUNTSVILLE MILLS ARP [34.71, -86.55], 1.7 E LILY FLAG [34.65, -86.54], 0.3 S LILY FLAG [34.65, -86.57], 1.2 ESE HUNTSVILLE [34.73, -86.60]				
	04/02/09 17:30 CST		0	Flash Flood (due to Heavy Rain)
	04/02/09 23:30 CST		0	Source: Emergency Manager
Flash flooding occurred in several locations across southern and eastern sections of Huntsville, particularly in locations near Memorial Parkway. Some of these locations included the intersections of Memorial Parkway/Clinton Avenue and Memorial Parkway/Weatherly Road. Also the 700 block of Lily Flagg Road and the 500 block of Garth road experienced some flash flooding. Timing of flash flooding was estimated.				
MADISON COUNTY --- 1.2 NW HAZEL GREEN [34.94, -86.60]				
	04/02/09 18:00 CST		0	Heavy Rain
	04/02/09 20:00 CST		0	Source: Public
Two to three inches of water was reported covering the road on Nix Road between Charity Lane and West Limestone Road in Hazel Green.				
MORGAN COUNTY --- 2.8 WSW BROOKSVILLE [34.48, -86.90], 0.8 NNE HARTSELLE [34.44, -86.92]				
	04/02/09 18:47 CST		2K	Thunderstorm Wind (EG 52 kt)
	04/02/09 18:53 CST		0	Source: Newspaper
Thunderstorm winds knocked down a tree which ruptured a propane gas tank at a residence in the Cedar Grove community. The storms then knocked a large oak tree onto a residence on Bethel Road.				
MORGAN COUNTY --- 0.2 N SOMERVILLE [34.47, -86.80]				
	04/02/09 18:50 CST		16K	Thunderstorm Wind (EG 56 kt)
	04/02/09 18:55 CST		0	Source: Emergency Manager
Numerous trees were blown down in the Somerville area.				
MADISON COUNTY --- 0.2 SSW HUNTSVILLE [34.73, -86.62], 0.5 E HUNTSVILLE [34.73, -86.61]				
	04/02/09 19:09 CST		8K	Tornado (EF0, L: 0.59 mi , W: 50 yd)
	04/02/09 19:13 CST		0	Source: NWS Storm Survey
An EF-0 tornado with a peak wind of 85 mph, path length of 0.59 miles, and a maximum path width of 50 yards touched down just southwest of Butler High School. This tornado tracked across Holmes Avenue to the Fairway Drive area and lifted before it exited the neighborhood. Several large trees were snapped or uprooted. One home was damaged when a large tree fell on it. A mobile home received minor roof damage.				
MADISON COUNTY --- 1.7 E HUNTSVILLE [34.73, -86.59]				
	04/02/09 19:10 CST		45K	Thunderstorm Wind (EG 56 kt)
	04/02/09 19:15 CST		0	Source: Emergency Manager
Telephone poles and trees were reported down in southwestern portions of downtown Huntsville. A telephone pole fell on a house.				
MADISON COUNTY --- LILY FLAG [34.65, -86.57]				
	04/02/09 19:10 CST		0	Funnel Cloud
	04/02/09 19:10 CST		0	Source: Trained Spotter
A funnel cloud was spotted over Memorial Parkway in south Huntsville. Time was estimated from radar.				
MADISON COUNTY --- LILY FLAG [34.65, -86.57]				
	04/02/09 19:10 CST		0	Funnel Cloud
	04/02/09 19:11 CST		0	Source: Trained Spotter
A funnel cloud was spotted over Memorial Parkway in south Huntsville.				
FRANKLIN COUNTY --- 0.6 W PHIL CAMPBELL [34.35, -87.71]				
	04/02/09 19:15 CST		7K	Thunderstorm Wind (EG 52 kt)
	04/02/09 19:20 CST		0	Source: Law Enforcement
Trees were blown down in the Phil Campbell area.				
FRANKLIN COUNTY --- 0.7 NW SPRUCE PINE [34.39, -87.74]				

Storm Data and Unusual Weather Phenomena - April 2009

Trees were reported down in Bridgeport. Time was estimated by radar.				
MARSHALL COUNTY --- 2.5 SW CROSSROADS [34.30, -86.37]				
	04/02/09 20:35 CST		5K	Thunderstorm Wind (EG 56 kt)
	04/02/09 20:40 CST		0	Source: Newspaper
Two large trees fell on a shed off Browns Valley Road. The roots from one of the trees tore up a portion of his driveway.				
LAWRENCE COUNTY --- 5.9 W SPEAKE [34.43, -87.17], 5.5 SE KIMO [34.45, -87.17], 5.3 WNW SPEAKE [34.45, -87.15], 4.6 W SPEAKE [34.43, -87.15]				
	04/02/09 21:30 CST		0	Flood (due to Heavy Rain)
	04/03/09 03:30 CST		0	Source: Fire Department/Rescue
Prolonged heavy rainfall caused water to flood CR 203 and 208.				
<p>A powerful low pressure system tracked from Arkansas into the Ohio Valley, lifting a warm front north during the afternoon, and pushing a cold front during the evening hours. Two quasi-linear convective systems (QLCS) tracked east through the Tennessee Valley, resulting in two waves of severe thunderstorms that produced four tornadoes of EF0 and EF1 intensity, wind damage, and several short duration flash floods, mainly in urban areas of Huntsville and Decatur. Damaging non-thunderstorm winds occurred behind the cold frontal passage, enhanced by a possible gravity wave.</p>				
(AL-Z002) COLBERT				
	04/06/09 18:00 CST		0	Winter Weather
	04/06/09 22:00 CST		0	
<p>An unseasonably deep trough of low pressure produced sleet and snow showers during the afternoon hours across portions of northern Alabama. During the nighttime hours, snow showers were reported in northeast Alabama, with some very minor accumulations in the higher elevations.</p>

	04/10/09 04:38 CST		16K	Tornado (EF0, L: 1.96 mi , W: 200 yd)
	04/10/09 04:43 CST		0	Source: NWS Storm Survey
An EF-0 tornado with a 1.9 mile path length and maximum path width of 200 yards touched down just west of Martling Road in the Martin/Asbury community. The tornado tracked east across Martling Road, Bell Orr Drive, and Claude Hill Road before weakening and lifting near Asbury Church Road. Along the track, several trees were uprooted and a few were snapped. Most of a metal roof was peeled from a well constructed barn. A few houses near Claude Hill Road sustained minor roof damage.				
Thunderstorms erupted during the late night and early morning hours across north Alabama in advance of a strong storm system moving from the southern Plains into the middle Mississippi Valley. The storms evolved into a small quasi-linear convective system (QLCS) as they moved into northeast Alabama. A meso-cyclone developed along this line producing a short-lived EF0 tornado in eastern Marshall County.				
<hr/>				
COLBERT COUNTY --- 0.7 N CHEROKEE [34.76, -87.97]

MARSHALL COUNTY --- 2.7 SSE GRANT [34.49, -86.25], 2.2 ENE KIRBYTOWN [34.51, -86.10]

	04/10/09 14:02 CST		0	Tornado (EF3, L: 8.83 mi , W: 440 yd)
	04/10/09 14:14 CST	5	0	Source: NWS Storm Survey

A tornado touched down approximately 2.5 miles south southeast of Grant along Campbell Mill Road. A few houses sustained minor roof damage on the southeast side of Grant. At least two mobile homes sustained major damage from falling trees. The tornado continued east crossing Old Union Road, Columbus City Road, and Cardessa Lane before descending into the Tennessee River Valley. The tornado crossed Highway 79 at approximately 307 PM CDT at the Baker Mountain Road intersection. At this point the damage path width was just below a half of a mile wide. One woman was injured when a tree fell on her car near the Waterfront Grocery store. Several houses sustained substantial damage on the east side of Highway 79 and many trees were snapped and uprooted. The roof was blown off of one home and a brick wall collapsed. The tornado crossed a small inlet onto the south side of Preston Island, wiping out several boat docks and boat houses. Several homes sustained significant damage on the island from falling trees. At least two wood homes had complete roof collapse and partial wall collapse.

The tornado crossed Lake Guntersville into the South Sauty community. At least one person was injured in this area when he was caught outside during the tornado. At this point, the damage path width increased to at least a half a mile wide. Several well built homes were damaged by falling trees along Memonminee Road. At least 20 boat houses were destroyed in the community. Along Chilcotin Road a well constructed two story brick house lost its roof. Also falling trees damaged several camper trailers. One trailer was blown into Lake Guntersville. Thousands of trees were uprooted or snapped along the path of the tornado in Marshall county. The tornado crossed the CR 67 causeway and very shortly after moved into Jackson county. On CR 67, tornadic winds damaged the shoulder of the roadway as it crossed.

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

This destructive tornado continued to move east northeast from Jackson county into Dekalb county. Just on the east side of Highway 35, a large metal industrial building that was securely anchored into the ground was completely destroyed. In Sylvania, significant damage occurred to several homes in the Stonebrook division. One home was completely lifted off its foundation and driven nearly 4 feet into the ground. Sporadic damage continued just to the east of Sylvania until the tornado apparently lifted between 335 and 340 PM CDT, just south of the Mahan Crossroads community in west central Dekalb county.

Golf ball sized hail was reported along US 431 southeast of Albertville.				
<p>A strong upper level storm moving across the Mississippi Valley brought a dry line and cold front into north Alabama during the afternoon and early evening hours. Several classic supercell thunderstorms developed by early afternoon in northwest Alabama, sweeping across the remainder of north Alabama during mid to late afternoon hours. Many of the storms produced very large hail, up to baseball and softball sized, producing significant damage, especially from Decatur through Madison and northwest Huntsville. One of the supercells produced a long track tornado producing damage of up to EF-3 intensity which struck northeastern Marshall County, crossed Lake Guntersville, and moved into southern DeKalb County.</p>

	04/13/09 04:30 CST		0	
<p>A wave of damaging winds produced widespread and significant damage to portions of north central and northeast Alabama during the late evening hours of the 12th into the early morning hours of the 13th. These winds have been attributed to wake low / gravity wave combination on the northwest edges of a decaying mesoscale convective system (MCS) across central Alabama into northern and central Georgia. Sustained wind speeds of 40 to 50 mph were common over a period of one to two hours, especially across Morgan, Cullman, Marshall and Jackson Counties. Damages were most severe in the communities of Guntersville and Scottsboro where widespread damage was reported, and power was knocked out as numerous large trees were knocked down. Schools were closed in both communities for up to three days. Many roads became impassible on the morning of the 13th due to the tree damage. Trees were knocked down onto homes, vehicles and trailers, entrapping one individual in a camper in Scottsboro. In Scottsboro, power was out for no less than three days in some cases.</p>

An EF-0 tornado touched down briefly in the Guest community along CR 50. Several softwood trees were uprooted and a small barn was destroyed on the north side of the road. The tornado continued to move northeast along CR 44 causing sporadic tree damage before lifting.

DEKALB COUNTY --- 2.6 SSE STAMP [34.55, -85.71], 0.7 ESE HAMMONDVILLE [34.58, -85.62]

04/19/09 20:16 CST		0	Tornado (EF1, L: 5.27 mi , W: 150 yd)
04/19/09 20:21 CST	13	0	Source: NWS Storm Survey

The tornado touched down along CR 121. Several trees were uprooted and some small trees were snapped. Falling trees caused some minor structural damage. An awning was damaged at one home along CR 121. Damage became more sporadic farther east, where there were mainly uprooted trees along the damage path. The tornado finally lifted near the intersection of Alabama Highway 117 and Lowery Road just west of Valley Head.

Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A strong low pressure system tracking northeast from the southern Ozarks into the Ohio Valley brought a cold front into the central Tennessee Valley during the late afternoon and evening hours of the 19th. Supercells erupted across northern Mississippi, moving into far northwest Alabama shortly before 5 pm CDT. Initially, these storms were large hail producers, with up to baseball sized hail reported in the town of Red Bay in Franklin County. As the early evening progressed, this supercell tracked into Lawrence and Morgan Counties producing wind damage and at least six tornadoes as it moved east. A male individual was killed in the town of Priceville in Morgan County when a tree was knocked down onto his trailer home. The thunderstorms evolved into a quasi-linear convective system (QLCS) as they moved into Marshall and DeKalb Counties. Another tornado developed rapidly in the community of Asbury in Marshall County, killing one and critically injuring another when their mobile home was destroyed. The QLCS progressed into DeKalb County producing additional tornado damage.
