Several trees were blown down in the western portion of Calhoun County, near Ohatchee.				
TALLADEGA COUNTY --- 0.9 SSW SHOCCO [33.41, -86.14]				
	06/15/09 21:15 CST		20K	Lightning
	06/15/09 21:15 CST		0	Source: Newspaper
A lightning strike at the Alabama Department of Transportation office in Talladega caused considerable damage, both to the outdoor grounds and to equipment on the inside. The lightning apparently struck a flag pole in front of the building, and then ran down the pole into the ground. The underground current created a small ditch and blew out a portion of a concrete sidewalk. From there it continued into the building, burning down an awning, blowing out a window, and ultimately frying several pieces of computer equipment. Damage to the grounds was estimated around \$2000 to \$3000 dollars, with the computer equipment between \$10,000 and \$20,000.

Thunderstorm winds knocked a large tree onto the roof of a home. Time estimated.				
A small but intense complex of thunderstorms tracked east-southeast into northern Alabama during the late morning and early afternoon of the 10th. Frequent lightning occurred with the strongest storms, sparking a house fire, a telephone pole fire, and knocking a power pole down. A bow echo developed with the cluster of storms as it entered Limestone and Madison Counties, producing winds of 50 to 60 mph which caused isolated damage in northern Madison County.				
MARSHALL COUNTY --- ARAB [34.32, -86.50], 3.6 ESE BOAZ [34.18, -86.12]				
	06/11/09 09:51 CST		50K	Thunderstorm Wind (ES 52 kt)
	06/11/09 10:37 CST		0	Source: Newspaper
Thunderstorm winds uprooted trees, snapped power lines and power poles in several areas of southern Marshall County, including the communities of Boaz and Sardis City, including along U.S. Highway 431 and Alabama Highway 205. Other trees were knocked down on Church and Gamble Streets in Sardis City. In Boaz, trees were knocked down on Collier, Bassett and Davis Streets, and Summerville Road and Alabama Highway 205. In Albertville, a tree was knocked down into a home on Oak Street causing significant damage. Times were estimated by radar.				
A mesoscale convective system (MCS) tracked east through the Tennessee Valley. The center of this system tracked through southern Tennessee, while an associated squall line produced damaging thunderstorm winds in Marshall County Alabama. Trees and power lines were knocked down in several communities throughout the southern portion of the county.				
DEKALB COUNTY --- HENAGAR [34.47, -85.78]				
	06/11/09 15:51 CST		0	Hail (1.00 in)

	06/15/09 19:32 CST		0	Source: NWS Storm Survey
The rear flank downdraft from a large steady state supercell produced straight lined wind gusts between 65 and 75 mph across much of southern and central Morgan county. The damage path from the storm began just over the border in Lawrence county along CR 431 north of Caddo, where several trees were blown down. The damaging winds then spread southeast into southern portions of Decatur and Priceville. Numerous trees were reported down along this portion of the path and some damage to structures occurred. A gust to 75 mph was reported east of Hartselle on Highway 67 S. Damage to structures included: an automobile dealership sign blown down in the southern portions of Decatur and minor damage to homes. Damage was more sporadic near the Stringer community, which is a very rural area. As the storm pushed southeast of Florette, it's rear flank downdraft produced it's most devastating straight lined winds in the Eva, Center Dale, and Gum Pond communities (damage roughly covered 16 square miles). In these locations, numerous trees were snapped or uprooted, including many hardwood trees. Power poles were also snapped and some homes received minor to moderate damage. Peak wind gusts were estimated to reach 95 mph in this portion of the storm track. A few more trees were blown down near the Marshall and Cullman county border from this storm.

A number of trees were reported blown down along Old Hillsboro road and the Livingston community. Also, the sign at the Days Inn at the intersection of Old Moulton Road and Alabama Highway 157 was twisted by the strong winds.

A cluster of supercell thunderstorms developed in western Tennessee during the afternoon hours, dropping southeast into northwestern and north central Alabama during the early to middle evening hours. These storms produced copious amounts of large hail, some of it over 3 inches in diameter in the Decatur area. Damaging winds of 65 to 95 mph were estimated, knocking down numerous large trees in the path of these storms. The strongest estimated winds up to 95 mph occurred in a 16 square mile area affecting portions of Eva, Center Dale, and Gum Pond. Flash flooding became a problem due to intense rainfall of 1 to 3 inches, particularly in Decatur and Hartselle in Morgan County. Nearly continuous lightning was reported with these storms. Observers noticed spectacular anvil crawler and cloud to ground lightning strikes. Numerous power outages were reported due to power lines being knocked down or due to lightning strikes.

Storm Data and Unusual Weather Phenomena - June 2009
