| The tornado touched down near Ashington Drive, in the Brook Highland area, just southwest of Lake Purdy. It then moved east-northeast, across AL-119, and into the Greystone area. Numerous trees were uprooted along the path. At least 20 homes suffered minor roof damage, mainly the loss of shingles. Other damage was limited to uprooted and snapped trees, especially on the Greystone golf course. The course was closed for a day due to clean up. |                    |                   |                     |                                       |

The city of Montgomery experienced extensive flash flooding due to a period of very heavy rainfall. An estimated 10+ inches of rain fell in portions of Montgomery County in about a six hour time frame. The downtown area, including the capitol district, was hit especially hard. At least three feet of water flowed into the basement of the Statehouse building, and state legislators temporarily moved to backup chambers in the old Capitol. Numerous streets downtown were closed, and numerous cars became stranded in the high water. One 67 year old man drowned when his car was swept away by flood waters in Montgomery.

Direct Fatalities: M67VE

**BULLOCK COUNTY --- 1.9 SSW MITCHELL [32.22, -85.94], 6.6 N SAGEFIELD [32.28, -85.70], 2.6 SE PEACHBURG [32.14, -85.59], 1.4 W ABERFOIL [32.07, -85.70], 1.8 SW HECTOR [32.10, -85.95]**

Flash flooding caused numerous roads to become impassable. High water was reported on several county roads, in and around the city of Union Springs.

**A slow moving area of thunderstorms brought considerable flash flooding to several counties in central and southeast Alabama. A relatively narrow but rather long swath of rainfall of 3 to more than 7 inches stretched from northeastern Autauga County, across the city of Montgomery, and into southern Russell and northern Barbour Counties. Peak rainfall amounts approached 10 inches.**

## Storm Data and Unusual Weather Phenomena - May 2009

| Location | Date/Time          | Deaths & Injuries | Property & Crop Dmg | Event Type and Details               |
|----------|--------------------|-------------------|---------------------|--------------------------------------|
|          | 05/03/09 14:40 CST |                   | 20K                 | Tornado (EF1, L: 0.25 mi , W: 50 yd) |
|          | 05/03/09 14:45 CST |                   | 0                   | Source: NWS Storm Survey             |

A tornado with a path length 1/4 of a mile, peak wind of 100 mph, and a maximum path width of 50 yards touched down just east of Morgan City. The most extensive damage occurred along Griffin Acres Road, where a roof was uplifted from a shed. This caused the shed to partially collapse. Multiple trees were also uprooted and snapped. A large tree was blown down onto a trailer just before it lifted near Green Briar Cove Road.

| The tornado touched down in the backyard of a mobile home along CR 327. At this location, a large oak tree fell onto the mobile home splitting it in two where a woman and her young daughter were taking shelter. Numerous trees were uprooted and snapped surrounding the home. The tornado path continued northeast along CR 328 producing significant damage to another mobile home. More than half of the structure was moved off its well secured foundation and the majority of the roof was blown off. A few outbuildings were completely destroyed and vehicles were moved from their original locations in the driveway. Numerous large trees were snapped and uprooted at this location. Peak wind speed was estimated at 105 mph. |                    |                   |                     |                                      |

| The tornado continued northeast into Madison County. Significant tree damage occurred in several subdivisions along County Line Road, Mill Road, Browns Ferry, Wall Triana Highway, Hughes Road and Slaughter Road. Windows were blown out of several houses in the Huntington Chase subdivision along with significant roof damage. A large attached garage was completely flattened along Browns Ferry Road and roof damage was observed in the Bridgefield subdivision. Several residents of the Bridgefield subdivision noted that they received the tornado warning and took cover before the storm hit. The tornado tracked through the parking lot of West Madison Elementary School, knocking large pine trees down onto apartment buildings and a home adjacent to the school. The tornado then tracked through the Wellington subdivision producing tree and roof damage. Sporadic damage persisted as the tornado moved northeast across Hughes Road, atop Rainbow Mountain, and across Slaughter Road into northwest Huntsville and the Providence development. The tornado finally lifted near Research Park and Plummer Road. |                    |                   |                     |                                      |

| 05/06/09 13:00 CST | 0  | Source: Emergency Manager |

Heavy rainfall from strong to severe thunderstorms caused several roads to be flooded in eastern portions of Marshall county. These roads included: Summerville Road and Forest Forest Grove Road. More serious flooding occurred on Old Jordan Road, Gene Brown Road, and Needmore Road. In these locations, roads were closed and a few bridges were washed out. One of these bridges was White Oak Creek bridge, which crosses a portion of Slab Creek.

| 05/06/09 13:55 CST | 0 | Source: Emergency Manager |

Heavy rainfall from strong to severe thunderstorms closed several roads in eastern portions of Lauderdale county. Roads that were closed included: Turner Lindsey Road in Rogersville, CR 379/CR 130 in the Greenhill area, CR 156/CR 520/CR 534/CR 522 in the Anderson area, and CR 502 in the Lexington area.

**Strong thunderstorms erupted around Midnight on the 6th in northwest Alabama and tracked across portions of north Alabama. The storms produced one to three inches of rainfall in parts of Lawrence, Morgan, Cullman and Marshall Counties resulting in a few instances of flash flooding. Following this first round of thunderstorms, a vigorous quasi-linear convective system (QLCS) advanced eastward from northern Mississippi into northwest Alabama before sunrise. This system strengthened as it encountered increasing instability. Given high amounts of low level wind shear, a break in the line resulted as a strong comma head / mesocyclone developed. This storm evolved into its own miniature supercell spawning three tornadoes along its track from eastern Lawrence through Morgan, Limestone and Madison Counties. The tornado in Limestone and Madison County produced up to EF2 damage along its 10.9 mile track, narrowly missing an elementary school, high school, and two churches in Madison. Other reports of thunderstorm wind damage were received with these storms.**

---

### MORGAN COUNTY --- 3.0 NNW HARTSELLE [34.47, -86.95]

|                    |    |                   |
|--------------------|----|-------------------|
| 05/13/09 07:00 CST | 2M | Lightning         |
| 05/13/09 07:00 CST | 0  | Source: Newspaper |

Lightning struck a four story, 20,000 square foot house on Breeding Drive north of Hartselle. A mother and child were in the home at the time and escaped without injury, as the fire erupted and quickly spread throughout the house. Tragically, this house was burned to the ground. In addition, the blaze destroyed two antique cars.

Thunderstorm winds blew down a tree onto Jacobs Avenue in Bridgeport.

### CULLMAN COUNTY --- 0.6 W GOOD HOPE [34.10, -86.88]

|                    |   |                           |
|--------------------|---|---------------------------|
| 05/15/09 19:50 CST | 0 | Lightning                 |
| 05/15/09 19:50 CST | 1 | Source: Emergency Manager |

Lightning struck a person along Good Hop School Road. Other details unknown.

**A very unstable air mass developed as early as midday across the central Tennessee Valley. Scattered strong to severe thunderstorms developed by late morning producing very heavy rainfall that resulted in isolated flash flooding in northeast Madison County. A few of these initial storms produced small hail. As instability increased during the mid to late afternoon, more numerous thunderstorms developed. Outflow boundary collisions triggered rapid development of new storms which became severe rather quickly in a few instances. A few reports of large hail and damaging winds were received into the mid evening hours. Isolated flash flooding occurred again in northeastern Madison County and in the town of Bridgeport in Jackson County where water depth climbed up to two feet. One person was struck by lightning in the town of Fairview in Cullman County. Additional thunderstorms moved northwest out of Georgia during the late evening hours producing additional rainfall, but diminished rather quickly after midnight.**

### LAUDERDALE COUNTY --- 0.7 S KILLEN [34.86, -87.53]

Flash flooding produced high water which surrounded a trailer along County Road 320. Two dogs drowned in the flood water.

**A warm and unstable atmosphere existed during the afternoon hours leading to clusters of strong to severe thunderstorms. These storms developed in northwest and north central Alabama and slowly tracked southeast producing local, but very heavy rainfall of 3 to 4 inches in a one to two hour period. The resulting rapid runoff produced flash flooding in portions of Lawrence and Morgan counties, including the cities of Caddo and Decatur. A couple of these storms also produced isolated wind damage.**

### ALABAMA, Southwest

**CHOCTAW COUNTY --- 3.0 NW BUTLER [32.11, -88.26]**
