Runoff from five to six inches of rainfall, with locally 8 inches in some locations, caused significant flooding in northeastern Dekalb county. Hardest hit areas were near Mentone and near the GA/AL state line. At 12:12 pm CDT, Big Wills Drive remained barricaded due to several inches of water flowing over the road and CR 635 southeast of Mentone remained flooded.				
A very tropical airmass with dewpoints in the lower 70s interacted with a warm front and a strong low level jet to produce strong thunderstorms with very heavy rainfall. This resulted in flooding rainfall in extreme northeastern Alabama. Big Wills Creek, which is located 5 miles north of Fort Payne, was pushed out of its banks, forcing Big Wills Drive to be closed.				
In addition, the town hall and fire department buildings were damaged by water flowing through portions of the buildings. Several roads, including CR 635 southeast of Mentone, were reported washed out in the Mentone area.
