	05/04/10 11:00 CST		0	Source: Emergency Manager

Between 2 and 4 inches of rainfall combined with 8 inches of rainfall the previous day upstream in Lawrenceburg (Tennessee), caused Shoal Creek to rise above it's banks on Sunday evening, May 2. This resulted in flooded homes near the river as the night progressed. This flooding continued and became worse through the early morning hours on Monday. The creek crested at a record 23.12 feet, before gradually receding.

Locations at and near the Bluff View Shores and Hidden Valley community were particularly hard hit from flood waters from Shoal Creek. The force of the flowing water broke several docks with numerous boats still attached to their slips free from there cables at the Emerald Beach Marina in Killen. They were taken downstream in the powerful currents to the old twin bridges on Highway 72, just north of the entrance to the Tennessee River. The docks making up the marina (total of 16 - 5K each) were unusable after cleanup and one boat along with it's contents valued at about 42,000 dollars was destroyed. Emergency response costs to remove the docks, boats, and other debris from the bridge was estimated at 31,000 dollars. In Addition, costs of contractors to assist emergency response crews totaled 434,500 dollars.

In addition, the powerful flood current broke a work barge from it's moorings and sent it downstream. It struck Happy Hollow bridge on CR 47 sometime after midnight on Monday. The barge scraped the bottom of the bridge as it passed underneath and later came to rest further downstream upon the old twin bridges on Highway 72 as well. This forced workers to close the structure for more than five hours until engineers could inspect the damage. Only minor damage was found and the bridge was reopened before noon.

Approximately a 50 foot section of Old Mount Carmel road in the Stevenson community was closed due to flooding.				
<b>A slow moving frontal boundary pushed into a moist and unstable air mass during the afternoon hours on the 2nd. This produced numerous showers and thunderstorms resulting in 2 to 5 inch rainfall accumulations through 2 or 3 in the morning on the 3rd across northern Alabama.</b>				
<b>Northwestern Alabama was hit the hardest, enduring a second round of flash flooding since the afternoon of May 1st. As a result of this rainfall and runoff from heavy rainfall further north, local streams and creeks added to flooding concerns through May the 3rd. In fact Shoal Creek in Lauderdale county reached a record flood stage of 23.12 feet around 2 am on May 3rd as a result of the heavy rainfall and additional runoff upstream. Numerous other rivers and streams rose above flood stage including: Big Will's Creek in northeast AL, Indian Creek in Madison County, and the Tennessee River at Florence.</b>				
<b>LAUDERDALE COUNTY --- 0.9 NW ST FLORIAN [34.88, -87.63]</b>

05/24/10 19:00 CST			0	Hail (0.88 in)
05/24/10 19:05 CST			0	Source: Public

Nickel sized hail was reported at a local gas station.

**CULLMAN COUNTY --- 1.1 NNW CULLMAN [34.20, -86.83]**

05/24/10 19:01 CST			2K	Thunderstorm Wind (EG 52 kt)
05/24/10 19:06 CST			0	Source: Public

Trees were blown down near Eva Road and Forrest Avenue.

**CULLMAN COUNTY --- 1.1 NE GOOD HOPE [34.11, -86.86]**

05/24/10 19:06 CST			0.20K	Thunderstorm Wind (EG 43 kt)
05/24/10 19:11 CST			0	Source: Law Enforcement

Four tree limbs were blown down onto roadways in Good Hope.

**Thunderstorms erupted across northwest Alabama during the mid afternoon hours in an unstable environment with weak wind shear. Additional activity developed during the early evening hours in northeast Alabama which propagated south-southwest through north central Alabama. Some of the storms produced localized damaging winds and up to quarter sized hail. Local flash flooding also occurred in the community of Cherokee in Colbert County, where over 2 inches of rain fell within 30 to 45 minutes.**
