

Storm Data and Unusual Weather Phenomena - June 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ALABAMA, Central

(AL-Z029) RANDOLPH, (AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z042) LOWNDES, (AL-Z043) ELMORE, (AL-Z044) MONTGOMERY, (AL-Z045) MACON, (AL-Z046) BULLOCK, (AL-Z047) LEE, (AL-Z048) RUSSELL, (AL-Z049) PIKE, (AL-Z050) BARBOUR

06/01/11 00:00 CST	0	Drought
06/30/11 23:59 CST	0	

The dry and hot weather pattern that prevailed in late May continued into early June. This caused the drought conditions to intensify. Barbour, Tallapoosa, Chambers, Macon, Lee, Lowndes, Montgomery, Pike, Bullock, Elmore, Russell and Randolph Counties remained at or above Severe Drought (D2) conditions the entire month. Bullock, Macon and Lee Counties were upgraded to Extreme Drought (D3) on the 7th. Barbour and Russell Counties were upgraded to Exceptional Drought (D4) on the 14th. June rainfall was better than May but only provided temporary relief. Southeast sections received rain amounts ranging from around 1 inch to just over 4 inches in a few places.

TUSCALOOSA COUNTY --- 0.6 E TAYLORVILLE [33.15, -87.54]

06/02/11 16:35 CST	0	Hail (0.88 in)
06/02/11 16:35 CST	0	Source: Emergency Manager

TUSCALOOSA COUNTY --- 1.4 WSW TAYLORVILLE [33.14, -87.57]

06/02/11 16:35 CST	1K	Thunderstorm Wind (EG 35 kt)
06/02/11 16:35 CST	0	Source: Emergency Manager

Two small trees were blown down, one of which fell onto a power line.

FAYETTE COUNTY --- 0.5 NE ROSSLAND CITY [33.69, -87.76]

06/05/11 15:00 CST	1K	Thunderstorm Wind (EG 50 kt)
06/05/11 15:00 CST	0	Source: Emergency Manager

A few trees were blown down near the intersection of AL-18 and CR-81, near Fayette.

TUSCALOOSA COUNTY --- 3.5 N SAMANTHA [33.47, -87.63]

06/05/11 15:47 CST	0	Hail (1.25 in)
06/05/11 15:47 CST	0	Source: Public

TALLAPOOSA COUNTY --- 1.5 SSW BARNESVILLE [32.68, -85.81]

06/05/11 17:45 CST	0	Hail (1.50 in)
06/05/11 17:45 CST	0	Source: State Official

A warm and unstable air mass, and weak stationary front just to Alabama's north, caused several days of isolated to scattered showers and thunderstorms. A few of these storms produced large hail and strong winds.

(AL-Z028) CLAY, (AL-Z036) COOSA, (AL-Z040) DALLAS

06/07/11 00:00 CST	0	Drought
06/30/11 23:59 CST	0	

The hot and dry conditions that ended May continued into early June. The drought conditions were expanded north and west. Severe Drought (D2) conditions now include Dallas, Coosa and Clay Counties.

CHEROKEE COUNTY --- 0.7 N BOMAR [34.11, -85.58]

06/09/11 18:23 CST	0	Hail (0.88 in)
06/09/11 18:23 CST	0	Source: Trained Spotter

DALLAS COUNTY --- 6.9 ENE SUMMERFIELD [32.56, -86.94]

06/10/11 13:35 CST	0	Hail (1.00 in)
06/10/11 13:35 CST	0	Source: Emergency Manager

SHELBY COUNTY --- 1.4 N ARGYLE [33.35, -86.63]

06/10/11 14:01 CST	0	Hail (1.75 in)
06/10/11 14:01 CST	0	Source: Public

Golf ball sized hail covered the ground.

	06/16/11 19:42 CST		0	Source: Public
Large tree had top broken off by winds.				
Scattered severe thunderstorms developed during the early afternoon hours as an upper level disturbance interacted with a very unstable atmosphere. The storms initially produced several reports of large hail during the afternoon across northeast Alabama. Later in the afternoon and early evening, the storms became damaging wind producers with sporadic hail. One well defined bow echo produced widespread wind damage in northwest Alabama. A 59 mph wind gust was measured at the northwest Alabama regional airport in Muscle Shoals (MSL). The large gust front spanning from southern Tennessee through northwest Alabama swept across most of northern Alabama, spawning new strong storms further east. The gust front produced 40 to 50 mph winds, also causing sporadic damage in north central and northeast Alabama. One person was struck by lightning in Limestone County, but the extent of their injury was unknown.				
CULLMAN COUNTY --- 1.8 NE NORTH VINEMONT [34.30, -86.83]

Trees were blown down at the 1700 block of CR 89.				

Storm Data and Unusual Weather Phenomena - June 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A severe mesoscale convective system (MCS) that originated in central Kansas on the 17th progressed east and southeast into the Tennessee Valley during the afternoon of the 18th. Several small scale bow echoes produced the strongest wind damage, while a larger scale gust front produced widespread sub-severe winds of 30 to 50 mph. These winds still knocked large tree limbs and small trees down. Power was knocked out for about 12,000 utility customers in Madison County. Heavier damage occurred in northern Jackson County where numerous trees and power line were knocked down.

LIMESTONE COUNTY --- FRENCH MILL [34.77, -86.88]

06/21/11 10:36 CST			0.50K	Lightning
06/21/11 10:36 CST			0	Source: Emergency Manager

A home was struck by lightning on Menese road. Home did not catch fire.

JACKSON COUNTY --- 0.7 N MONTAGUE [34.98, -85.80]

06/21/11 13:43 CST			12K	Thunderstorm Wind (EG 60 kt)

Lightning struck the Cullman county EMA building and destroyed some pieces of equipment.				
MARSHALL COUNTY --- 1.5 NNE LAKEVIEW [34.35, -86.32]				
	06/24/11 15:40 CST		0	Hail (0.88 in)
	06/24/11 15:40 CST		0	Source: Emergency Manager
Nickel size hail was reported.				
<p>Numerous thunderstorms erupted during the early afternoon hours along a weak cool front and with the passage of an upper level disturbance in northwest flow aloft. The airmass became very unstable with dew points in the lower 70s. The storms produced sporadic hail and winds of 50 to 60 mph with a couple of the stronger bowing line segments. A stronger wind likely produced more significant damage in the city of Decatur where a roof was torn off a restaurant.</p>

	06/26/11 14:23 CST		0	Source: Emergency Manager
Small tree limbs were knocked down.				
<p>A long-lived mesoscale convective system which originated in the lower Missouri Valley during the early morning of the 26th, tracked south-southeast into the Tennessee Valley during the afternoon hours. The storms fed upon a moist and unstable airmass across the region. An earlier outflow boundary also had pushed into the area during the morning, serving as a secondary focus mechanism for additional thunderstorms and storm mergers. A gust front emerged from the storms during the afternoon, producing widespread gusty winds of 30 to 50 mph, with winds exceeding 60 mph in many locations, resulting in numerous reports of wind damage. Numerous trees were knocked down onto power lines, resulting in loss of power, especially across Franklin and Cullman Counties. In Cullman County, widespread wind damage was reported, with trees down across many locations. In addition, a barn was destroyed and blown onto an adjacent roadway, and a couple of metal porch rooftops were torn off.</p>				
LAUDERDALE COUNTY --- 0.9 SE ARKDELL [34.96, -87.41]

LAUDERDALE COUNTY --- 2.4 NNE GRAVELLY SPGS [34.91, -87.88]

	06/28/11 10:50 CST		0	Heavy Rain
	06/28/11 10:50 CST		0	Source: CoCoRaHS

Rainfall of 4.65 inches was reported in four hours at a location 6.6 miles west southwest of Cloverdale.

A quasi-linear convective system dropped south from Tennessee into northern Alabama just after sunrise. The storms dumped very heavy rainfall in far northwest Alabama as a secondary system moved east and merged with the southward moving system. This enabled some areas to receive rainfall amounts of 3 to 5 inches in portions of Lauderdale and Colbert Counties. Flash flooding resulted at many notorious low water crossings and poor drainage locations in urban areas of the Quad Cities. In addition, the lines of storms produced damaging winds of 50 to 60 mph.

ALABAMA, Southeast

(AL-Z065) COFFEE, (AL-Z066) DALE, (AL-Z067) HENRY, (AL-Z068) GENEVA, (AL-Z069) HOUSTON

	06/01/11 00:00 EST		0	Drought
	06/30/11 23:59 EST		0	

Extreme drought conditions (D3) worsened to exceptional drought conditions (D4) in portions of Henry and Houston counties on June 7th and continued into July. Dale and Geneva counties worsened from extreme drought to exceptional drought conditions on June 21st. Coffee county remained in extreme drought conditions through the entire month.
