

Storm Data and Unusual Weather Phenomena - March 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ALABAMA, Central

(AL-Z028) CLAY, (AL-Z029) RANDOLPH, (AL-Z036) COOSA, (AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z042) LOWNDES, (AL-Z043) ELMORE, (AL-Z044) MONTGOMERY, (AL-Z045) MACON, (AL-Z046) BULLOCK, (AL-Z047) LEE, (AL-Z048) RUSSELL

03/01/11 00:00 CST	0	Drought
03/31/11 23:59 CST	0	

Below normal precipitation during the month of February brought no relief to the drought conditions across portions of east central Alabama. Although 3-6 inches of rain fell, there were no significant changes in drought conditions. Severe drought (D2) conditions persisted to the right of a line from Blue Springs State Park to Comer to Fort Davis to Mt Carmel to Gordonville to Prattville to Hollins to Clairmont Springs to Needmore to Graham, through the month of March.

(AL-Z041) AUTAUGA

03/01/11 00:00 CST	0	Drought
03/14/11 23:59 CST	0	

Several storm systems brought rainfall to the area through the first half of the month, improving local drought conditions. Autauga county was removed from severe drought (D2) on March 15, with abnormally dry and moderate drought (D1) conditions continuing through the end of March.

(AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z043) ELMORE, (AL-Z045) MACON, (AL-Z047) LEE

03/01/11 00:00 CST	0	Drought
03/31/11 23:59 CST	0	

Below normal rainfall continued across portions of central Alabama during the latter half of February caused drought conditions to worsen. Extreme drought (D3) conditions began for portions of Tallapoosa, Chambers, Lee, Macon, and Elmore Counties. Although, several systems brought rainfall to the area through March, portions of these counties remained in Extreme Drought (D3) through the entire month.

(AL-Z028) CLAY, (AL-Z029) RANDOLPH

03/01/11 00:00 CST	0	Drought
03/14/11 23:59 CST	0	

Dry conditions during the latter part of February led to a strengthening of drought conditions in extreme southern portions of Clay and Randolph counties, where conditions worsened to extreme (D3) the beginning of March. Several storm systems brought rainfall to the area through the first half of the month, improving local drought conditions. Clay and Randolph counties were removed from extreme drought (D3) on March 15, with severe drought (D2) conditions continuing across the extreme southern portion of these counties through the end of March.

PERRY COUNTY --- 0.5 E UNIONTOWN [32.45, -87.51]

03/09/11 02:55 CST	10K	Thunderstorm Wind (EG 75 kt)
03/09/11 02:55 CST	0	Source: NWS Storm Survey

Scattered trees and powerlines were downed in Uniontown.

Numerous trees and powerlines were downed.				
TALLADEGA COUNTY --- 2.1 SE KYMULGA [33.31, -86.28], 2.2 SE KYMULGA [33.30, -86.28], 2.2 SSE KYMULGA [33.30, -86.28], 2.1 SSE KYMULGA [33.30, -86.28]				
	03/09/11 11:45 CST		25K	Flood (due to Heavy Rain)
	03/10/11 20:30 CST		0	Source: Emergency Manager
What began as flash flooding, resulted in long term flooding across a part of Talladega County during the morning of May 9th. Several Roads were closed in the southern part of the County, with the hardest hit areas being Childersburg and Alpine. In addition to flowing water covering roadways, several mobile homes and wood frame homes had 3 to 5 feet of flowing water as well. Two roads were closed the following day.				
A line of thunderstorms moved through the state of Alabama on the morning of March 9th. Along with heavy rainfall that caused flash flooding in areas, these storms produced strong winds causing tree and structure damage.

AUTAUGA COUNTY --- 0.5 ENE HAYNES [32.63, -86.69], 0.1 SSE VIDA [32.62, -86.68]				
	03/26/11 13:57 CST		55K	Thunderstorm Wind (EG 87 kt)
	03/26/11 13:59 CST		0	Source: NWS Storm Survey
Straight line winds estimated at 100 mph caused damage to the Vida community. The area of damage was approximately 1.5 miles long and 3 miles wide. Hundreds of softwood trees were snapped or uprooted. Several hardwoods were uprooted. Three vehicles were destroyed when trees fell on them. A mobile home was rolled 40 ft, demolishing all walls, but leaving the floor intact. Several other homes sustained shingle damage and an open pavilion was destroyed.				
<hr/>				
CHILTON COUNTY --- 1.9 SSW VERBENA [32.73, -86.54]				
	03/26/11 14:00 CST		30K	Heavy Rain
	03/26/11 14:00 CST		0	Source: Newspaper
Heavy rain reduced visibility and caused slick roadways along Interstate 65 near the Chilton and Autauga county line. As traffic moved slowly due to the thunderstorm and high volume of spring break travelers, a vehicle traveling south hydroplaned and crossed the median, hitting northbound traffic. The accident resulted in 5 fatalities (indirect) and at least 4 injuries (indirect). In addition, three vehicles were destroyed.

	03/26/11 15:10 CST		18K	Tornado (EF1, L: 0.19 mi, W: 50 yd)
	03/26/11 15:11 CST		0	Source: NWS Storm Survey

A brief EF1 tornado with winds of 90 mph touched down just south of the intersection of County Road 10 and Homeland Way in the Aldrich community, approximately 3 miles northwest of Montevallo. Ten to twenty trees were either snapped or uprooted along the short, 0.19 mile track. In addition, one fourth of an outbuilding's metal roof was peeled off and tossed 50 yards.

Storm Data and Unusual Weather Phenomena - March 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A stalled boundary sagged southward into North Central Alabama on Saturday, March 26, and became a focus for convection ahead of an approaching storm system. Through the day, as the air mass south of the boundary became increasingly unstable, thunderstorms developed across much of the area. This activity continued into the overnight hours. With the approach of a surface low and cold front, activity reintensified early Sunday morning, March 27, and continued through the pre-dawn hours on Monday as the cold front slowly moved through the area.

LAMAR COUNTY --- 6.2 NW FERNBANK [33.61, -88.21]

03/29/11 21:23 CST		0	Hail (1.00 in)	
03/29/11 21:23 CST		0	Source: Emergency Manager	

A surface low developed in Texas and moved into the northern Gulf of Mexico Tuesday evening, March 29th. Stable easterly flow across much of Central Alabama prevented a warm front from lifting northward and limited instability across the area. As the surface low tracked across the far southeastern portion of the forecast area, moderate rainfall fell across most of the area through Wednesday afternoon, March 30th. The lack of instability resulted in only an isolated severe threat from this storm system.

ALABAMA, North

Several county roads, mainly at low water crossings, remained closed for a long period following heavy rainfall.				
<p>Rain and thunderstorms came in multiple waves beginning during the afternoon and evening of the 8th and lasting into the 9th north of a warm front. A large amount of Gulf of Mexico moisture was drawn northward on a low level jet stream. Eventually, the warm sector made it's way further north before a cold front passed through during the afternoon of the 9th. Rainfall totals ranged from 1 to 3 inches across most of north Alabama. Amounts of 3.5 to 4.5 inches were observed across portions of Cullman, Lawrence, Madison, Morgan, Marshall, Jackson and DeKalb counties. Non-thunderstorm winds produced damage during the late morning of the 9th in DeKalb county possibly due to a gravity wave or wake low system.</p>

	03/26/11 20:48 CST		5K	Lightning
	03/26/11 20:48 CST		0	Source: Broadcast Media

Lightning hit a house, which was then on fire. Four people were at home and got out of the house safely.

Several supercell thunderstorms produced heavy rain and some hail during the late afternoon and evening hours. These occurred along and north of a nearly stalled warm front which extended across southern portions of north Alabama into east central Alabama. A few of these storms produced hail and frequent lightning.

LIMESTONE COUNTY --- 0.9 NE HAYS MILL [34.88, -86.97]

Storm Data and Unusual Weather Phenomena - March 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	03/27/11 15:10 CST		0	Hail (2.75 in)
	03/27/11 15:10 CST		0	Source: Law Enforcement

Two outbreaks of large hail-producing supercell thunderstorms occurred over the weekend of March 26-27, 2011. The number of supercells, structure of the storms, and number of reports of large hail received over this two-day event is unprecedented in this forecast area and reminiscent of events that occur out in the plains.

ALABAMA, Southwest

MOBILE COUNTY --- 3.0 SE DELCHAMPS [30.37, -88.11]
