A tree was blown down onto power lines in Carrollton.				
<hr/>				
<b>On Monday, June 4, a decaying mesoscale convective system moved south-southeastward from Tennessee into northern Mississippi and Alabama. As this system weakened with time, it caused isolated wind damage in Pickens and Marion counties.</b>				

## Storm Data and Unusual Weather Phenomena - June 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>ELMORE COUNTY --- 1.9 N SPEIGENER [32.61, -86.34], 1.5 NE SPEIGENER [32.60, -86.33]</b>				
	06/05/12 08:53 CST		0	Thunderstorm Wind (EG 60 kt)
	06/05/12 08:55 CST		0	Source: Emergency Manager
<p>A path of wind damage stretched from just north of Gibbons Rd, east of County Road 19 southeastward to Pruitt Farm Rd, near Gibbons Rd. This path was approximately 1 mile long and 0.5 mile wide. Along the path, numerous trees and power lines were knocked down. Along Pruitt Farm Rd, one tree fell on a mobile home and another home sustained siding damage. Along Willow Oak Drive, siding was blown off a home. A home on Gibbons Rd sustained shingle and siding damage.</p> <p><b>On Tuesday, June 5, an outflow boundary associated with a decaying mesoscale convective system (MCS) moved into southwest central Alabama. This boundary triggered convection across portions of south central Alabama that resulted in isolated wind damage in Elmore county.</b></p>				
<b>BARBOUR COUNTY --- 0.9 NE RICHARDS XRDS [31.74, -85.26]</b>				
	06/10/12 13:12 CST		0	Thunderstorm Wind (EG 50 kt)

Multiple trees were reported down in the Claud and Fleahop Communities.

**JEFFERSON COUNTY --- 0.7 S JOHNS [33.36, -87.12]**

	06/14/12 18:55 CST		0	Hail (1.00 in)
	06/14/12 18:55 CST		0	Source: Public

On Thursday, June 14, isolated thunderstorms initially developed along an inverted surface trough across east central Alabama. This convection pushed westward during the early afternoon, with additional thunderstorms developing on outflow boundaries during the peak heating of the day.

**(AL-Z011) MARION, (AL-Z018) ETOWAH, (AL-Z022) PICKENS, (AL-Z023) TUSCALOOSA, (AL-Z024) JEFFERSON, (AL-Z025) SHELBY, (AL-Z031) GREENE**

	06/22/12 12:00 CST		0	Heat
	06/27/12 18:00 CST		0	

A strong ridge of high pressure centered over the Central Plains and locally dry conditions resulted in unseasonably warm temperatures across Central Alabama. Scattered locations reached at least 100 degrees or a heat index of 105 or greater for several days between June 23 and June 27, before expanding areawide for the end of the month.

**(AL-Z019) CALHOUN, (AL-Z021) CLEBURNE, (AL-Z027) TALLADEGA**

	06/26/12 00:00 CST		0	Drought
	06/30/12 23:59 CST		0	

Although much of central Alabama received above normal rainfall for the first half of June, much of the area did not see any rain for the second half of the month. This led to drought conditions spreading. Beginning on June 26th, drought conditions were observed across Calhoun, Talladega, and Cleburne counties.

**(AL-Z011) MARION, (AL-Z012) LAMAR, (AL-Z013) FAYETTE, (AL-Z014) WINSTON, (AL-Z015) WALKER, (AL-Z017) BLOUNT, (AL-Z019) CALHOUN, (AL-Z020) CHEROKEE, (AL-Z021) CLEBURNE, (AL-Z022) PICKENS, (AL-Z023) TUSCALOOSA, (AL-Z024) JEFFERSON, (AL-Z025) SHELBY, (AL-Z026)**

Direct Fatalities: F67PS, M82PS

A strong ridge of high pressure shifted eastward from the Central Plains to the southeastern Continental United States, bringing with it recording breaking temperatures. Afternoon highs rose to 100 degrees or greater each afternoon. With a moist airmass in place, heat index values reached over 105 degrees in many places. The Tuscaloosa Regional Airport recorded record high temperatures on June 29 and 30; the Anniston Regional Airport recorded a record high temperature on June 30. Two fatalities in Jefferson County resulted from heat stress due to the above normal heat conditions. In addition, 19 illnesses were reported to the Alabama Department of Public Health for this time period. This heat wave extended into the first week of July.

### (AL-Z044) MONTGOMERY

06/30/12 13:00 CST	0	Excessive Heat

<b>HOUSTON COUNTY --- ASHFORD [31.18, -85.23]</b>				
	06/11/12 12:20 CST		3K	Thunderstorm Wind (EG 50 kt)
	06/11/12 12:20 CST		0	Source: County Official
A few trees were blown down around Ashford. Monetary damage was estimated.				
<b>An upper level shortwave moving east across the Gulf coast states encountered an unstable airmass with fairly high delta thetae values favorable for downbursts. Several areas of tree and power line damage occurred. Low level wind shear was also maximized in southeast Alabama, contributing to a rare summer EF1 tornado in Geneva county spawned from a supercell thunderstorm.</b>				
<hr/>
