

Storm Data and Unusual Weather Phenomena - February 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ALABAMA, Central

(AL-Z021) CLEBURNE, (AL-Z028) CLAY, (AL-Z029) RANDOLPH, (AL-Z035) CHILTON, (AL-Z036) COOSA, (AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z041) AUTAUGA, (AL-Z043) ELMORE, (AL-Z044) MONTGOMERY, (AL-Z045) MACON, (AL-Z046) BULLOCK, (AL-Z047) LEE, (AL-Z048) RUSSELL, (AL-Z049) PIKE, (AL-Z050) BARBOUR

02/01/13 00:00 CST	0	Drought
02/26/13 23:59 CST	0	

Although many counties in the southeast portion of Central Alabama began the month in drought conditions, widespread rainfall during the first half of February greatly improved these conditions. Rainfall totals of at least 5 inches fell in a two day period on February 11th and 12th, providing much needed relief to these drought stricken areas. Monthly totals ranging from 10 to 13 inches across this area helped to improve conditions even more and therefore, by the end of February no county in Central Alabama was experiencing drought conditions.

MARENGO COUNTY --- 1.6 ESE ANOPIA [32.26, -87.89]

02/12/13 15:45 CST	0	Heavy Rain
02/12/13 19:45 CST	0	Source: Emergency Manager

Heavy rainfall in a short period of time led to high soil moisture content. This caused a land slide to occur at mile mark 68 on Alabama Highway 69 just south of Lindon. The road had to be closed due to the pavement caving in. Additionally, County Road 11 in Myrtlewood had to be closed due to minor street flooding below 6 inches.

A surface front moved southward across Central Alabama on February 11th before stalling to our south. This front lifted slightly northward as a warm front and remained in place for several days. Meanwhile, upper level impulses moved across the state, helping to aid in thunderstorm develop. This setup led to a two day period of heavy rainfall, with rainfall totals of 2 to 5 inches across much of the area. While the rainfall fell over the course of several days and no flash flooding occurred, a couple of locations in Marengo County experience problems due to the heavy rain.

ALABAMA, North

(AL-Z001) LAUDERDALE

02/02/13 06:15 CST	0	Sleet
02/02/13 07:28 CST	0	

(AL-Z001) LAUDERDALE, (AL-Z005) LIMESTONE, (AL-Z006) MADISON, (AL-Z009) JACKSON, (AL-Z010) DEKALB

02/02/13 06:50 CST	0	Winter Weather
02/02/13 09:50 CST	0	

A fast moving upper level storm system brought a quick burst of light to moderate snow, sleet and freezing rain to the area. Snowfall amounts ranged from a dusting to a half of an inch. The sleet and freezing rain occurrences produced a light glaze of ice on area roads.

(AL-Z006) MADISON

02/18/13 20:44 CST	5K	Strong Wind (MAX 39 kt)
02/18/13 20:45 CST	0	

Ahead of a cold front, locally windy conditions across north Alabama produced isolated non-thunderstorm wind damage in Madison county, Alabama.

(AL-Z006) MADISON, (AL-Z008) MARSHALL, (AL-Z009) JACKSON, (AL-Z010) DEKALB

02/25/13 22:17 CST	85K	Strong Wind (MAX 43 kt)
02/26/13 07:00 CST	0	

A suspected wake low / gravity wave developed behind a band of rain showers in the midst of strong winds just above. The suspected gravity wave immediately behind this band of rain, produced a brief period of strong winds which resulted in mainly minor damage across portions of north central and northeast Alabama. The winds occurred between 10:30 pm CST on the 25th through 2:00 am CST on the 26th. Measured wind gusts ranging from 41 to 49 mph were reported in Madison and Marshall Counties, but gusts were likely higher around the damage locations.

Storm Data and Unusual Weather Phenomena - February 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Flash flooding transitioned to widespread areal flooding across the county with numerous roads and bridges damaged. Emergency management estimated damage in the county at \$760,000, all due to road damage.				

As a cold front moved south into the region and stalled, a series of upper level disturbances moved through the area with broad southwest flow and moist conditions. As the boundary became oriented parallel to the upper level winds, training bands of convection set up and produced some locally heavy rainfall and flash flooding.

HOUSTON COUNTY --- 0.8 WNW PLEASANT PLAINS [31.31, -85.23], 0.6 W PLEASANT PLAINS [31.30, -85.23], 0.2 NW PLEASANT PLAINS [31.30, -85.22], 0.5 NNW PLEASANT PLAINS [31.31, -85.22]

Multiple road were closed due to flash flood damage. The bulk of the road closures were from near Dothan southeastward through Ashford to Gordon. Some roads include Bruner Pond, Fowler, Womack, Pineview, and Turnpike. Monetary damage was estimated.				
A series of upper level disturbance rotating around a mean longwave trough west of the area brought copious amounts of moisture into the area. The KTAE rawinsonde sounding on the evening of February 22nd measured a PWAT value of 1.77 inches, which was the 2nd highest PWAT observed during the month of February at that location. Rainfall amounts between 4 and 10 inches were observed during the 5 day period between Feb 22-26. This led to areas of flooding.

Storm Data and Unusual Weather Phenomena - February 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>The tornado touched down in a deeply wooded area west of County Road 34 in eastern Washington county. The tornado quickly intensified to EF-1 strength as it crossed County Road 34 damaging the roofs of a few homes and blowing down numerous pine trees. The tornado continued northeast across the Tombigbee river crossing into Clarke County.</p>				
CLARKE COUNTY --- 3.3 SW SALITPA [31.59, -88.06], 2.2 SSW WINN [31.62, -87.93]				
	02/10/13 17:10 CST		30K	Tornado (EF1, L: 7.75 mi , W: 200 yd)
	02/10/13 17:19 CST		0	Source: NWS Storm Survey

The tornado touched down in a deeply wooded area west of County Road 34 in eastern Washington county. The tornado quickly intensified to EF-1 strength as it crossed County Road 34 damaging the roofs of a few homes and blowing down numerous pine trees. The tornado continued northeast across the Tombigbee river crossing into Clarke County where it produced damage on old lock road to 3 wood frame homes (blowing one off of its masonry block foundation)... rolling one single wide mobile home over onto its side...and blowing another single wide mobile home off of its blocks. The tornado continued east across highway 69 snapping several pine trees. The tornado then dissipated in a deeply wooded area east of highway 69 before reaching U.S. Highway 43 north of Jackson. A second brief tornado formed from this same thunderstorm a short distance farther southeast near Highway 43 (see Antioch tornado with this event).

CLARKE COUNTY --- 4.4 ESE WINN [31.62, -87.85], 5.0 ESE WINN [31.63, -87.84]				
	02/10/13 17:26 CST		10K	Tornado (EF1, L: 0.91 mi , W: 80 yd)
	02/10/13 17:27 CST		0	Source: NWS Storm Survey

This very brief tornado touched down just east of U.S. Highway 43 north of Jackson near Camp Maubila Road. In this area the tornado peeled back the roof panels of a metal shed... snapped several pine trees mid trunk. The tornado paralleled highway 43 for its short life...dissipating in a wooded area just east of Highway 43.

CLARKE COUNTY --- COFFEEVILLE [31.75, -88.10]				
	02/10/13 18:00 CST		5K	Hail (1.75 in)
	02/10/13 18:02 CST		0	Source: Public
