	07/14/15 17:00 CST		0	Tornado (EF1, L: 9.12 mi , W: 150 yd)
	07/14/15 17:13 CST		0	Source: NWS Storm Survey
A tornado touched down along the south riverbank of the Tennessee River in Sheffield . The tornado initially produced substantial tree damage along Alabama Avenue along with minor roof and structural damage to several homes . The tornado then moved southeast uprooting or snapping numerous hardwood trees in the residential neighborhoods of Sheffield . Here many homes were damaged by falling trees or flying debris. Several homeowners said they witnessed seeing a funnel cloud approaching from the north. The most substantial damage was noted along Little Rock Avenue where power poles were snapped or pushed over. Many residents were without power due to the storm.				
The tornado narrowed somewhat as it moved southeast toward Tusculmbia . Damage was noted to trees just east of the Helen Keller Hospital complex. Power lines were broken and transmission lines were bent over along Elm Street. A large light tower was completely destroyed at Deshler High School . The tornado continued to produce sporadic damage as it approached Highway 43 rolling over an un-anchored building and producing minor damage at a car dealership. The tornado crossed Highway 72 Alternate with mainly tree damage noted before it apparently lifted along Spring Valley Road .				
LAWRENCE COUNTY --- 1.8 WNW TOWN CREEK [34.69, -87.43], 1.7 SSE WHEELER [34.63, -87.24]				
	07/14/15 17:14 CST		0	Tornado (EF1, L: 11.43 mi , W: 250 yd)
	07/14/15 17:25 CST		0	Source: NWS Storm Survey
A tornado developed along County Road 273 about one mile west of Town Creek downing a telephone pole and several trees . The tornado tracked southeast towards the northwest part of Town Creek removing roof shingles and bending the metal roof off of the Hazelwood High School building . Along Hazelwood Street numerous trees were snapped or uprooted behind the school. The tornado continued southeast towards Factor Street where more snapped and uprooted trees were found. Then, the tornado crossed Highway 101 causing damage to the porch of a residence. Multiple large trees were snapped or uprooted near a bank and a couple of houses along Church and Meredith Streets as the tornado proceeded southeast crossing Highway 20. South of Highway 20, softwood tree tops and hardwood trees were snapped causing damage to a residence near Auburn Street . Additional tree damage was found near the Lawrence County Industrial Air Park and Valley Landing Golf Course where multiple trees were snapped . One large Hardwood tree was uprooted near the Lockheed Martin Facility near Courtland.				
The tornado then proceeded southeast and crossed County Road 150 about one mile south of Courtland resulting in multiple hardwood and softwood trees being snapped. It then proceeded toward Highway 33 where several hardwood and softwood trees were snapped and uprooted. The tornado then moved towards County Road 377 about one and one half miles south of Highway 20 where it lifted after snapping the top of one hardwood tree.

A tornado developed just southeast of Huntsville International Airport and twisted a metal billboard sign . The tornado proceeded southeast into the River Landing Subdivision, causing damage to several homes. A majority of the damage occurred to roofs and fences. This included missing shingles, and some gutters and siding were peeled back. Other damage to small plastic sheds was noted and large portions of fences were destroyed and lofted into surrounding homes. No damage to trees was noted because this was a fairly new subdivision.

A tornado developed along Bethel Road about two miles south of Priceville . The tornado tracked southeast up a ridge into a residential area along Spring Valley Road and Spring Valley Trail. Wind speeds in the tornado ranged from 60 to 80 mph snapping numerous large tree limbs. At least one tall hardwood tree was partially uprooted while another was fully uprooted although it had a rotted base. A large portion of a tree was toppled onto a home along River Valley Trail causing damage to siding, gutters and the rooftop. The tornado then lifted upon reaching Shoal Creek Road.				
MORGAN COUNTY --- 0.7 S DECATUR [34.61, -86.98]

	07/14/15 17:59 CST		0	Tornado (EF1, L: 4.74 mi , W: 300 yd)
	07/14/15 18:04 CST		0	Source: NWS Storm Survey
A tornado touched down along County Road 55 near the intersection of Coyote Hollow Drive. The tornado snapped large limbs and knocked down a moderate sized tree onto a home. The tornado skipped a path southeast along County Road 55 atop Cook Gap Mountain. The most concentrated and intense damage incurred by this tornado was located at residences along and adjacent to the intersection of County Road 55 and Union Hill Church Road. A few large trees and limbs were snapped. A few but very large trees were completely uprooted in this general area . Peak wind speeds are estimated to be 90 to 95 mph in these instances. The tornado then skipped along a path a bit more south-southeast crossing Maddox Road snapping large limbs of trees. The tornado then crossed into Cullman County.

A few trees were uprooted along County Road 323.				
<p>A quasi-linear convective system (QLCS) dropped southward into the Tennessee Valley during the afternoon and evening hours. The airmass was very unstable, and despite low to moderate low to mid level wind shear, multiple swaths of damaging winds occurred. Within these pockets of winds, a few weak and mostly short-lived tornadoes developed. The most concentrated wind and tornado damage occurred in portions of Lauderdale, Colbert, and Lawrence Counties including the Shoals region of Florence, Sheffield, Muscle Shoals, Town Creek and Courtland. Other short-lived tornadoes occurred in Madison, Morgan and Cullman Counties. Unfortunately, one person was killed by a falling tree near West Point in Cullman County.</p>
