Trees were blown down at Dogwood Circle.

Unusually strong upper level winds for summer combined with high instability and steep mid level lapse rates to produce numerous reports of severe weather across the tri-state area. Multiple rounds of severe weather occurred on June 30th, especially across the Florida Panhandle. The city of Tallahassee reported that 160 tons of yard waste was generated from the severe weather, requiring extra work time to remove storm debris.

ALABAMA, Southwest

BALDWIN COUNTY --- 0.7 S FOLEY [30.41, -87.68]				
	06/09/15 09:55 CST		5K	Lightning

Storm Data and Unusual Weather Phenomena - June 2015

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Severe thunderstorm wind gusts downed power lines at the corner of Cody Rd and Cottage Hill Rd.

The combination of an upper level disturbance, weak cold front, and high levels of moisture and instability resulted in the development of a line of thunderstorms that moved northwest to southeast across the area. One of the storms became severe across Mobile County during the afternoon of June 27th.

BUTLER COUNTY --- 0.9 NE GEORGIANA [31.64, -86.74]

06/30/15 11:45 CST	5K	Thunderstorm Wind (EG 52 kt)
06/30/15 11:45 CST	0	Source: Emergency Manager

Severe thunderstorm wind gusts blew down several large trees in Georgiana near Interstate 65.

Numerous thunderstorms developed across inland southwest Alabama and south central Alabama during the late morning and afternoon of June 30. The storms quickly weakened and produced a large outflow boundary that moved south toward coastal Alabama and resulted in numerous sub severe wind gusts of 40 to 50 mph. One severe thunderstorm developed ahead of this outflow and impacted Butler County AL.
