Several trees uprooted and power lines downed along Highway 78 near the intersection of Kapco Drive.

The combination of an upper high over the Southern Plains States and an upper trough along the East Coast produced a northwest upper flow pattern across Alabama from July 19 through July 21. A series of short wave impulses moved around the east side of the upper ridge and into central Alabama, producing scattered afternoon and evening thunderstorms, a few severe.

ALABAMA, North

(AL-Z001) LAUDERDALE, (AL-Z002) COLBERT, (AL-Z003) FRANKLIN, (AL-Z004) LAWRENCE, (AL-Z005) LIMESTONE, (AL-Z006) MADISON, (AL-Z007) MORGAN, (AL-Z008) MARSHALL, (AL-Z009) JACKSON, (AL-Z010) DEKALB

07/01/16 00:00 CST		0	Drought
07/31/16 23:59 CST		0	

The area began the month of July with much of northeast Alabama in Extreme Drought (D3), with much of north central Alabama in Severe Drought (D2). By the middle of the month, some rainfall across the area helped drought conditions across northwest Alabama and slight improvement in northeast Alabama. By the end of the month, conditions deteriorated in the far western edges of northwest Alabama along the Mississippi state line into Severe (D2) to Extreme (D3) Drought. Extreme (D3) was also expanded into portions of north central Alabama.

	07/21/16 20:30 CST		0	Source: Law Enforcement
Cobb Road was reported to have collapsed and was barricaded. Radar estimated that 3-4 inches of rain fell in 1 hour. Damage was estimated.				

Scattered afternoon thunderstorms developed in an environment of high instability favorable for isolated, brief severe storms. On July 21st, two outflow boundaries collided and initiated a large cluster of storms that moved slowly across portions of southern Houston and northwestern Jackson counties, causing flash flooding. Dual-pol radar estimates were as high as 4 inches in 1 hour in some areas.

ALABAMA, Southwest
