Several trees uprooted and power lines downed near Highway 77.				
RUSSELL COUNTY --- 4.4 NW UNLAND [32.47, -85.33], 1.5 E UCHEE [32.35, -85.32], 5.2 SSE CRAWFORD [32.39, -85.13], 1.9 NW CRAWFORD [32.47, -85.20]				
	06/17/18 08:00 CST	0		Flash Flood (due to Heavy Rain)
	06/17/18 11:00 CST	0		Source: Emergency Manager

Severe flooding across the northwest portions of the county. Several roads impassable including Huguley Road, Pitts Road, McCart Road and Herring Road. Radar estimated rainfall amounts near 8 inches.

Storm Data and Unusual Weather Phenomena - June 2018

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
JEFFERSON COUNTY --- 1.8 SE ACIPCO [33.50, -86.80], 1.8 E MAGELLA [33.47, -86.80], 0.9 ENE HOMEWOOD [33.48, -86.75], 1.4 S WOODLAWN JCT [33.51, -86.77]				
	06/17/18 14:30 CST		0	Flash Flood (due to Heavy Rain)
	06/17/18 16:30 CST		0	Source: Fire Department/Rescue
Numerous reports of flooding east of I-65 and along Highway 280. Several vehicles under water with water rescues in the city of Homewood, including Rosedale Drive and portions of Highway 31. Flooding also reported in the English Village and Five Points areas.				
A nearly stationary upper low over Southeast Alabama produced weak steering currents across Central Alabama. An axis of higher precipitable water extended from the upper low northwest into north Alabama. Daytime heating produced the necessary instability for localized flooding and damaging winds.				
TALLAPOOSA COUNTY --- 0.6 WNW DADEVILLE [32.83, -85.76]				
	06/22/18 15:48 CST		0	Thunderstorm Wind (EG 50 kt)
	06/22/18 15:49 CST		0	Source: Emergency Manager
Several trees uprooted in the town of Dadeville.				
CHAMBERS COUNTY --- 0.9 NE MARCOOT [32.96, -85.46]				
	06/22/18 16:00 CST		0	Thunderstorm Wind (EG 50 kt)
	06/22/18 16:10 CST		0	Source: 911 Call Center
Multiple power lines downed across the county.				
ELMORE COUNTY --- 0.7 N DEXTER [32.64, -86.15]				
	06/22/18 16:05 CST		0	Hail (1.00 in)
	06/22/18 16:06 CST		0	Source: Emergency Manager
Large hail reported on Dexter Road.				
WINSTON COUNTY --- 2.7 ESE INMANFIELD [34.24, -87.13], 3.2 SE UPSHAW [34.25, -87.11]				
	06/22/18 17:46 CST		0	Tornado (EF0, L: 1.46 mi , W: 260 yd)
	06/22/18 17:50 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in extreme northeastern Winston County and determined that it was consistent with an EF0 tornado. The tornado began in a wooded area just east of the County Road 80 bridge over Rock Creek. The tornado crossed County Road 80 where a tree was uprooted. County Road 80 criss-crossed the tornado's path a couple times as it moved eastward. Sporadic tree damage occurred with several large branches broken and a few trees uprooted or snapped. The roof was removed from a newer large shed, and tin was peeled back from a couple of old barns. The tornado crossed into Cullman County just south of County Road 1063.				
LAMAR COUNTY --- 1.6 NNE CROSSVILLE [33.75, -87.99]				
	06/23/18 18:32 CST		0	Thunderstorm Wind (EG 50 kt)
	06/23/18 18:33 CST		0	Source: Broadcast Media
Several trees uprooted near the town of Crossville.				
Several Meso-Scale Convective Systems tracked through Central Alabama and produced a wide variety of severe weather.				
JEFFERSON COUNTY --- 1.3 WNW MOUNTAIN BROOK [33.51, -86.77]				
	06/25/18 13:42 CST		0	Thunderstorm Wind (EG 50 kt)
	06/25/18 13:43 CST	1	0	Source: Emergency Manager
Several trees uprooted along Cliff Road in the city limits of Birmingham. One large tree fell on a home, producing significant damage to the home and minor injuries to one occupant.				
SHELBY COUNTY --- 3.0 NNE SAGINAW [33.26, -86.76]

Storm Data and Unusual Weather Phenomena - June 2018

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Numerous trees uprooted and power lines downed in the city of Troy and across Pike County.

MARENGO COUNTY --- SWEET WATER [32.10, -87.87]

06/28/18 22:38 CST	0	Thunderstorm Wind (EG 50 kt)
06/28/18 22:40 CST	0	Source: Law Enforcement

Several trees uprooted in the town of Sweet Water.

A rare Southeast States derecho swept southward through the entire state of Alabama during the afternoon and evening hours of June 28th. This particular event featured a complex of thunderstorms that resulted in wind damage along a track nearly 400 miles long, originating in Central Tennessee and ending along the Gulf Coast. The southward movement of these storms was driven by clockwise flow around a ridge of high pressure centered over the Central United States. In Central Alabama, the storms moved through during peak daytime heating with a very unstable air mass in place. CAPE values of 4,000-5,000 J/kg were common while bulk wind shear values were low due to the proximity of the upper ridge. Steep low-level lapse rates aided in momentum transfer of strong winds aloft to the surface. Wind damage occurred not only with the thunderstorms, but with the outflow as well.

ALABAMA, North

LAUDERDALE COUNTY --- 5.5 N WATERLOO [35.00, -88.07]

A tree was knocked down at the corner of Bridges and Jennings Chapel Roads. Time estimated from radar.				
MADISON COUNTY --- 1.0 NW HARVEST EPPS ARPT [34.88, -86.78], 0.9 WNW SKINEM [34.96, -86.53]				
	06/22/18 11:42 CST		0	Thunderstorm Wind (EG 70 kt)
	06/22/18 12:07 CST		0	Source: NWS Storm Survey
Sporadic twig, limb and Bradford Pear branch debris was seen as the survey team tracked damage from a supercell east-northeast from near Harvest. This was from winds estimated around 40 MPH. On Walt Campbell Road in Hazel Green, several large trees in a line were all snapped facing the same direction with an estimated peak wind speed of 80 mph. A power pole also had to be replaced at this location. This was the worst damage seen on the storm survey but extremely isolated.				
MADISON COUNTY --- 1.1 E HARVEST [34.85, -86.75]

A tree was knocked down onto CR 213.

JACKSON COUNTY --- 0.6 E HIGDON [34.85, -85.62], 1.6 E HIGDON [34.85, -85.60]				
	06/22/18 17:25 CST		0	Tornado (EF0, L: 1.02 mi , W: 25 yd)
	06/22/18 17:27 CST		0	Source: NWS Storm Survey

The tornado touched down just west of AL Highway 71, about 1 mile northeast of Higdon, AL where a tree was snapped off at the top along with other very large branches broken off on the property. It then tracked east and on County Road 292 it uprooted a large tree that fell on a truck and a house. Another small uprooted tree was noted in the area as well. The tornado continued east and as it crossed County Road 269 a small clearing in the trees was noted along with a large tree split at the base. The tornado then continued into far northeast DeKalb County.

DEKALB COUNTY --- 10.0 NNE IDER [34.85, -85.60], 10.2 NNE IDER [34.85, -85.59]				
	06/22/18 17:27 CST		0	Tornado (EF1, L: 0.70 mi , W: 250 yd)
	06/22/18 17:30 CST		0	Source: NWS Storm Survey

After the tornado crossed from Jackson into DeKalb County, a house on County Road 169 had the most damage with three very healthy trees completely snapped off at the exact same height with estimated winds of 990 mph. Other trees on the property were snapped near the base and multiple very large limbs were knocked down. This is where the tornado was at its widest with other snapped trees noted along County Road 169. The last of the damage was found on County Road 817 with a metal roof from a house peeled off and thrown behind the house. A snapped tree was observed as well.

CULLMAN COUNTY --- 4.0 WNW JONES CHAPEL [34.25, -87.11], 2.9 NE JONES CHAPEL [34.25, -87.01]				
	06/22/18 17:50 CST		0	Tornado (EF2, L: 5.56 mi , W: 180 yd)
	06/22/18 18:12 CST	3	0	Source: NWS Storm Survey

As the tornado crossed from Winston into Cullman County, the tornado likely lifted shortly after crossing CR 1069 and producing minor limb damage. The tornado likely touched down again west of the CR 1055 and CR 1082 intersection. Extensive tree damage was observed. Numerous trees were either uprooted or snapped as the tornado tracked through a depression on the north side of CR 1055. Intensity was documented as 90 mph (EF-1) as it approached CR 1082. At this point, the tornado likely lifted again as it moved east of CR 1082 with only minor limb damage observed through Sullivan Creek.

Peak intensity of the tornado was observed along CR 1091, west of CR 1114. A one year old manufactured home was completely destroyed as it broke away from its anchors, causing 3 injuries. The home was perpendicular to the winds, facing due west. It was displaced about 20 yards from its original location. Three of four corner anchor units were ripped from the ground. The fourth remained lodged in ground but the metal strap was ripped from the I-Beam. It is worth noting that the anchors were approximately 2-3 feet into the ground, and were strapped to the I-Beam (from what could be observed). However, given the highly saturated, muddy soil, the anchors were pulled out as the home tipped backwards. Given this potential failure, winds were estimated at 130 mph (EF-2), or slightly above the expected value for a completely destroyed manufactured home. Additionally, near this location, several trees were uprooted. Peak width of approximately 180 yards were also documented in this area.

As the tornado tracked east, another area of downed branches and uprooted trees were noted east of CR 1107. This was the final location of observed damage as the tornado likely lifted and eventually dissipated along CR 1114.

A supercell tracked east along the far northern part of north Alabama near the state line during the early afternoon. This cell produced wall clouds, a couple of funnel clouds, localized wind damage and at least one report of penny sized hail.

Storm Data and Unusual Weather Phenomena - June 2018

<p>Widespread tree damage was observed in the Killingsworth Cove area of eastern Madison county. A swath of trees at least 300 yards wide were snapped, beginning at the top of the hill just west of Smith Lake, down the hillside across Boulder Trail Road, Southard Road, and Killingsworth Cove Road to the shore of the lake. The trees on the hillside were snapped cleanly and almost entirely in the same direction downhill with a few exceptions. Several trees fell on homes along Killingsworth Cove Road. The swath of damage continued across the lake to JB Hawkins Road and Killingsworth Cove Road. The swath of daamge continued across the lake to JB Hawkins Road and Killingsworth Cover, but no further damage was observed or accessible east of this location.</p>

Trees were knocked down onto Highway 33 near the Winston County line.				
<p>A long lived thunderstorm complex that originated in the upper Midwest arrived in north Alabama around midday on the 28th. Widespread wind damage was reported with winds up to 100 mph in some locations as estimated by the damage. Unfortunately, one person suffered critical injuries sustained by a lightning strike in Hampton Cove and died about two weeks later.</p>
