A poultry house was damaged and power lines were downed near the corner of CR 50 and CR 52 in the Peeks Corner community. Time estimated by radar.

---

**DEKALB COUNTY --- 0.3 N PEEKS CORNER [34.40, -85.88], 0.6 ENE PEEKS CORNER [34.40, -85.87]**

05/09/19 12:55 CST			0	Tornado (EF1, L: 0.57 mi , W: 25 yd)
05/09/19 12:57 CST			0	Source: NWS Storm Survey

The first evidence of damage was to a barn near the bend in CR 311. The barn was almost entirely collapsed and several nearby trees just east of here were snapped. The most significant damage was to two poultry houses near the corner of CR 311 and CR 50. Half of one poultry house was collapsed and the roofing of the second was peeled away. However, damage to a mobile home across the street was minimal, except for a bulge in the wall in the home. The only other damage spotted was further east along CR 446 where a shed was completely destroyed and the debris spread over a quarter of a mile.

**A line of thunderstorms moved east across north Alabama and southern middle Tennessee during the late morning and early afternoon hours. The storms picked up intensity along the I-65 corridor and points east. Three tornado tracks were surveyed (2 EF-1 and 1 EF-0) and several wind damage reports were received.**

---

**CULLMAN COUNTY --- 3.1 SE LORETTO [34.04, -86.88]**

05/16/19 14:26 CST			0	Hail (1.00 in)
05/16/19 14:26 CST			0	Source: Emergency Manager

Quarter sized hail was reported.

**An isolated severe thunderstorm developed in Cullman County during peak mid afternoon heating. The thunderstorm produced quarter sized hail.**

Flooding along Government Street from Airport Blvd to the Bankhead tunnel. Some side streets were impassible.

**Slow moving thunderstorms generated very heavy rain across southwest Alabama.**

#### MOBILE COUNTY --- 4.3 W DAUPHIN IS [30.25, -88.19], 2.2 E DAUPHIN IS [30.25, -88.08]

05/12/19 06:46 CST	0	Thunderstorm Wind (EG 70 kt)
05/12/19 06:55 CST	0	Source: NWS Storm Survey

A bow echo associated with a severe squall line of thunderstorms moved across Dauphin Island, AL. A NWS Survey Team found damage consistent with significant straight line winds of 70 to 80 mph along a considerable portion of the Island. Damage consisted of metal roofs torn off of some structures, shingles peeled off of the westward facing roofs of multiple homes, downed pine trees, and road signs that were blown over. Observed damage was all blown in the same direction with no visible evidence of tornadic convergence. The damage started on the west end of Dauphin Island and peaked just to the east of the Elementary School before lessening somewhat along the east end of the Island.

#### BALDWIN COUNTY --- 0.6 E ROBERTSDALE [30.55, -87.71]

05/12/19 07:15 CST	0	Thunderstorm Wind (EG 52 kt)
