<b>PICKENS COUNTY --- 3.8 SSE ETHELSVILLE [33.37, -88.19], 3.3 WSW MELROSE [33.38, -88.17]</b>				
	04/12/20 15:01 CST	0		Tornado (EF0, L: 1.51 mi , W: 200 yd)
	04/12/20 15:03 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in northwest Pickens County and determined that it was consistent with an EF0 tornado, with maximum winds near 75 mph.				
The tornado formed near the intersection of Willie Wright Road and St Johns Road, about three miles south-southeast of Ethelsville. The tornado tracked northeast almost parallel to Willie Wright Road and dissipated near Mount Moriah Jones Road. Several large tree limbs and trees were downed along the path. The tornado affected mostly rural locations.				
<b>PICKENS COUNTY --- GORDO [33.32, -87.90]</b>				
	04/12/20 15:10 CST	0		Thunderstorm Wind (EG 50 kt)
	04/12/20 15:11 CST	0		Source: Public
Several trees uprooted and snapped in the town of Gordo.				
<b>PICKENS COUNTY --- 5.6 ESE PALMETTO [33.46, -87.89], 7.6 ENE PALMETTO [33.53, -87.86]</b>				
	04/12/20 15:18 CST	0		Tornado (EF0, L: 4.80 mi , W: 300 yd)
	04/12/20 15:25 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in northeast Pickens County and determined that it was consistent with an EF0 tornado, with maximum winds near 75 mph.				
The tornado formed along County Road 47 (Bill Hill Church Road) about nine miles northeast of the town of Reform. The tornado tracked northeast, paralleled State Route 159, and crossed into Fayette County along County Road 12. Several trees were snapped and uprooted along the path. The tornado affected mostly rural locations.				

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>FAYETTE COUNTY --- 3.5 W NEWTONVILLE [33.53, -87.86], 3.4 W NEWTONVILLE [33.53, -87.86]</b>				
	04/12/20 15:25 CST		0	Tornado (EF0, L: 0.65 mi , W: 265 yd)
	04/12/20 15:26 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in far southern Fayette County and determined that it was consistent with an EF0 tornado, with maximum winds near 75 mph. This tornado is a continuation from Pickens County and dissipated near County Road 12 shortly after entering Fayette County.				
<b>TUSCALOOSA COUNTY --- 3.6 NW SAMANTHA [33.46, -87.66]</b>				
	04/12/20 15:30 CST		0	Thunderstorm Wind (EG 65 kt)
	04/12/20 15:31 CST		0	Source: Emergency Manager
Several dozen mature hardwood trees uprooted along leading edge of a bow echo.				
<b>FAYETTE COUNTY --- 4.9 NE NEWTONVILLE [33.59, -87.75], 4.8 SSE ROSSLAND CITY [33.61, -87.75]</b>				
	04/12/20 15:34 CST		0	Tornado (EF0, L: 1.79 mi , W: 350 yd)
	04/12/20 15:36 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southern Fayette County and determined that it was consistent with an EF0 tornado, with maximum winds near 80 mph.				
The tornado touched down along County Road 35 southeast of the city of Fayette. The tornado tracked northward along County Road 89, causing minor tree damage consisting of broken branches and uprooted trunks, between Mt. Pleasant/Burrow Road and County Road 35. The tornado affected mostly rural locations.				
<b>TUSCALOOSA COUNTY --- 6.2 SE STERLING [33.49, -87.50]</b>				
	04/12/20 15:40 CST		0	Thunderstorm Wind (EG 65 kt)
	04/12/20 15:41 CST		0	Source: Emergency Manager
Large County Sheriff Communications tower destroyed along leading edge of a bow echo.				
<b>FAYETTE COUNTY --- 1.8 SSE BERRY [33.63, -87.59], 1.6 N ALTA [33.69, -87.53]</b>				
	04/12/20 15:41 CST		0	Tornado (EF1, L: 5.73 mi , W: 600 yd)
	04/12/20 15:48 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southeast Fayette County and determined that it was consistent with an EF1 tornado, with maximum winds near 95 mph.				
A tornado touched down along Christian Road, southeast of the town of Berry. The tornado tracked northeast and crossed County Road 30, County Road 46, and County Road 47. The tornado then crossed into Walker County near Highway 18. Several trees were snapped off or uprooted along the damage path. A few homes suffered shingle loss.				
<b>WALKER COUNTY --- 3.4 W CARONA [33.69, -87.53], 3.1 W CARONA [33.70, -87.52]</b>				
	04/12/20 15:48 CST		0	Tornado (EF1, L: 0.41 mi , W: 320 yd)
	04/12/20 15:49 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southwest Walker County and determined that it was consistent with an EF1 tornado, with maximum winds near 95 mph. This tornado is a continuation from Fayette County and it dissipated shortly after crossing into Walker county. Damage consisted of several large uprooted trees.				
<b>WALKER COUNTY --- 1.1 W PROVIDENCE [33.72, -87.35]</b>				
	04/12/20 15:53 CST		0	Thunderstorm Wind (EG 50 kt)
	04/12/20 15:54 CST		0	Source: Broadcast Media
Several trees uprooted on Oakman Parrish Road.				
<b>JEFFERSON COUNTY --- 5.4 WSW TAYLORS FERRY [33.50, -87.28]</b>				
	04/12/20 15:58 CST		0	Thunderstorm Wind (EG 65 kt)

Tree on house causing significant structural damage. Numerous trees down along the Warrior River near the Jefferson/Walker County line along leading edge of a bow echo.				

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>WALKER COUNTY --- 1.3 S GORGAS [33.63, -87.20], 0.4 ENE BURNWELL [33.70, -87.07]</b>				
	04/12/20 16:04 CST		0	Tornado (EF1, L: 8.98 mi , W: 950 yd)
	04/12/20 16:16 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southeast Walker County and determined that it was consistent with an EF1 tornado, with maximum winds near 110 mph.				
The tornado developed just south of the Gorgas Power Plant along the Mulberry Fork near Copeland Bend. The most focused area of damage occurred along Rainwood Lodge Road where numerous trees were snapped and uprooted, some of which fell on homes. In addition, minor roof damage was observed at several residences along the road. The tornado continued northeastward, uprooting several more trees and breaking branches before crossing Interstate 22. Numerous trees were snapped and uprooted near a convenience store on Sharon Blvd, with one tree falling on a nearby manufactured home just before the tornado dissipated.				
<b>JEFFERSON COUNTY --- 0.6 W PALOS [33.65, -87.06]</b>				
	04/12/20 16:10 CST		0	Thunderstorm Wind (EG 60 kt)
	04/12/20 16:11 CST		0	Source: Public
Numerous trees uprooted and snapped along leading edge of a bow echo.				
<b>WALKER COUNTY --- 0.2 WSW BRYAN [33.70, -87.05], 0.7 NE BRYAN [33.71, -87.04]</b>				
	04/12/20 16:14 CST		0	Tornado (EF1, L: 0.89 mi , W: 925 yd)
	04/12/20 16:15 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in eastern Walker County and determined that it was consistent with an EF1 tornado, with maximum winds near 100 mph.				
The tornado began near Bryan Road at the Walker and Jefferson County line. The tornado tracked northeastward into Jefferson County where numerous trees were snapped off and uprooted along the path.				
<b>JEFFERSON COUNTY --- 1.9 NNW KILGORE [33.71, -87.04], 1.9 SW PARTRIDGE XRDS [33.75, -86.95]</b>				
	04/12/20 16:15 CST		0	Tornado (EF2, L: 6.02 mi , W: 940 yd)
	04/12/20 16:25 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in northern Jefferson County and determined that it was consistent with an EF2 tornado, with maximum winds near 125 mph. This tornado is a continuation from Walker County. Near Highway 78, a metal building was destroyed. One home lost large sections of its roof along the Bankhead Highway. Several other homes suffered varying degrees of damage and many structures had trees land on them. At least a dozen homes were damaged. The tornado ended near Gobblers Knob Road where large branches were broken from a few trees.				
<b>JEFFERSON COUNTY --- 1.5 SSW LINN CROSSING [33.65, -86.98]</b>				
	04/12/20 16:17 CST		0	Thunderstorm Wind (MG 56 kt)
	04/12/20 16:18 CST		0	Source: Storm Chaser
Gust recorded by a UAH mobile mesonet.				
<b>BLOUNT COUNTY --- 2.2 W ADVILLE [33.88, -86.69], 1.7 W ADVILLE [33.88, -86.68]</b>				
	04/12/20 16:44 CST		0	Tornado (EF0, L: 0.47 mi , W: 125 yd)
	04/12/20 16:45 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southern Blount County and determined that it was consistent with an EF0 tornado, with maximum winds near 75 mph.				
A tornado touched down near Whites Creek, generally along Center Springs Road. Numerous trees were snapped and uprooted before the tornado moved east causing minor roof damage to at least two homes, uprooting trees, and destroying a storage shed. The tornado quickly weakened and lifted as it moved over a heavily wooded area just to the east-northeast where remnant debris lied in the tree line. Aerial photos helped establish a clearly identifiable convergent debris pattern.				
<b>BLOUNT COUNTY --- 1.3 NNW ADVILLE [33.90, -86.65], 1.8 E LOCUST FORK [33.90, -86.59]</b>				
	04/12/20 16:47 CST		0	Tornado (EF1, L: 3.84 mi , W: 225 yd)
	04/12/20 16:51 CST		0	Source: NWS Storm Survey

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
National Weather Service meteorologists surveyed damage in Blount County near Locust Fork and determined that it was consistent with an EF1 tornado, with maximum winds near 95 mph.				
A tornado touched down just west of Tawbush Road, generally west-southwest of Locust Fork. After quickly intensifying to peak intensity of 95 mph, a broad corridor of trees were snapped and uprooted near three residences. No damage was observed at these locations outside of fallen limbs and debris. The tornado then tracked east with trees sporadically uprooted and snapped before it crossed a large wooded area just west of Highway 79. The tornado then briefly tracked near Highway 79 snapping and uprooting trees where some fell on at least two homes and one vehicle. Farther east, additional softwood trees were snapped and uprooted along Massey Road. Sporadic, and mostly minor tree damage was also noted along Pine Bluff Road and Spunky Holly Road. The tornado began to weaken as it crossed Highway 15 with mainly large limbs snapped in this area. The eastern-most damage was noted along Hollingsworth Road before the tornado finally dissipated.				
<b>BLOUNT COUNTY --- 1.1 SE TIDWELL [33.94, -86.57], 1.9 E ROSA [33.98, -86.49]</b>				
	04/12/20 16:50 CST	0		Tornado (EF2, L: 5.56 mi , W: 500 yd)
	04/12/20 16:57 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in Blount County, just west of Oneonta, and determined that it was consistent with an EF2 tornado, with maximum winds near 115 mph.				
A tornado touched down near Moss Road and County Road 33. The tornado quickly intensified as it began to snap and uproot various trees near a farm, and also destroyed a farm shed. Numerous trees were uprooted as the tornado crossed Highway 33, before impacting two residences. It was here where the damage survey team found the most significant damage as one residence sustained moderate roof and siding damage, and another was completely swept off its foundation, moving nearly 60 feet to the north. Dozens of trees were also snapped and uprooted on these properties as the tornado tracked parallel to the highway in a northeast direction. The tornado crossed County Road 1 where another corridor of significant tree damage was observed. Just to the north, a shed was overturned and blown to the southeast. From here, the tornado continued northeast where structure damage was observed near Highway 33. Various farm buildings sustained significant damage and at least one residence sustained roof damage (winds estimated at 100 mph). Damage became more sporadic in nature and less severe northeast of this location, though another brief corridor of EF1 damage was observed near the intersection of Shady Lane and US Highway 231, where numerous trees were snapped and uprooted. After crossing Highway 231, the tornado continued northeast and approached Palisades Park before dissipating along Ebell Road.				
<b>BLOUNT COUNTY --- ONEONTA [33.95, -86.47]</b>				
	04/12/20 16:50 CST	0		Hail (1.25 in)

Several reports of water flowing over roadways, including Highway 160 and County Road 49. Highway 11 washed out and impassable.				
<b>BLOUNT COUNTY --- 3.4 E HENDRIX [34.03, -86.39], 3.5 SSE WYNNVILLE [34.03, -86.38]</b>				
	04/12/20 17:04 CST	0		Tornado (EF1, L: 0.78 mi , W: 115 yd)
	04/12/20 17:05 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in northeastern Blount County near Sand Valley and determined that it was consistent with an EF1 tornado, with maximum winds near 90 mph.				
A tornado touched down near the 3600 Block of County Road 42 in northeastern Blount County. Numerous trees were snapped and uprooted before the tornado impacted a farm property where structural damage occurred to at least three farm buildings, as well as a large silo. The tornado then tracked northeastward across an open pasture where additional trees were snapped and uprooted before dissipating in a nearby wooded area.				
<b>ETOWAH COUNTY --- 1.1 E WALNUT GROVE [34.07, -86.28]</b>				
	04/12/20 17:07 CST	0		Hail (1.75 in)

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
National Weather Service meteorologists surveyed damage in Etowah County near Attalla and determined that it was consistent with an EF1 tornado, with maximum winds near 95 mph.				
A tornado touched down southwest of the City of Attalla, generally in a wooded area near Lemon Hollow Road. Damage from this tornado mostly involved softwood trees that were snapped or uprooted while crossing Miller Hollow Road a few times until the tornado approached Highway 77. Here, dozens of trees were snapped or uprooted, as well as minor structural damage to a farm building and a power substation north of Gray Creek Drive. The tornado crossed Highway 77 near Clear Creek and Little Sand Valley where further tree damage was observed. It then crossed US Highway 431 and tracked along the ridgetop along Simmons Lane where trees were snapped and uprooted. Farther northeast, a residence sustained minor roof and porch damage as the circulation center passed overhead, which was evident by convergent fallen trees and debris on the property. The tornado continued northeast where additional tree damage was observed and then dissipated near Wesson Gap Road.				

---

<b>BLOUNT COUNTY --- 3.2 SE SNEAD [34.07, -86.32], 3.3 ESE SNEAD [34.08, -86.32]</b>				
	04/12/20 17:10 CST		0	Tornado (EF0, L: 0.37 mi , W: 100 yd)
	04/12/20 17:11 CST		0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northeast Blount, near the Etowah County line, and determined that it was consistent with an EF0 tornado, with maximum winds near 80 mph.

The tornado first touched down near the Walnut Grove community along the Blount-Etowah County line. Here sporadic tree damage was noted with some large limbs snapped and trees uprooted along Highway 278. The tornado tracked northeast and into Etowah County.

---

<b>ETOWAH COUNTY --- 1.2 WNW WALNUT GROVE [34.08, -86.32], 1.3 SE BOAZ [34.19, -86.15]</b>				
	04/12/20 17:11 CST		0	Tornado (EF2, L: 12.22 mi , W: 350 yd)
	04/12/20 17:21 CST	3	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northwest Etowah County, near the Blount County line, and determined that it was consistent with an EF2 tornado, with maximum winds near 115 mph.

This tornado is a continuation from Blount County. It tracked northeast along the ridgeline in northern Etowah County. Sporadic tree damage was noted along Cove Spring Road and Cove Road. The tornado began to strengthen as it moved northeast toward the southern portions of the city of Boaz. Several homes were damaged in this area some from falling trees. At least one home near the intersection of Highway 179 and Glover Road sustained significant structural damage. A large industrial building in this area also sustained significant damage. At this point, the tornado reached its maximum intensity of 115 mph with a width of approximately 350 yards. The tornado continued to track northeast through Boaz with homes and structures damaged along Pleasant Hill Road and Highway 205. Significant tree damage with uprooted and snapped trees were noted in this area. The tornado continued to track northeast and into Marshall County.

---

<b>ETOWAH COUNTY --- 1.4 NW ALABAMA CITY [34.04, -86.07], 1.9 NNW TABOR [34.18, -85.93]</b>				
	04/12/20 17:14 CST		0	Tornado (EF2, L: 12.19 mi , W: 875 yd)
	04/12/20 17:28 CST		0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in Etowah County, near Attalla, and determined that it was consistent with an EF2 tornado, with maximum winds near 115 mph.

A tornado touched down near Oak Hill Cemetery on the north side of Attalla along Highway 11. Here, several large trees were uprooted. The tornado tracked northeast almost paralleling Highway 11. Many homes suffered extensive structural damage due to toppled trees. Numerous power poles were also snapped along its track from Attalla to Reece City. The tornado widened and strengthened as it moved into Reece City with a wide swath of hardwood trees snapped and uprooted along both sides of Highway 11 near Bethany Baptist Church and Clifford Drive. Here the tornado reached its maximum intensity of 115 mph. The tornado maintained intensity as it crossed Highway 211 and with damage as far east as Interstate 59 and Highway 11. A barn was also significantly damaged at this location. The tornado finally began to weaken as it tracked northeast with sporadic snapped and uprooted trees noted for the next couple of miles. The tornado lifted just south of Wallace Drive.

National Weather Service meteorologists surveyed damage in Walker County, near Carbon Hill, and determined that it was consistent with an EF1 tornado, with maximum winds near 110 mph.				
A short-lived but intense tornado touched down near Nubbin Ridge Road in far northwestern Walker County. At this location, several trees were snapped and uprooted. As the tornado tracked into the town of Carbon Hill, dozens of trees were uprooted or snapped off throughout the town. Various residential and professional buildings sustained structural damage, including sections of roofing blown off of a site-built home as estimated winds peaked at 110 mph. The area of greatest structural damage occurred along Nauvoo Lane where at least 5 manufactured homes and outbuildings were either rolled and completely destroyed, shifted from block piers, or suffered substantial loss of roof and walls. The tornado continued towards Nauvoo Court and snapped off a few large branches before ending just south of Interstate 22.

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
National Weather Service meteorologists surveyed damage in Tuscaloosa County, north of Holt, and determined that it was consistent with an EF1 tornado, with maximum winds near 100 mph.				

A tornado began on the eastern banks of Lake Tuscaloosa, inside the Northriver Yacht Club community. Trees were snapped and uprooted, with some residences sustaining relatively minor roof damage. The tornado tracked northeastward and crossed the Black Warrior River, uprooting and snapping hundreds of trees along its path. The tornado ended just before the Whiteoak Creek Branch of the Black Warrior River, just before the Jefferson County line.

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Several trees uprooted and power lines downed in Phenix City and across Russell County.

**BARBOUR COUNTY --- 1.8 NW EUFAULA [31.90, -85.17]**

04/13/20 00:23 CST	0	Thunderstorm Wind (EG 50 kt)
04/13/20 00:24 CST	0	Source: Emergency Manager

Several trees uprooted along Fox Ridge Road near the Eufaula Country Club.

An upper-level low over the southwest United States evolved into a negatively-tilted shortwave trough as it moved over the southeastern United States. A warm front steadily moved northward during the morning and afternoon hours on Sunday, April 12. This allowed an unstable air mass to move northward and overspread much of the region. At the same time, very strong wind shear developed over Alabama as the upper trough neared the state.

An initial wave of severe storms affected areas near and north of Interstate 20, involving tornadoes, damaging straight-line winds, and some hail. Through the evening, a second wave of thunderstorms affected the remaining areas of Central Alabama with tornadoes and damaging straight-line winds. Flooding also resulted from training rainfall near and north of Interstate 20. Some roads became impassible or were washed out. This weather event was large in scope and produced severe weather from Oklahoma and Texas, through the southeastern United States, then up the east coast to New York.

**CHILTON COUNTY --- THORSBY [32.92, -86.72], 1.7 SSE CLANTON WARE IS ARPT [32.93, -86.51]**

04/19/20 05:18 CST	0	Thunderstorm Wind (EG 70 kt)
04/19/20 05:35 CST	0	Source: NWS Storm Survey

The core of a potent thunderstorm quickly intensified in the vicinity of Interstate 65 in Chilton County during the early-morning hours. Significant straight-line winds developed along a bow echo as the strong winds aloft breached the low-level stable layer. Extensive wind damage, consisting of numerous uprooted and snapped trees, began in Chilton County just west of Thorsby and continued eastward to the Coosa County line.

**COOSA COUNTY --- 6.4 NW LAKE MITCHELL [32.93, -86.51], 6.3 SSE KELLYTON [32.89, -86.01]**

Several trees uprooted along County Road 163.				
<p><b>Two waves of severe weather occurred on April 23rd, one during the early morning hours and another in the afternoon. The first event was characterized by a stable low level air mass, with strong shear and moderate instability aloft. A wake low or gravity wave developed within or near the back edge of a rain shield, and produced wind damage. Clearing across west Alabama allowed for destabilization of the air mass and a line of severe storms developed across southwest Alabama.</b></p>

	04/12/20 17:25 CST		0	Source: NWS Storm Survey
The tornado continued from Etowah County west of Highway 431, south of Denson Avenue. It quickly intensified to its peak strength as it crossed Highway 431 and plowed through a neighborhood north of Roden Road. Nearly every single home (dozens) in this neighborhood experienced some degree of damage. The most intense damage was noted from two separate single family homes. The first home, with the most devastating damage, was completely destroyed and was mostly taken off its foundation with only two small interior rooms remaining, where the residents took shelter. It was noted however that the anchorage system for the home appeared to be non-existent with no bolts observed to the foundation crawl space piers. The second heavily damaged home on Lee Avenue, experienced a collapse of exterior walls, likely occurring after the roof was taken off. The tornado continued on an east to northeast track across and along Bethsaida Road causing numerous trees to snapped or be uprooted. Several houses appeared to have had shingle roof damage. The tornado continued into DeKalb County.

The tornado touched down one-half mile to the west of Shiloh Community Church, damaging a barn. The tornado moved eastward along County Road 814 approaching the community of Shiloh. The greatest structural damage occurred at the church, with large sections of roof being damaged, and the walkway covering being removed from the church. At this point the tornado was at its widest. The tornado continued moving to the east toward the Alabama/Georgia state line. Along the path, relatively minor damage occurred to several mobile homes, peeling back metal from the roofs, and snapping both hardwood and softwood trees. The tornado further strengthened and became larger in size after it crossed into Dade County Georgia.

----------	-----------	-------------------	---------------------	------------------------

Flash flooding occurring at a chicken farm on Sulphur Springs Road where a fire was being responded to. Depth of water unknown.

Heavy rainfall occurred across the entire NWS Huntsville County Warning area, as well as damage from thunderstorm winds and a few tornadoes.

While heavy rainfall reports were spread out across the CWFA, the most significant flash flooding occurred in Fort Payne and surrounding areas in Northeast Alabama.

Intense rainfall of 6-6.5 inches fell in DeKalb County along Big Wills Creek.

A new Flood of Record crest of 17.94 feet occurred, surpassing the old Flood of Record (14.36) by a whopping 3.5 feet! More than 50 roads were shut down, with extensive flooding that occurred on Hwy 35 leading up to the Hwy 35/1459 interchange.

*Public Park on AL Hwy 117 in Valley Head inundated by rushing water from flash flooding*

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/23/20 05:00 CST		2.50K	Strong Wind (MAX 43 kt)
	04/23/20 07:00 CST		0	

**(AL-Z008) MARSHALL**

04/23/20 05:00 CST	0.50K	High Wind (MAX 52 kt)
04/23/20 07:00 CST	0	

A 'wake low' pressure area developed at the back end of rainfall that had moved east through north Alabama and southern middle Tennessee during the evening hours. This wave increased winds from near calm to over 40 mph between Midnight LST and 2 AM LST, but no damage reports were received. Another "wake low" occurred between 5 and 7 AM LST in north central into northeast Alabama. This also resulted in a similar increase in winds with gusts of 40 mph or higher. The second event resulted in several trees being knocked down or uprooted, some onto power lines, across portions of north central and northeast Alabama. It is possible that the combination of both wind events could have resulted in the number of reports received after the second wave of gusty winds.

**DEKALB COUNTY --- LATHAMVILLE [34.27, -86.03]**

04/29/20 13:30 CST	0	Thunderstorm Wind (EG 52 kt)
04/29/20 13:30 CST	0	Source: Broadcast Media

Several trees were knocked down and a trampoline was displaced in Lathamville.

A narrow line of showers and thunderstorms developed during the midday hours and pushed through northeast Alabama. One report of damaging winds was received in DeKalb County.

### ALABAMA, Southeast

**HOUSTON COUNTY --- MADRID [31.03, -85.39]**

Power lines were blown down and a shed was moved on Ramer Loop just off Stateline Road.

**HOUSTON COUNTY --- COTTONWOOD [31.05, -85.30]**

04/08/20 17:44 CST	0	Thunderstorm Wind (EG 55 kt)
04/08/20 17:44 CST	0	Source: 911 Call Center

Numerous trees and a power line were blown down in the Cottonwood area.

**HOUSTON COUNTY --- 2.1 ESE SEALY SPRINGS [31.02, -85.27]**

04/08/20 17:45 CST	5K	Thunderstorm Wind (EG 55 kt)
04/08/20 17:45 CST	0	Source: Utility Company

Strong winds blew part of a structure into a utility pole on Waddell Road.

The combination of steep mid level lapse rates, an upper trough, and significant low level moisture with dewpoints in the 70s contributed to significant instability across the area. Thunderstorms produced several instances of large hail and wind damage across portions of southeast Alabama and southwest Georgia.

**DALE COUNTY --- 1.5 SSE BLACKWELL FIELD [31.41, -85.60]**

04/12/20 23:20 CST	0	Thunderstorm Wind (EG 50 kt)

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/19/20 22:32 CST		0	Tornado (EF0, L: 1.82 mi , W: 100 yd)
	04/19/20 22:35 CST		0	Source: NWS Storm Survey

An EF0 tornado briefly touched down with damage consisting of snapped trees. Max winds were estimated around 75 mph.

### DALE COUNTY --- 0.9 NW ECHO [31.48, -85.46]

04/19/20 22:34 CST		50K	Thunderstorm Wind (EG 65 kt)
04/19/20 22:34 CST		0	Source: Broadcast Media

Trees and power lines were down with structural damage in the Echo area.

### HENRY COUNTY --- 1.5 NNW KIRKLAND CROSSROADS [31.42, -85.42], 2.6 NE TUMBLETON [31.43, -85.22]

04/19/20 22:35 CST		0.10M	Tornado (EF1, L: 11.57 mi , W: 150 yd)
04/19/20 22:45 CST		0	Source: NWS Storm Survey

An EF1 tornado touched down in Ozark and tracked east into Henry county. Max winds were estimated at 105 mph. Most of the damage was snapped trees and some roof damage in Ozark.

### DALE COUNTY --- 1.8 SE GOLDBERG FIELD [31.39, -85.43]

04/19/20 22:37 CST		2K	Thunderstorm Wind (EG 65 kt)
04/19/20 22:37 CST		0	Source: Public

A tree was down on a power line on CR521.

### HENRY COUNTY --- 1.7 W TUMBLETON [31.40, -85.28], 3.1 W MILLER [31.44, -85.20]

04/19/20 22:40 CST	1	0	Tornado (EF2, L: 5.18 mi , W: 300 yd)
04/19/20 22:47 CST		0	Source: NWS Storm Survey

Tornado touched down just west of County Road 15 in Henry County, Alabama. The tornado continued northeast through the town of Tumbleton, damaging several single family homes. The tornado destroyed a double wide mobile home northeast of Tumbleton, leading to one fatality. The peak damage was noted from Tumbleton

to the mobile home, with winds estimated at 125 mph. The tornado continued northeast, damaging another single family home and outbuildings. The tornado lifted near County Road 53. Special thanks to Henry County Emergency Management and the Henry County Sheriff's Office for providing damage information and aerial imagery.

Direct Fatalities: M??MH

### HOUSTON COUNTY --- 0.9 SE GREEN ACRES [31.21, -85.46], 1.1 E PETERMAN [31.20, -85.45]

04/19/20 22:42 CST		50K	Tornado (EF1, L: 0.71 mi , W: 50 yd)
04/19/20 22:44 CST		0	Source: NWS Storm Survey

A tornado touched down in northwest Houston County on Bob Hall Road, just south of Ariel Lane. Here it damaged the roof of a home and tore a portion of the roof off of a storage facility. It tracked southeast and damaged the roof of approximately eight homes in a neighborhood along Nottingham Way. The tornado continued to the southeast and downed trees along Harrington Lane where it quickly lifted.

### HENRY COUNTY --- 2.1 E TUMBLETON [31.40, -85.21], 3.2 SW MILLER [31.41, -85.19]

04/19/20 22:45 CST		0.25M	Tornado (EF1, L: 1.49 mi , W: 500 yd)
04/19/20 22:48 CST		0	Source: NWS Storm Survey

Tornado touched down along Camp Springs Road, near County Road 131. A single family home was damaged and an automotive shop was destroyed at County Road 121. The tornado continued northeast, causing scattered tree damage before lifting near County Road 53 after damaging an additional structure. This tornado was rated EF1 with max winds near 110 mph.

### HENRY COUNTY --- 1.5 SE DANZEY [31.45, -85.26], 0.6 NNW MILLER [31.45, -85.15]

04/19/20 22:46 CST		5K	Tornado (EF1, L: 6.45 mi , W: 100 yd)
04/19/20 22:50 CST		0	Source: NWS Storm Survey

Damage from this tornado was primarily confined to snapped trees consistent with an EF1 tornado with max winds estimated at 95 mph. Roof damage to a double wide manufactured home occurred on Field Road.

### HOUSTON COUNTY --- PETERMAN [31.20, -85.47]

04/19/20 22:52 CST		0	Thunderstorm Wind (EG 50 kt)
04/19/20 22:52 CST		0	Source: Public

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Trees were blown down in the Robindale subdivision.				
<b>A potent upper trough moved across the southeast states with numerous severe storms, including widespread wind damage and tornadoes. The tri-state area was under an enhanced to moderate risk of severe storms from the Storm Prediction Center. Some of the tornadoes were significant and rated EF2. Unfortunately, one fatality occurred in southeast Alabama.</b>

Severe thunderstorm wind gusts downed several trees.				
<hr/>				
<b>CHOCTAW COUNTY --- 1.3 SW CULLOMBURG [31.71, -88.32], 0.9 SW CULLOMBURG [31.71, -88.31]</b>				
	04/12/20 20:03 CST	0		Tornado (EF1, L: 0.41 mi , W: 100 yd)
	04/12/20 20:04 CST	0		Source: NWS Storm Survey
An EF-1 tornado touched down in a heavily wooded area west of Lasiter Rd (also west of Highway 17.) The tornado snapped numerous pine trees along its path. The start and end points are estimated due to lack of access. There was also a much larger area of straight line wind damage observed in and around Cullomburg with winds estimated at 60-80 mph, which downed numerous trees and heavily damaged a couple of sheds.				
<hr/>				
<b>CLARKE COUNTY --- 2.2 S WEST BEND [31.80, -88.13], 1.9 SSE WEST BEND [31.80, -88.12]</b>				
	04/12/20 20:16 CST	0		Tornado (EF1, L: 0.77 mi , W: 100 yd)
	04/12/20 20:17 CST	0		Source: NWS Storm Survey
The tornado touched down approximately three quarters of a mile west of West Bend Road and moved northwest across West Bend Road before lifting. Numerous pine trees were snapped along the path. The start point of the path is estimated. There was also a much larger area of straight line wind damage observed around the area, with winds estimated at 60-80, which resulted in tree damage.				
<hr/>				
<b>WILCOX COUNTY --- 1.9 NW ARLINGTON [32.07, -87.62], 1.1 ESE LAMISON [32.12, -87.55]</b>				
	04/12/20 20:44 CST	0		Tornado (EF1, L: 5.36 mi , W: 1000 yd)
	04/12/20 20:49 CST	0		Source: NWS Storm Survey
The tornado entered Wilcox County from Marengo County just southwest of County Road 32 and lifted near County Road 30. The most significant damage occurred along County Road 32 where numerous pine trees were snapped. A mobile home was heavily damaged by a large pine tree. Additional trees were either uprooted or snapped along the path with the tornado weakening as it approached County Road 30 just east of Lamison. Many thanks to NWS Birmingham with their assistance with this survey.				
The same storm has also resulted in numerous trees being downed across Wilcox County from straight line winds.

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tornado touched down just to the northwest of County Road 70 and traveled approximately one and a quarter of a mile towards the southeast. The tornado rapidly intensified after touchdown and produced EF-2 damage. A stand of pine trees were snapped near the bases with no tree left undamaged. The tornado then widened and severely damaged a duplex, sweeping it from its foundation with portions of the debris lofted across C.R. 70 approximately 75 yards away. The duplex did not have proper anchoring to the slab. A nearby concrete block workshop was also destroyed with the roof removed and 26 foot high concrete block walls toppled. A storage unit to the south was also completely destroyed. This damage was assessed as EF-2 tornado intensity.

Across C.R. 70, another single family home was significantly damaged. Large portions of the roof were removed along with partial wall failure. Doors and windows were blown in at the home. This damage was assessed as EF-1 intensity.

The tornado continued southeastward and heavily damaged another stand of mixed softwood and hardwood trees, with many of them snapped either near the base or one quarter of the way up. This damage was assessed as EF-2 tornado intensity. Immediately beyond the tree damage was a metal garage building where the roof was partially removed and a complete wall was ripped off.

The tornado traveled farther southeast through a wooded area and came out into a pasture where it severely damaged and destroyed 4 large chicken houses. The chicken house walls were bolted into the foundation and were completely removed in several locations. This tornado damage was assessed at EF-2 intensity.

The tornado began to weaken as it crossed Harmony Church Road and dissipated just to the southeast where trees were snapped and uprooted just prior to the end of the tornado track. EF-1 damage was assessed prior to tornado dissipation.

**COVINGTON COUNTY --- ANDALUSIA [31.30, -86.48]**

04/19/20 21:54 CST	0	Thunderstorm Wind (MG 52 kt)
04/19/20 21:54 CST	0	Source: ASOS

ASOS K79J measured a thunderstorm wind gust of 60 mph.

**MOBILE COUNTY --- 0.9 SSW TANNER WILLIAMS [30.71, -88.38], 2.8 N DAWES [30.64, -88.25]**

04/19/20 21:55 CST	0	Tornado (EF1, L: 8.90 mi , W: 100 yd)
04/19/20 22:06 CST	0	Source: NWS Storm Survey

The tornado touched down just west of North Grand Bay Wilmer Road and continued east-southeast to Eliza Jordan Road South, then turned toward the southeast crossing over Airport Boulevard. The most significant damage occurred after the tornado crossed Airport Blvd. in the Wakefield and Dominion Subdivisions where many homes suffered damage to roofs, siding, gutters, chimneys, and porches. Numerous fences were brought down as well. The tornado continued southeast before finally lifting just south of Cottage Hill Road. Numerous trees were either snapped or uprooted along the entire path.

**MOBILE COUNTY --- 7.6 W THEODORE IDLE HOUR A [30.58, -88.40], 6.3 W THEODORE IDLE HOUR A [30.57, -88.38]**

## Storm Data and Unusual Weather Phenomena - April 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>The tornado touched down just east of the Alabama/Mississippi state line and tracked eastward before quickly lifting after it crossed Tom Gaston Road. The tornado first toppled an irrigation watering system, and then passed through two private residential properties where it destroyed a barn, along with numerous broken branches and a few snapped trees. The most significant damage occurred shortly after to a private industrial property where three silos and a barn were destroyed, three empty semi trailers were tipped over, and one door of a large metal building was blown in and the other blown out.</p>

	04/19/20 22:12 CST	0		Source: NWS Storm Survey
<p>The tornado touched down just south of Hitt Road in the Smithfield Subdivision and tracked southeast, crossing over the intersection of Cody and Grelot Roads. It continued to move toward the southeast across Hillcrest Road and Cottage Hill Road, and then finally lifted just before reaching Knollwood Drive. Mostly tree damage occurred with this tornado with numerous branches broken, with the most damage occurring from Hillcrest Road until the tornado lifted where several trees were snapped or uprooted. Some houses suffered structural damage that were impacted by falling limbs or trees, and many fences were brought down as well. Sporadic wind damage occurred from Knollwood Drive to Government Boulevard after the tornado lifted.</p>
