	06/19/21 22:45 CST		0	Source: Emergency Manager
Heavy rainfall associated with Tropical Depression Claudette produced widespread flooding across Tuscaloosa County. Many homes and businesses were damaged or destroyed. Flooding destroyed 5 homes and severely damaged 38 in Northport and Tuscaloosa. One-hundred people were displaced when the Willowbrook Trailer Park in Northport was severely flooded. Residential and infrastructure damage between the two cities reached \$3.35 million. A 24 year old man and his 3 year old son were killed when a tree, weakened by the saturated ground, fell on their mobile home.				
Direct Fatalities: M24MH, M3MH				
<b>JEFFERSON COUNTY --- 1.0 E HOPKINS [33.48, -87.06], 0.5 NNE GREENWOOD [33.34, -86.93], 1.6 ESE LOVICK [33.55, -86.59], 1.5 N DIXIANA [33.75, -86.69], 0.5 WNW REPUBLIC [33.60, -86.91]</b>				

## Storm Data and Unusual Weather Phenomena - June 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/19/21 20:15 CST	1	0	Flash Flood (due to Heavy Rain)
	06/19/21 23:45 CST		0	Source: Emergency Manager

Heavy rainfall associated with Tropical Depression Claudette produced widespread flooding across Jefferson County during the evening hours on June 19th and the early morning hours on June 20th. Many roads in the Birmingham metro area were flooded and impassable and several water rescues were performed from flooded vehicles. Storm total rainfall amounts were in the 3-5 inch range. Village Creek in Birmingham recorded its 4th highest stage on record at 14.22 feet. One fatality occurred when a man was washed away in flood waters near Pebble Creek Parkway and Highway 78.

Direct Fatalities: M300U

---

### CHEROKEE COUNTY --- 1.6 WSW TAFF [34.34, -85.66], 1.3 ENE DEWEY [34.34, -85.48], 3.4 NNE CHESTERFIELD [34.49, -85.52], 1.4 NW JAMESTOWN [34.42, -85.59]

06/19/21 22:00 CST	0	Flash Flood (due to Heavy Rain)
06/20/21 00:00 CST	0	Source: Emergency Manager

Heavy rainfall associated with Tropical Depression Claudette produced widespread flooding across northern Cherokee County during the evening hours on June 19th and the early morning hours on June 20th. Flooding reports include one foot of water overflowing County Road 15 and numerous other roads flooded across the northern part of the county.

**Heavy rainfall impacted much of Central Alabama June 19-20 as the remnants of Tropical Storm Claudette moved across the area. Significant flooding occurred along the I-20 corridor where storm total amounts were in the 3-6 inch range, with isolated amounts near 8 inches. Near Tuscaloosa, a private dam failed and the subsequent flooding washed out a water and sewer main at Nucor Corporation's steel plant. This in turn damaged the city's sewage system, prompting officials to issue water restrictions for 100,000 people. Flooding destroyed 5 homes and severely damaged 38 in Northport and Tuscaloosa. Residential and infrastructure damage between the two cities reached \$3.35 million.**

## ALABAMA, North

---

### LAUDERDALE COUNTY --- ANDERSON [34.92, -87.27]

06/02/21 14:40 CST	0.50K	Thunderstorm Wind (EG 52 kt)
06/02/21 14:40 CST	0	Source: Social Media

A social media report relayed by broadcast media indicated that two trees were knocked down in Anderson. Time estimated by radar.

---

### LIMESTONE COUNTY --- 0.6 E LAWNGATE [34.72, -87.07]

06/02/21 15:49 CST	0.20K	Thunderstorm Wind (EG 35 kt)

A tree was knocked down off of Cowford Road in Athens. Time estimated by radar.

---

### LIMESTONE COUNTY --- 1.1 E ATHENS [34.80, -86.96]

06/02/21 15:51 CST	0.20K	Thunderstorm Wind (EG 35 kt)
06/02/21 15:51 CST	0	Source: State Official

A tree was knocked down east of downtown Athens. Time estimated by radar.

**Clusters of strong to severe thunderstorms developed during the mid afternoon hours in northwest moving into north central Alabama. A couple of the thunderstorms produced tree damage and small hail.**

---

### COLBERT COUNTY --- 2.0 N FORD CITY [34.81, -87.52]

06/03/21 01:19 CST	0.20K	Thunderstorm Wind (EG 35 kt)
06/03/21 01:19 CST	0	Source: State Official

A tree was knocked down at Lime Kiln Hollow Drive and Lime Drive. Time estimated by radar.

---

### LAUDERDALE COUNTY --- 0.6 SW TOONERSVILLE [34.86, -87.34]

06/03/21 01:44 CST	3K	Thunderstorm Wind (EG 52 kt)
06/03/21 01:44 CST	0	Source: CoCoRaHS

A CoCoRaHS observer reported that thunderstorm winds knocked down a willow tree, a maple tree, and two bradford pear trees. Also, the storm blown a small greenhouse off of its foundation and destroyed plants inside it. This was less than 400 yards from the intersection of CR 51 and CR 92 northwest of Rogersville. Time estimated by radar.

	06/08/21 19:35 CST		0	Source: State Official

A tree was knocked down by thunderstorm winds on Mill Creek Loop near U.S. Highway 72. Time estimated by radar.

### LAUDERDALE COUNTY --- 0.7 N THORTONTOWN [34.84, -87.35]

	06/08/21 19:52 CST		0.50K	Thunderstorm Wind (EG 35 kt)
	06/08/21 19:52 CST		0	Source: Emergency Manager

A tree was knocked down by thunderstorm winds onto the U.S. Highway 72 eastbound lane between CR 51 and the Anderson Creek Bridge.

**Clusters of strong to severe thunderstorms moved east-northeast out of northern Mississippi and into northwest Alabama during the mid to late afternoon hours. One of the thunderstorms produced a swath of wind damage in southwest through north central Lauderdale County, from near Waterloo through Cloverdale to Zip City near the Tennessee state line. Several trees were knocked down and a large metal barn was toppled.**

**A second one with a pronounced bow echo swept into northwest Alabama during the early to mid evening hours. This system also knocked down several trees in Colbert and Lauderdale Counties.**

### MADISON COUNTY --- 1.5 SSW SULPHUR SPGS [34.90, -86.53]

	06/12/21 12:05 CST		0.20K	Thunderstorm Wind (EG 35 kt)
	06/12/21 12:05 CST		0	Source: Broadcast Media

A large tree limb was snapped in New Market, about two miles east of Walker Lane and U.S. Highway 231. Time estimated by radar.

### MORGAN COUNTY --- 0.6 NE FAIRVIEW [34.59, -86.94], 1.1 ESE CEDAR LAKE [34.55, -86.95]

	06/12/21 13:36 CST		0.10M	Thunderstorm Wind (EG 65 kt)
	06/12/21 13:40 CST		0	Source: Other Federal Agency

A powerful small-scale downburst occurred in southeast Decatur, including the Point Mallard neighborhood. Based on newspaper reports and photos, winds were estimated up to 75 mph. The winds produced significant tree damage, including numerous fallen trees, some on area homes. Several power poles were snapped and power lines were down, knocking out power to hundreds of residents in the area.

Further south and across Highway 67/Beltline Road, the downburst knocked down numerous trees within the Wheeler National Wildlife Refuge (NWR). At the visitors Center complex, a tree was knocked onto the building causing roof and water damage. Several trees blocked roads and hiking trails which had to be closed for cleanup. Time estimated by radar.

## Storm Data and Unusual Weather Phenomena - June 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Observer measured 9.83 inches of rainfall.

A band of very heavy rainfall developed well north of the track of Tropical Depression Claudette that moved across central Alabama. This rain band occurred during the late afternoon through the evening of the 19th into the very early morning hours of the 20th. Rainfall amounts of 5-10 inches were observed (ground truth) and estimated by radar. A CoCoRaHS observer reported 9.83 inches of rain atop Lookout Mountain about 3 miles south of Fort Payne. Another personal weather station measured 10.56 inches about 2 miles NNW of Rainsville. Excessive runoff led to significant flash flooding in a few areas, including along the Big Wills Creek in Fort Payne, and atop Lookout Mountain. Sadly, flash flooding took the life of a young woman along Dye Branch in Fort Payne, whose vehicle was swept off the road.

## Storm Data and Unusual Weather Phenomena - June 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Tropical Storm Claudette passed west of the tri-state area. However, some squalls associated with it resulted in a few trees being blown down. One supercell developed in rural southwest Georgia and produced a long track tornado. Fortunately, minimal damage occurred due to the rural area it affected.

An EF-0 tornado, with maximum estimated winds of 85 mph, moved across Cedar Point Pier. The pier suffered damage to some railings and light poles. A large metal storage unit was lifted and moved ten feet, heavily damaging the structure. A utility pole was also knocked over. A 2x4 board was launched through the window of a pickup truck. The occupant of the truck suffered minor injuries. The end point is an estimation as the tornado could have continued to the north. However, given this area is marsh, the survey team was not able to find a definitive end point.

<p>The tornado first touched down on Jay Road just west of Highway 41 in Riverview. The tornado intensified and widened as it moved northeast into East Brewton, crossing over Highway 41. During this time, the tornado produced EF-1 intensity damage to numerous trees, homes, businesses in the area. Some of the most severe damage was located at the intersection of Forrest Avenue and Andrew Jackson Street where several mobile homes were completely destroyed. This was rated as EF-2 intensity damage with peak estimated winds of 125-130 mph. There was also significant roof damage to the auditorium at W S Neal High School. The tornado continued northeast and moved across Shoffner Street. Primarily EF-1 intensity damage to trees and homes was noted here, but a swath of EF-2 intensity tree damage was noted in a valley just north of Ballard Street. Major tree damage continued north across Cook Road. Additional major structural damage was observed along Riddle Road near Horseshoe Road. A single wide mobile home was completely destroyed with the frame tossed over a 100 yards away. The owner was ejected from the building and found near the frame and suffered serious injuries. A home on the north side of Riddle Road had its entire roof torn off. The tornado continued north, crossing Kirkland Road and Highway 31. Most of the damage was in the EF-1 range and most notably to trees.</p> <p>The tornado crossed into Conecuh County and produced EF-1 damage on the west side of Castleberry, impacting areas of Braggert Road, Kennedy Street, and Durham McLendon Road. The tornado began to weaken as it moved north of west Cleveland Avenue but still produced spotty EF-0 to EF-1 damage all the way north to Interstate 65 where some tree damage was noted just north of the rest area. This is near where the tornado is estimated to have lifted. The survey team found no damage crossing Highway 84 further to the north.</p> <p>Escambia County Emergency Management reported up to 20 total injuries, mostly minor. However, there were 2 serious injuries.</p>

	06/19/21 12:12 CST		0	Tornado (EF0, L: 0.63 mi , W: 25 yd)
	06/19/21 12:14 CST		0	Source: NWS Storm Survey

A brief EF-0, with peak estimated winds of 80 mph, touched down south of North Creek Road. The tornado moved northeast, crossing the road and lifting shortly thereafter. Numerous large tree limbs were downed along with a few small trees snapped. Based on radar analysis of the tornado debris signature, the tornado likely touched down further to the southwest, but the survey team could not access that area.

Potential Tropical Cyclone Claudette moved west of the Alabama coastal waters on the evening of June 18th, 2021. Claudette was declared a Tropical Storm and made landfall in southeast Louisiana during the early morning hours of June 19th. Claudette then turned northeast across southeast Mississippi and across south central Alabama during the morning on Saturday June 19th.

Tropical Storm Claudette produced frequent tropical storm-force wind gusts across coastal Alabama and the western Florida Panhandle. A few areas of the coast, such as Dauphin Island, Fort Morgan, and the Okaloosa Island Fishing Pier recorded a brief period of sustained minimal tropical storm-force winds.

The highest wind gusts were associated with strong to severe thunderstorms that developed well east of the center of Claudette. These storms most significantly impacted the western Florida Panhandle. The highest wind gust observed was 81 mph at Pensacola International Airport. A Weatherflow site in Santa Rosa Sound recorded a 70 mph wind gust, which was from the same line of storms that resulted in the Pensacola gust. This line of storms produced wind damage in parts of the Pensacola Metro, especially in Ferry Pass. Pace also experienced pockets of wind damage, including one mobile home that lost its roof

The highest winds recorded were sustained winds of 45 mph with gusts to 70 mph in Santa Rosa Sound, 58 mph with gusts to 81 mph at Pensacola Airport, 42 mph with gusts to 52 mph at Okaloosa Island fishing pier. In Mobile Bay, 40 mph with gusts to 49 mph at Buccaneer Yacht Club.

Storm surge inundation ranged from 1-3 feet above normally dry ground across southern Mobile County into Mobile Bay. This flooding resulted in the closure of a few roads, such as Shell Belt Rd in the Bayou La Batre and Coden communities and the US Highway 90 Causeway over Mobile Bay. The highest storm tide recorded was 3.67 ft MHHW at the NOS tide gauge on the Bayou La Batre bridge. In addition to the storm surge, surf heights of 6-12 feet battered the Gulf facing beaches. This impacted the west end of Dauphin Island with a portion of Bienville Blvd closed due to flooding and sand over the road. The Florida side of the Gulf Islands National Seashore was closed for several days due to flooding and sand on roads.

Claudette produced 3 tornadoes in southwest and south central Alabama: A long track EF-2 tornado that impacted Escambia and Conecuh Counties, an EF-0 tornado in rural Covington County, and an EF-0 tornado in far southern Mobile County.

A widespread 3-6" of rain fell across coastal Alabama into the western Florida Panhandle. 6-9" of rain was recorded over parts of interior southeast MS, with a station in far western Stone County, 11 miles west of Perkinston, recording 9.43". This rainfall resulted in instances of flash flooding and river flooding across the area.
