

Storm Data and Unusual Weather Phenomena - September 2021

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|----------|-----------|-------------------|---------------------|------------------------|
|----------|-----------|-------------------|---------------------|------------------------|

ALABAMA, Central

CHEROKEE COUNTY --- 3.1 E SLACKLAND [34.13, -85.78]

| | | | | |
|--------------------|--|--|---|------------------------------|
| 09/08/21 15:55 CST | | | 0 | Thunderstorm Wind (EG 55 kt) |
| 09/08/21 15:56 CST | | | 0 | Source: Emergency Manager |

A downburst or straight-line wind event uprooted numerous trees along County Road 23. One large tree fell on a home and resulted in some structural damage. Several outbuildings lost sections of roof.

A weak cold front pushed southward across north central Alabama during the afternoon on September 8th. The air mass ahead of the front was moderately unstable with SBCAPE values near 4400 J/kg and DCAPE values near 1200 J/kg.

JEFFERSON COUNTY --- 1.0 S PATTON CHAPLE [33.37, -86.83], 1.8 NE VESTAVIA HILLS [33.41, -86.75], 2.0 S HOMEWOOD [33.45, -86.77], 2.4 N PATTON CHAPLE [33.41, -86.83]

| | | | | |
|--------------------|--|--|---|---------------------------------|
| 09/18/21 08:30 CST | | | 0 | Flash Flood (due to Heavy Rain) |
| 09/18/21 10:30 CST | | | 0 | Source: Broadcast Media |

Patton Creek overflowed its bank in several locations in Hoover and Vestavia Hills .

Flooding occurred near the Hoover Country Club with water entering several nearby residences. At least six inches of water flowed over Highway 31 where it crossed Patton Creek in Vestavia Hills.

SHELBY COUNTY --- 1.4 ESE ACTON [33.34, -86.80], 2.0 ENE PARAMOUNT [33.33, -86.80], 2.7 SSW NEW HOPE [33.34, -86.77], 2.1 E ACTON [33.35, -86.78]

| | | | | |
|--------------------|--|--|---|---------------------------------|
| 09/18/21 09:00 CST | | | 0 | Flash Flood (due to Heavy Rain) |
| 09/18/21 11:00 CST | | | 0 | Source: Public |

Six to twelve inches of water flowing across Southgate Drive in Pelham.

TUSCALOOSA COUNTY --- 1.6 SW VETERANS HOSPITAL [33.16, -87.60], 1.6 N (TCL)TUSCALOOSA ARPT [33.24, -87.63], 1.7 NNE RIVER VIEW [33.24, -87.53], 2.4 NNE TAYLORVILLE [33.18, -87.53]

| | | | | |
|--------------------|--|---|---|---------------------------------|
| 09/18/21 11:30 CST | | 1 | 0 | Flash Flood (due to Heavy Rain) |
| 09/18/21 15:30 CST | | | 0 | Source: Public |

Severe flooding across the cities of Northport and Tuscaloosa . Water was 2-3 feet deep along portions of 14th Avenue in the city of Tuscaloosa with numerous roads flooded and impassable across the city. One fatality was reported near the intersection of Greensboro Avenue and 24th Street as a vehicle was swept off the road and into a drainage ditch .

Direct Fatalities: M40VE

TALLAPOOSA COUNTY --- 0.5 W ALEXANDER CITY [32.95, -85.98], 2.1 SW BEVELLE [32.90, -85.97], 1.6 E BEVELLE [32.92, -85.92], 1.9 ENE ALEXANDER CITY [32.96, -85.94]

| | | | | |
|--------------------|--|--|---|---------------------------------|
| 09/19/21 17:20 CST | | | 0 | Flash Flood (due to Heavy Rain) |
| 09/19/21 19:00 CST | | | 0 | Source: Emergency Manager |

Several roads flooded and impassable in Alexander City. Water covered portions of Elkahatchee Road, Center Street, and 12th Avenue North.

A tropical air mass covered Alabama on September 18-19 with precipitable water values over 2 inches. An nearly stationary upper low near the Texas and Louisiana state line provided lift and instability for showers and thunderstorms across the Central Gulf States. An inverted surface trough was located along the I-20 corridor on September 18th, and provided a focus for slow moving thunderstorms that produced flash flooding across Tuscaloosa, Jefferson and Shelby counties. The upper trough moved slightly eastward on the 19th and the flooding threat shifted to areas east of I-65.

ALABAMA, North

COLBERT COUNTY --- 1.4 N LANE SPGS [34.85, -87.97], 1.3 NNE LANE SPGS [34.85, -87.96], 0.9 NNE LANE SPGS [34.84, -87.96], 1.1 NNW LANE SPGS [34.85, -87.98]

| | | | | |

Over 6 inches of rain in just a couple of hours time resulted in significant flash flooding in parts of the Lillian and Seminole areas. In Lillian, fast moving water over Highway 98 washed cars off the road. A water rescue had to be performed at the Lillian Post Office due to a person being trapped in their vehicle . County Road 99 at Pearson Branch Bridge was closed due to flooding. In Seminole, a portion of Liatrus Lane near Juniper Road caved in with a six to 10 foot sink hole.

Deep tropical moisture from the remnants of Hurricane Nicholas overspread the area and led to the development of bands of very heavy rainfall. The slow motion of these bands produced copious amounts of rain which led to flash flooding across portions of southwest Alabama.
