

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>ALABAMA, Central</b>				
<b>MARION COUNTY --- BEXAR [34.18, -88.15]</b>				
	11/29/22 12:34 CST		0	Thunderstorm Wind (EG 50 kt)
	11/29/22 12:35 CST		0	Source: Emergency Manager
Several trees uprooted in the town of Bexar.				
<b>FAYETTE COUNTY --- 1.5 WNW HOWARD [33.86, -87.60]</b>				
	11/29/22 18:50 CST		0	Thunderstorm Wind (EG 50 kt)
	11/29/22 18:51 CST		0	Source: Emergency Manager
Several trees uprooted along Highway 121.				
<b>WALKER COUNTY --- SUMITON [33.75, -87.05]</b>				
	11/29/22 19:16 CST		0	Thunderstorm Wind (EG 50 kt)
	11/29/22 19:17 CST		0	Source: 911 Call Center
Roof damage to several buildings on main street in downtown Sumiton.				
<b>GREENE COUNTY --- 3.6 WNW EUTAW [32.84, -87.94], 3.3 N MC CLURE [32.88, -87.82]</b>				
	11/29/22 21:44 CST		0	Tornado (EF1, L: 7.21 mi , W: 650 yd)
	11/29/22 21:53 CST		0	Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in eastern Greene County and determined that it was consistent with an EF 1 tornado, with maximum winds near 110 mph. The tornado touched down in an inaccessible area west of Eutaw shortly before crossing Greene County Road 131 where it impacted the Sagewood Apartment complex. The most significant damage here was to the northernmost unit where the majority of the roof structure was peeled away and blown into the nearby tree line. Adjacent units only showed minor damage to shingles and to siding. Nearby timber damage was also not particularly intense, though there was a variety of sporadic uprooted and snapped tree trunks. Timber and powerline damage in this area was consistent with low-end EF-1. The tornado continued east-northeast toward Highway 14 where additional timber and power line damage was observed. Several homes sustained minor roof damage on Kirkwood Lane or were more significantly damaged by uprooted trees. The tornado crossed US Highway 11 causing additional tree damage. The tornado continued northeast towards the Black Warrior River where the path became inaccessible. The tornado crossed the Black Warrior and continued into Hale County.				
<b>HALE COUNTY --- 5.3 NW EVANSVILLE [32.88, -87.82], 5.0 W AKRON [32.88, -87.81]</b>				
	11/29/22 21:53 CST		0	Tornado (EFU, L: 0.46 mi , W: 475 yd)
	11/29/22 21:54 CST		0	Source: NWS Storm Survey
This tornado crossed the Black Warrior River several times and this is a short segment that the tornado moved over Hale County. The area was inaccessible and that why it was rated as unknown intensity.				
<b>GREENE COUNTY --- 3.6 NNE MC CLURE [32.88, -87.81], 3.8 NNE MC CLURE [32.88, -87.81]</b>				
	11/29/22 21:54 CST		0	Tornado (EFU, L: 0.36 mi , W: 450 yd)
	11/29/22 21:55 CST		0	Source: NWS Storm Survey
This tornado crossed the Black Warrior River several times and this is a short segment that the tornado moved over Greene County. The area was inaccessible and that why it was rated as unknown intensity.				
<b>HALE COUNTY --- 4.7 W AKRON [32.88, -87.81], 1.6 SE CYPRESS [32.94, -87.63]</b>				
	11/29/22 21:55 CST		0	Tornado (EF1, L: 11.23 mi , W: 1200 yd)
	11/29/22 22:13 CST		0	Source: NWS Storm Survey
This tornado originated in Greene County and crossed the Black Warrior River into Hale County. The tornado tracked just south of the river for several miles. The first section of observable damage was in the Oak Village Community northwest of Akron. Several homes sustained significant damage near the riverfront where impressive timber damage was observed. The tornado continued northeast toward Stewart where additional timber damage was observed along Highway 42. A home sustained roof damage on Mileous Chapel Road. Near this area timber damage became very diverse in direction and damage intensity. The tornado was at its widest point here with a width around 1,200 yards. Based on the nature of the damage it is believed to have been in a multi-vortex state. The tornado then continued northeast and began to weaken with minor timber damage on Massey Loop Road. The tornado dissipated shortly after crossing Highway 69.				
<b>WALKER COUNTY --- 5.3 S DIXIE SPGS [33.62, -87.38], 6.2 S DIXIE SPGS [33.61, -87.35]</b>				

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	11/30/22 00:28 CST		0	Tornado (EF0, L: 1.99 mi , W: 50 yd)
	11/30/22 00:30 CST		0	Source: NWS Storm Survey

A NWS Birmingham survey team was able to find very minor and spatially isolated timber damage along Tutwiler Road . This was the only damage observed on the survey. Radar data indicated a weak TVS northwest of Highway 69 in an inaccessible area.

### WALKER COUNTY --- 5.2 ESE JASPER WALKER CO ARP [33.85, -87.18]

	11/30/22 00:34 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 00:35 CST		0	Source: Emergency Manager

A QLCS produced wind damage in the town of Boldo, consisting of uprooted trees and downed power lines.

### WALKER COUNTY --- SIPSEY [33.82, -87.08]

	11/30/22 00:37 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 00:38 CST		0	Source: Emergency Manager

A QLCS produced wind damage in the town of Sipsey, consisting of uprooted trees and downed power lines.

### BLOUNT COUNTY --- HAYDEN [33.88, -86.77]

	11/30/22 00:49 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 00:50 CST		0	Source: 911 Call Center

A QLCS produced uprooted trees in the town of Hayden.

### JEFFERSON COUNTY --- GRAYSVILLE [33.63, -86.97]

	11/30/22 00:51 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 00:53 CST		0	Source: Emergency Manager

Numerous trees uprooted between the towns of Graysville and Brookside.

### BLOUNT COUNTY --- 2.7 NNW ADVILLE [33.91, -86.67], 1.2 NNE LOCUST FORK [33.92, -86.61]

	11/30/22 00:57 CST		0	Tornado (EF0, L: 3.46 mi , W: 500 yd)
	11/30/22 01:02 CST		0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in the Locust Fork area of Blount County and determined that it was consistent with an EF 0 tornado, with maximum winds near 65 mph. The tornado touched down in a heavily wooded area near the Locust Fork River, just west of Standridge Trail. The first observable damage was in the area of Standridge Trail where minor timber damage occurred . Two barns sustained roof damage and one camper trailer was rolled and destroyed. The tornado continued east toward Deaver Walker and Campbell Roads . The circulation was fairly broad. Most damage consisted of sporadic uprooted trees. A few structures had minor roof damage with at least two structures damaged by uprooted trees . The tornado moved generally east across Tabernacle Road and County Road 13, producing additional sporadic and minor timber damage. The tornado dissipated before crossing Highway 79. Given the weak nature of the circulation, most if not all damage was on the right side with debris facing in a N to NE direction indicating non-divergent damage relative to path. No damage was found on the north side of the damage path.

### BLOUNT COUNTY --- NECTOR [33.95, -86.63]

	11/30/22 00:58 CST		0	Hail (1.00 in)
	11/30/22 00:59 CST		0	Source: Social Media

Photograph of large hail near the town of Nectar.

### JEFFERSON COUNTY --- 0.6 N DOCENA [33.56, -86.93], 4.0 NNE CLAY [33.75, -86.57], 1.3 SW LEEDS [33.54, -86.57], 1.3 SSW PATTON CHAPLE [33.36, -86.84]

	11/30/22 01:00 CST		0	Flash Flood (due to Heavy Rain)
	11/30/22 03:30 CST		0	Source: Emergency Manager

A slow moving QLCS produced heavy rainfall across southern Jefferson County , mainly along the I-65 corridor. Rain gauge measurements reported 3-5 inches. Flooding reported at the intersection of Highway 31 and Lorna Road. Ramps along the I-459 and I-65 intersection were flooded and impassable. Village Creek at Ensley rose above flood stage.

### JEFFERSON COUNTY --- (BHM)BIRMINGHAM ARPT [33.57, -86.75]

	11/30/22 01:06 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 01:08 CST		0	Source: Emergency Manager

A QLCS produced wind damage in the cities of Birmingham, Center Point, Palmedale and Trussville. The damage consisted mainly of uprooted trees.

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>MARENGO COUNTY --- 0.7 SSW COXHEATH [32.06, -87.91], 2.4 N MAGNOLIA [32.16, -87.68]</b>				
	11/30/22 01:11 CST		0	Tornado (EF1, L: 15.49 mi , W: 535 yd)
	11/30/22 01:30 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southern Marengo County and determined that it was consistent with an EF 1 tornado, with maximum winds near 110 mph. The tornado began in a wooded area southeast of County Road 6 to the southwest of Sweet Water. Tree damage was initially minor as it moved northeastward, with portions of roofs removed from a couple outbuildings as well as a patio overhang from a residence along Dogwood Lane and County Road 7. Damage was barely discernible as it moved northeast across Highway 10, but the tornado intensified as it crossed Sweetwater Creek. Numerous trees were snapped near Wayne Road; one of which was blown into and damaged the exterior wall of a double wide manufactured home. Damage to the manufactured home probably would have been much worse if it had not been well-anchored and had its roof attached with clips. A camper was also moved several feet. The tornado continued to snap and uproot trees as it crossed Union Grove Road and caused shingle and window damage to a residence. Tree damage was minor across Highway 43, but the tornado intensified again as it crossed Pillie Road and County Road 73. The tornado removed the roof from an addition to a manufactured home along County Road 47 before dissipating prior to reaching Highway 25.</p>				
<b>ST. CLAIR COUNTY --- MOODY [33.58, -86.50]</b>				
	11/30/22 01:20 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 01:22 CST		0	Source: Emergency Manager
<p>Several trees uprooted in Moody and other locations across St. Clair County.</p>				
<b>ST. CLAIR COUNTY --- 2.4 SSW MOODY [33.55, -86.51], 2.0 WNW RIVERSIDE [33.61, -86.23], 3.3 NE WHITNEY [33.90, -86.25], 2.0 WNW SPRINGVILLE [33.78, -86.50]</b>				
	11/30/22 01:30 CST		0	Flash Flood (due to Heavy Rain)
	11/30/22 03:30 CST		0	Source: Emergency Manager
<p>A slow moving QLCS produced heavy rainfall across St. Clair County, mainly along and north of the I-20 corridor. Rain gauge measurements reported 3-5 inches. Several roads were flooded between Leeds and Pell City. Highway 11 in the city of Springville flooded and was impassable in some spots.</p>				
<b>CALHOUN COUNTY --- 3.9 SSW BOILING SPGS [33.68, -86.06], 3.2 SSW BOILING SPGS [33.69, -86.05]</b>				
	11/30/22 01:37 CST		0	Tornado (EF0, L: 0.79 mi , W: 300 yd)
	11/30/22 01:38 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southwest Calhoun County and determined that it was consistent with an EF 0 tornado, with maximum winds near 75 mph. The tornado began near the intersection of Mitchellville Road and Mayfield Road, where damage consisted of several uprooted trees and snapped trunks.</p> <p>The tornado continued northeast toward Mudd Street where the most severe damage occurred at two residences. Two homes also sustained minor roof damage. The tornado likely dissipated as it moved past Mudd Street as no other damage was observed downstream. There was also evidence of a weak TDS associated with this tornado from the KBMX radar.</p>				
<b>SHELBY COUNTY --- 0.8 N PARAMOUNT [33.33, -86.83], 0.1 N SILURIA [33.23, -86.83], 1.6 NNE SAGINAW [33.24, -86.77], 1.9 NNE QUITO [33.40, -86.73]</b>				
	11/30/22 01:45 CST		0	Flash Flood (due to Heavy Rain)
	11/30/22 03:30 CST		0	Source: Emergency Manager
<p>Water over several roadways and impassable in the Fox Valley Community in the city of Alabaster.</p>				
<b>CLEBURNE COUNTY --- 0.5 WNW HOLLIS XRDS [33.52, -85.64]</b>				
	11/30/22 02:08 CST		0	Thunderstorm Wind (EG 50 kt)
	11/30/22 02:09 CST		0	Source: Emergency Manager
<p>Several trees uprooted and blocking roads in Hollis Crossroads.</p>				
<b>ELMORE COUNTY --- 2.4 SSE PRATTVILLE JCT [32.44, -86.33], 2.6 SE PRATTVILLE JCT [32.44, -86.32]</b>				
	11/30/22 03:14 CST		0	Tornado (EF0, L: 0.52 mi , W: 360 yd)
	11/30/22 03:15 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southwest Elmore County and determined that it was consistent with an EF 0 tornado, with maximum winds near 65 mph. The tornado began just west of the Montgomery County line near the Alabama River Parkway, where an outbuilding and retaining wall were damaged. It tracked east and crossed the Alabama River into Montgomery County.</p>				
<b>MONTGOMERY COUNTY --- 3.2 WNW BOYLSTON [32.44, -86.32], 2.4 NNE MADISON [32.46, -86.21]</b>				

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	11/30/22 03:15 CST	2	0	Tornado (EF0, L: 6.79 mi , W: 650 yd)
	11/30/22 03:22 CST	2	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in Montgomery County and determined that it was consistent with an EF 2 tornado, with maximum winds near 120 mph. The tornado crossed the Alabama River and into Montgomery County and continued east-northeastward towards Coosada Ferry Road, where it uprooted and snapped several pine trees. It strengthened as it reached Williams Road, where a manufactured home and a site-built home suffered roof damage. Just west of Franson Road two manufactured homes were completely destroyed with debris blown downstream. One manufactured home had some evidence of straps but the occupancy status of both are unknown. As the tornado moved into the Flatwood community, many homes had roof damage and damage from uprooted trees. Unfortunately an uprooted tree fell on a manufactured home, resulting in two fatalities and one serious injury. The concrete masonry unit community center also suffered collapse of all exterior walls. The tornado crossed Lower Wetumpka Road twice, continuing to snap and uproot trees and cause roof damage, with one home suffering complete roof loss. A couple of wooden transmission line poles fell north of Anderson Road. The tornado then crossed the Tallapoosa River into Elmore County.

Direct Fatalities: F39MH, M8MH

---

### ELMORE COUNTY --- 4.3 SE MAN [32.46, -86.21], 5.9 SSE WETUMPKA [32.48, -86.17]

11/30/22 03:22 CST	0	Tornado (EF2, L: 2.54 mi , W: 700 yd)
11/30/22 03:28 CST	0	Source: NWS Storm Survey

This tornado crossed the Tallapoosa River from Montgomery County and into Elmore County. An impressive swath of trees were uprooted on the west side of Highway 231. The tornado continued northeastward along Jasmine Hill Road and Willow Springs Road, where several homes were damaged from falling trees. The tornado finally dissipated south of Willow Springs Road east of Ross Ridge Lane.

---

### ELMORE COUNTY --- 3.9 NE WARE [32.49, -86.00], 1.6 S TALLASSEE [32.51, -85.90]

11/30/22 03:38 CST	0	Tornado (EF2, L: 6.26 mi , W: 400 yd)
11/30/22 03:49 CST	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in southeast Elmore County and determined that it was consistent with an EF 2 tornado, with maximum winds near 115 mph. The tornado began along Rock Springs Road north of Rifle Range Road, downing branches and causing damage to an outbuilding. It continued northeastward through inaccessible forest land, before snapping and uprooting trees along Dark Corners Road and New Quarter Road. A majority of a roof was removed from a home along New Quarter Road with one exterior wall collapsing. It continued northeastward uprooting more trees along Rifle Range Road before dissipating prior to reaching Highway 229.

---

### PIKE COUNTY --- GOSHEN [31.72, -86.12]

11/30/22 05:19 CST	0	Thunderstorm Wind (EG 50 kt)
11/30/22 05:20 CST	0	Source: Emergency Manager

Several trees uprooted and blocking roadways in the town of Goshen.

---

### PIKE COUNTY --- 0.8 SE MONTICELLO [31.82, -85.77], 1.6 W ENON [31.82, -85.75]

11/30/22 05:42 CST	0	Tornado (EF0, L: 1.42 mi , W: 150 yd)
11/30/22 05:44 CST	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in eastern Pike County and determined that it was consistent with an EF 0 tornado, with maximum winds near 70 mph. A brief weak tornado developed along County Road 6643 just east of Highway 130 and the Buckhorn community. Damage consisted of a few uprooted trees and broken branches along County Road 6643. The tornado dissipated as it crossed Buckhorn Creek. A weak TDS was evident from KEOX radar.

---

### PIKE COUNTY --- 4.3 SE BRUNDIDGE MUNI ARPT [31.68, -85.75], 4.5 SE BRUNDIDGE MUNI ARPT [31.69, -85.74]

11/30/22 05:45 CST	0	Tornado (EF0, L: 0.79 mi , W: 150 yd)
11/30/22 05:46 CST	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in southeast Pike County and determined that it was consistent with an EF 0 tornado, with maximum winds near 75 mph. The brief tornado touched down in the woods between Ten Mile Road and Barefoot Road. As the tornado approached Barefoot Road, numerous pine trees received large limb damage. The tornado crossed Barefoot Road and caused more tree limb damage. The tornado lifted between Barefoot Road and Pike County Road 4420.

---

### BARBOUR COUNTY --- 0.9 SSW LINDSEY [31.74, -85.49], 3.6 ENE TEXASVILLE [31.74, -85.37]

11/30/22 06:06 CST	0	Tornado (EF0, L: 6.60 mi , W: 300 yd)

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
National Weather Service meteorologists surveyed damage in southeast Barbour County and determined that it was consistent with an EF 0 tornado, with maximum winds near 80 mph. A tornado touched down in the woods between Stark Brothers Road and County Road 53 just northeast of Texasville. As the tornado crossed County Road 53, a few pine tree tops were snapped. The tornado continued eastward to the intersection of Alabama Highway 131 and County Road 20, where a pine tree was snapped and fell into the roadway. Large limbs were broken to the north of Alabama Highway 131 and west of County Road 20. From there the tornado paralleled Alabama Highway 131 as it traveled east before striking a chicken farm. It caused significant damage to four chicken houses, with large sections of barn roofing were removed and blown as much as 200 yards downstream. The tornado continued across the farm through mainly open fields uprooting a few large trees, and then causing minor damage to a riding arena and farmhouse. The tornado then crossed County Road 67 and uprooted a few pine trees before dissipating.				

---

### BARBOUR COUNTY --- 0.6 NW EUFAULA [31.89, -85.16]

11/30/22 06:24 CST	0	Thunderstorm Wind (EG 50 kt)
11/30/22 06:25 CST	0	Source: Broadcast Media

Several trees uprooted and on a home on Monroe Street in the city of Eufaula.

A very dynamic and deepening low pressure system moved through the Ohio Valley states on November 29-30 with a trailing cold. The air mass across Central Alabama was initially stable during the day on November 29th with surface dewpoints in the 40s and 50s. Instability increased dramatically the evening of the 29th as 60 plus surface dewpoints advected northward into Central Alabama. A QLCS developed ahead of the approaching cold front in addition to discrete thunderstorms.

## ALABAMA, North

### CULLMAN COUNTY --- 2.5 S WILBURN [33.91, -87.02]

11/30/22 00:35 CST	0.50K	Thunderstorm Wind (EG 52 kt)
11/30/22 00:35 CST	0	Source: Law Enforcement

A tree was knocked down near the intersection of Highway 91 and CR 27. Time was estimated from radar.

---

### CULLMAN COUNTY --- 0.9 NE ARKADELPHIA [33.91, -86.96]

11/30/22 00:38 CST	1.50K	Thunderstorm Wind (EG 52 kt)
11/30/22 00:38 CST	0	Source: Law Enforcement

A tree and power lines were knocked down at 8304 Highway 91.

Multiple rounds of thunderstorms, some strong to severe, moved through the region during the afternoon of the 29th into the early morning of the 30th. Supercell thunderstorms produced large hail and isolated damaging winds during the afternoon hours of the 29th in northwest into north central Alabama. Then, during the evening and overnight hours, another band of thunderstorms produced wind damage.

---

### GENEVA COUNTY --- 2.7 N SLOCOMB [31.14, -85.58], 2.6 NE SLOCOMB [31.13, -85.56]

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	11/30/22 06:42 CST		40K	Tornado (EF1, L: 1.79 mi , W: 50 yd)
	11/30/22 06:44 CST		0	Source: NWS Storm Survey

A brief EF1 tornado touched down along Hundley Road near Slocomb with significant roof damage to a house and carport. The rear window of a Tahoe was also blown out. The tornado moved southeastward through a wooded area with some trees snapped along its path. It then moved across McCollough Road where a pole was bent. The tornado lifted near the intersection of McCollough Road and Green Road. Peak winds were estimated near 95 mph.

---

### HOUSTON COUNTY --- WICKSBURG [31.20, -85.62]

11/30/22 06:45 CST	0	Thunderstorm Wind (EG 50 kt)
11/30/22 06:45 CST	0	Source: 911 Call Center

A tree blew down in Wicksburg.

**The last few days of November were fairly active across the tri-state area with a pair of cold fronts moving through. Both fronts brought thunderstorms to the area, a few of which were severe with impacts mainly to trees and power lines. However, a couple of brief tornadoes did occur in southwest Georgia and southeast Alabama, all which were rated either EF0 or EF1.**

## ALABAMA, Southwest

---

### WASHINGTON COUNTY --- 1.6 WNW FRUITDALE [31.34, -88.44], 3.0 ENE UNIFORM [31.37, -88.19]

11/30/22 02:30 CST	0	Tornado (EF3, L: 15.43 mi , W: 500 yd)
11/30/22 02:55 CST	0	Source: NWS Storm Survey

The tornado began near Highway 57 in Greene County where several softwood tree trunks were snapped. It continued on an east northeast track producing damage along Nursery Road. The track continued into Washington County Alabama. The tornado crossed Highway 45 and hit Fruitdale High School where windows were damaged along with roof damage to the school and nearby houses. Widespread tree and power line damage was also observed in the Fruitdale area. The damage in Fruitdale is estimated to have been in the high EF-1 range with winds 105-110 mph. The tornado continued northeast and strengthened as it approached Baxter McIlwain Road. This is where the tornado reached peak intensity. Based on the ground survey, a nearly 500 yard swath of major tree damage was observed with countless hardwood and softwood trees destroyed. The EF-3 peak intensity (140 mph) is based on this swath of major tree damage. The tornado continued to track eastward through Tibbie with more significant to major tree damage (EF-2 intensity), along with roof damage observed along Leo and Boyd Willie Parnell Road. The tornado weakened as it moved east across Howardtown Road and dissipated east of Clarke Place Road.
