	08/03/23 13:29 CST		0	Thunderstorm Wind (EG 70 kt)
	08/03/23 13:30 CST	20	0	Source: NWS Storm Survey
National Weather Service Meteorologists surveyed wind damage from severe thunderstorms that occurred on the afternoon of August 3, 2023 at approximately 2:30 pm CDT. The damage found was consistent with straight line winds of 80 mph along a narrow corridor of Tabor Road, near the cross streets of Dodge Lane and McCauley Avenue. Around a dozen or more soft and hard wood trees were snapped or uprooted, damaging several trailer campers and vehicles. The more intense damage was noted in adjacent areas of the annual event, The World's Longest Yard Sale, where several pedestrians and shoppers sustained minor to severe injuries. In all, 20 people were injured, mostly in conjunction with taking shelter rather than the actual storm damage. The estimated winds along Tabor Road were noted as the strongest in the area, although additional tree and powerline damage was noted across the entire county where winds were estimated at 50 to 60 mph.				
FAYETTE COUNTY --- 1.4 N HUBERTVILLE [33.84, -87.75]				
	08/03/23 13:39 CST		0	Thunderstorm Wind (EG 50 kt)

Trees were reported down in Berlin.

A potent thunderstorm complex developed in southwestern Tennessee and northeast Mississippi during the mid to late afternoon hours and raced east across northwestern Alabama during the late afternoon to early evening hours. This complex of strong to severe storms produced widespread wind damage and winds of 60 to 70 mph and isolated quarter inch hail. Especially hard hit was Colbert and Lauderdale counties. At least 4,000 people were without power in Florence. This complex weakened significantly as it moved towards and east of the I-65 corridor. However, another pocket of stronger wind damage was seen in the Berlin area of Cullman county as well.

Thunderstorm winds knocked a tree down on a house on 6th Street SW in Fort Payne. Time estimated by radar.				
Clusters of strong to severe thunderstorms entered north Alabama during the late morning and early afternoon hours, moving east-southeast through the area. One of the thunderstorms produced a lightning strike, fatally injuring a male in north Florence in Lauderdale County. Lightning also killed 19 cattle at a farm in Ruth in Marshall County. As the thunderstorms progressed, several reports of wind damage were received, mainly south of Tennessee River in Morgan, Cullman, Marshall and DeKalb Counties. Over 13,000 were left without power in north Alabama from the thunderstorms, including over 11,000 alone in Cullman County.

Storm Data and Unusual Weather Phenomena - August 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>Damage was consistent with a high-end EF-0 tornado with maximum winds of 85 mph. The tornado was on the ground for approximately 7 minutes and had a maximum width of 225 yards. Damage indicators were a mix of softwood and hardwood trees, uprooted or partially snapped along the path. The tornado formed on the northern shore of Wheeler Lake on Little Elk Road, downing softwood trees at this location. The tornado crossed Snake Road to the southeast, downing and uprooting additional softwood trees along Bay Hill and Bay Shore Drives. Several homes at this location sustained significant damage to docks as trees fell on them, with uprooted trees causing damage as well to retaining walls and sprinkler systems in this area. At this point, the tornado crossed the open waters along the north shore of Wheeler Lake before coming ashore again just before Davis Road. Several trees were uprooted along with very large, snapped branches here. One home sustained damage in this area as a tree fell on the back side of the structure. While the tree looked snapped, the health of the tree looked to be in question which likely led to its quick failure. The tornado then crossed an inlet and uprooted several more trees along Beechwood Road, before continuing to the Brigadoon neighborhood. Significant and more widespread tree damage was noted in this neighborhood as trees were uprooted, power poles knocked down, and large branches snapped. The tornado continued to follow the northern shore of Wheeler Lake but began weakening. Damage, much less widespread compared to areas further west, was observed along Beech Fork Lane and sporadic tree damage through Shaw Road. The tornado dissipated just east of Shaw Road.</p>

Storm Data and Unusual Weather Phenomena - August 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A complex of thunderstorms originating in the central Plains during the early morning hours, pushed east and southeast into the Tennessee Valley during the mid to late afternoon hours. The gust front associated with this line of thunderstorms resulted in trees being knocked down in several locations.

(AL-Z001) LAUDERDALE, (AL-Z002) COLBERT, (AL-Z003) FRANKLIN, (AL-Z004) LAWRENCE, (AL-Z005) LIMESTONE, (AL-Z006) MADISON, (AL-Z007) MORGAN, (AL-Z008) MARSHALL, (AL-Z009) JACKSON, (AL-Z010) DEKALB, (AL-Z016) CULLMAN	08/21/23 13:00 CST		0	Heat

A power pole was knocked down or leaning at 555 Allen Lane due to gust front winds. Time estimated by radar.

Isolated strong thunderstorms developed during the midday into the early afternoon hours in northeast Alabama producing gusty winds. Later in the afternoon and early evening, a complex of thunderstorms dropped south from middle Tennessee into north Alabama. A strong gust front surged south of the thunderstorms producing wind damage at a few locations in Colbert County in northwest Alabama.
