

Storm Data and Unusual Weather Phenomena - June 2024

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ALABAMA, Central

MONTGOMERY COUNTY --- 1.3 E (MXF)MAXWELL AFB MNT [32.38, -86.33], 3.5 SSE (MXF)MAXWELL AFB MNT [32.33, -86.34], 2.1 NNE BARACHAIS [32.33, -86.18], 0.3 WNW MITYLENE [32.38, -86.19]

06/04/24 16:30 CST	0	Flash Flood (due to Heavy Rain)
06/04/24 18:30 CST	0	Source: Broadcast Media

Social media images and videos relayed significant street flooding impeding traffic in Midtown Montgomery , including along Carter Hill Rd near Vaughn Rd, along Aimee Dr, and along Charleton Dr and Ballentine Dr.

Scattered showers and thunderstorms affected Central Alabama during the afternoon and evening of June 4. One slow-moving thunderstorm over the city of Montgomery dumped 2-3 inches of rain within two hours, resulting in significant street flooding along and south of Interstate 85.

SUMTER COUNTY --- 2.8 SSW CUBA [32.40, -88.41], 4.6 SSE EPES [32.64, -88.08]

06/05/24 17:03 CST	0	Thunderstorm Wind (EG 52 kt)
06/05/24 17:28 CST	0	Source: Fire Department/Rescue

Multiple trees were downed in Livingston and parts of southwestern Sumter County, including along Interstate 59/20. Several power outages were reported.

PERRY COUNTY --- 2.6 NNW SCOTT STATION [32.64, -87.44], 3.3 ENE FOLSOM [32.70, -87.35]

06/05/24 17:33 CST	0	Thunderstorm Wind (EG 50 kt)
06/05/24 17:43 CST	0	Source: 911 Call Center

Trees were downed blocking roadways along County Roads 24 and 29.

MARION COUNTY --- 2.4 W BEXAR [34.18, -88.19], 2.0 NW BEXAR [34.20, -88.17]

06/05/24 17:46 CST	0	Tornado (EF1, L: 1.60 mi , W: 300 yd)
06/05/24 17:48 CST	0	Source: NWS Storm Survey

The tornado first touched down in eastern Itawamba County, Mississippi off Pate Rd and traveled northeast across the state line into Marion County , Alabama. Snapped and uprooted trees were observed, consistent with an EF1 tornado. The tornado reached a width of 300 yards as it dissipated along County Highway 94 near Bexar. The total path length of the tornado was 3.38 miles. Special thanks to NWS Memphis for completing this survey.

MARENGO COUNTY --- 0.3 NNE LINDEN [32.30, -87.80]

06/05/24 17:48 CST	0	Thunderstorm Wind (EG 52 kt)
06/05/24 17:55 CST	0	Source: 911 Call Center

A few trees were downed in the Linden area.

FAYETTE COUNTY --- 5.6 NNE BLUFF [33.90, -87.88], 6.4 W GLEN ALLEN [33.92, -87.86]

06/05/24 17:52 CST	0	Tornado (EF0, L: 1.70 mi , W: 200 yd)
06/05/24 17:54 CST	0	Source: NWS Storm Survey

An EF1 tornado developed on the northern flank of an MCS, affecting far northern portions of Fayette County and southern portions of Marion County . The tornado initially touched down near Coffee Creek then moved northeast where it crossed Coffee Creek Road and uprooted a few large soft and hardwood trees in the front yard of a residence. The damage was sporadic as the tornado moved through Fayette County producing mostly timber damage as it crossed into Marion County. One home on Atkinson Road sustained minor damage to the vinyl siding . Damage in Fayette County was rated EF0. The total path length of the tornado was 7.23 miles.

MARION COUNTY --- 2.4 W WINFIELD [33.92, -87.86], 3.4 S PULLTIGHT [33.97, -87.79]

06/05/24 17:54 CST	0	Tornado (EF1, L: 5.53 mi , W: 325 yd)
06/05/24 18:01 CST	0	Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - June 2024

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
An EF1 tornado developed in Fayette County before moving into the Winfield area of Marion County. The tornado began to intensify as it approached US HWY 43 to the west of Winfield. Several trees were uprooted and snapped on Pike Road and Pleasant Drive, and a couple of the homes on these roads sustained minor shingle damage, although one tree did fall on a home. As the tornado crossed US HWY 43, it produced minor cosmetic damage to a few of the stores within the Foodland strip mall, and some of the glass doors were blown out. The highest degree of damage was first noted from Silverleaf Road to Rosewood Street where a large concentration of uprooted and snapped trees was observed. Fortunately, structural damage was quite limited in this area despite the amount of tree fall. Winds in this area were estimated up to 95 mph. The tornado continued northeast across State Highway 253 and County Highway 47 where the timber damage once again became more sporadic, consisting mostly of snapped branches and an occasional uprooted softwood. The tornado lifted in a wooded area shortly after crossing Riley Harp Road. The total path length of the tornado across both counties was 7.23 miles.				

JEFFERSON COUNTY --- 0.6 N CONCORD [33.48, -87.03], 0.9 NE MORRIS [33.76, -86.81]				
	06/05/24 17:57 CST		0	Thunderstorm Wind (EG 52 kt)

Several trees were downed south of Jasper in the vicinity of Highway 269.				
<hr/>				
CHEROKEE COUNTY --- 2.7 WNW RICHARDSON [34.22, -85.77], 0.9 NE LOOP [34.33, -85.61]	06/05/24 20:20 CST		0.50K	Thunderstorm Wind (EG 43 kt)
	06/05/24 20:35 CST		0	Source: Emergency Manager
Trees were downed, blocking Highway 68 and County Roads 75, 47, and 81.				
<p>An intensifying line of thunderstorms moved eastward from Mississippi into Alabama during the late afternoon hours of June 5. Numerous reports of wind damage were received west of Interstate 65 as the line and two leading cells progressed toward the northeast. Additionally, two EF-1 tornadoes were produced within the line, one that occurred along the MS/AL state line near Bexar in far western Marion County and another that moved out of Fayette County and struck parts of Winfield in southeast Marion County. The intensity of the thunderstorms quickly diminished as the line pushed east of I-65 by sunset.</p>				
<hr/>				
BLOUNT COUNTY --- 1.9 NNW NECTOR [33.97, -86.65]	06/09/24 18:21 CST		0.50K	Thunderstorm Wind (EG 43 kt)
	06/09/24 18:22 CST		0	Source: Emergency Manager
A couple trees were blown down along County Road 11 near Nectar.				
<hr/>				
BLOUNT COUNTY --- 0.8 SW ALLGOOD [33.91, -86.51]	06/09/24 18:41 CST		0	Hail (2.00 in)
	06/09/24 18:47 CST		0	Source: Emergency Manager
Several reports of 1.5 to 2-inch diameter hail were received via EMA and broadcast media in the Allgood and southern Oneonta areas.				
<hr/>				
ST. CLAIR COUNTY --- 0.7 N ST CLAIR [33.79, -86.43], 2.6 S WHITNEY [33.83, -86.31]	06/09/24 18:54 CST		0	Thunderstorm Wind (EG 50 kt)
	06/09/24 19:05 CST		0	Source: Emergency Manager
A large tree uprooted along Washington Valley Rd, blocking both lanes, and a tree fell onto a power line along Shore Dr.				
<p>A shortwave trough moving across the Mississippi Valley region sparked thunderstorm development along a pre-existing outflow boundary oriented from northern Mississippi into north central Alabama. During the early evening hours, one particular thunderstorm took advantage of 2500-3000 J/kg of CAPE and 30-40 kt bulk shear values, producing up to 2-inch diameter hail in the Allgood and Oneonta areas of Blount County. This cell also resulted in a few downed trees in Blount and St. Clair counties.</p>				
<hr/>				
TUSCALOOSA COUNTY --- 0.5 SSW RIVER VIEW [33.21, -87.55], 1.5 NNW RIVER VIEW [33.24, -87.56]	06/16/24 17:30 CST		1K	Thunderstorm Wind (EG 39 kt)
	06/16/24 17:36 CST		0	Source: Emergency Manager
An apartment building along Grace St near the University of Alabama campus sustained roof damage , and a large tree fell across 6th St near Lloyd Hall. A couple trees were uprooted at a residence along Northbrook Dr in Northport, one falling into and damaging a brick wall and the other crushing a wooden privacy fence.				
<p>Scattered showers and thunderstorms developed across mainly the southern and western portions of Central Alabama during the afternoon of June 16 associated with southeasterly flow around the southwestern periphery of an upper-level ridge. Low-level moisture advancing northward into western Alabama contributed to thunderstorm activity, with one downburst producing minor damage in Tuscaloosa.</p>

Trees were blown down along Weoka Road, Grier Road, and Balm Road.

Waves of showers and thunderstorms moved eastward across Central Alabama during the afternoon of June 26. A storm in Tuscaloosa produced a 68 mph wind gust at Tuscaloosa National Airport before causing sporadic tree damage across Jefferson and Blount counties.

ALABAMA, North

FRANKLIN COUNTY --- 1.5 SSE ATWOOD [34.35, -87.99], 1.8 NE BELGREEN [34.49, -87.85]

	06/05/24 18:06 CST		0	Tornado (EF1, L: 12.86 mi , W: 225 yd)
	06/05/24 18:25 CST		0	Source: NWS Storm Survey

A tornado began just south of Highway 172 just east of Sanders Road. The tornado crossed the highway and intensified, with wind speeds reaching about 90 mph. It crossed over an open field, uprooting and snapping trees. It continued northeast producing additional tree damage, before intensifying and widening to 225 yards, as it approached the southeastern portion of Bear Creek Reservoir. Numerous trees were uprooted or snapped, especially as it approached and crossed Overton Farm Road. Some of the tree trunks were snapped at their bases which were 2 to 2.5 feet in diameter and likely reached its maximum intensity and width. Maximum sustained wind speeds were estimated to be 110 mph. The tornado weakened as it approached and moved across Bear Creek as noted via drone imagery. The imagery suggested trees uprooted in a more sporadic nature. Additional tree damage was found as the tornado crossed Highway 16. At this location, less than 10% of the roof of two chicken houses was peeled off and trusses damaged. Just east of the chicken houses, the roof of a small shed structure was peeled back about 25%. The tornado continued its path northeast, moving across portions of Entrekin Road, causing sporadic trees to be uprooted and snapped. The tornado continued just west of Glasgow Corner, before crossing Highway 187, near Underground Lake Road. At this location, additional tree damage was found, with two portions of large trees snapped, one of which fell onto a house. The tornado continued northeast across Highway 24, and then an east-northeast path along Highway 524, uprooting and snapping multiple trees. One tree fell on a porch roof and damaged it. The tornado lifted just northeast of the Highway 524 and 41 intersection.

COLBERT COUNTY --- 2.2 ENE CHEROKEE [34.76, -87.94]

	06/05/24 18:29 CST		0.50K	Thunderstorm Wind (EG 43 kt)

Water over roadway at Paper Mill Rd near the Kimberly Clark plant. One vehicle stranded in flood water with driver on top of vehicle. Report relayed via Mobile Traffic on social media.

BALDWIN COUNTY --- 0.8 WNW FAIRHOPE [30.53, -87.91], 0.6 NNW FAIRHOPE [30.53, -87.90]

	06/01/24 02:17 CST		0	Tornado (EF1, L: 0.37 mi , W: 150 yd)
	06/01/24 02:19 CST		0	Source: NWS Storm Survey

The tornado started just north of the Fairhope Municipal Pier along Fairhope Park Road, where multiple oak and pine trees were snapped. The tornado moved to the east-northeast, paralleling Oak Ave and snapping large limbs from the tops of several trees. As it crossed N Summit St, a light pole was snapped, and large oak tree was snapped, falling on a home. The tornado appears to have lifted near the intersection of Oak Ave and N Church St. Outside of the narrow and concentrated path associated with the tornado, many large tree limbs were broken and this damage was determined to be from straight-line winds. Additionally, this tornado is believed to have started as a waterspout in Mobile Bay near the Fairhope Pier.

MOBILE COUNTY --- 0.7 N PRICHARD [30.74, -88.05], 0.4 WNW PRICHARD [30.73, -88.06], 0.3 ENE PRICHARD [30.73, -88.05], 0.5 NNE PRICHARD [30.74, -88.05]

	06/01/24 03:06 CST		0	Flash Flood (due to Heavy Rain)
	06/01/24 04:00 CST		0	Source: Public

Flooding at Government St and Scott St with a vehicle stranded in the flood waters. Flooding also reported on Broad St at St. Francis St. Report relayed via Mobile Traffic on social media.

Thunderstorms moved across the Gulf coast and produced heavy rain, gusty winds and a weak tornado.
