

April 4, 2011 Tornadoes

Three significant areas of damage occurred across western Kentucky on Monday. The following are preliminary summaries of these events from their damage surveys. An EF-2 tornado near Hopkinsville, KY received national media attention after striking a manufacturing plant and injuring about seven workers. A few other tornadoes occurred in western Kentucky, including one that injured a farm worker in Ballard County.

The following radar images are from the Fort Campbell, KY radar near Hopkinsville. Both images were taken around 11:55 A.M. CDT.
