Subject: New Online Maps for NOAA Weather Radio All Hazards (NWR)
Coverage and Tsunami Alerting Areas Along the Alaska, Washington, Oregon,
and California Coastlines

The National Weather Service (NWS) encourages the public and our partners
to utilize redundant information sources, including NWR, to receive NWS
alerts.

Tsunami alerts broadcast over NWR include Tsunami Watches, Advisories and
Warnings. NWS has generated maps of NWR coverage overlaid with existing
tsunami alerting areas that correspond with NWS public weather forecast
zones. These maps are available for the US Pacific coastlines of Alaska,
Washington state, Oregon, and California and are online at:

https://www.weather.gov/nwr/tsunami_alerting

We encourage local authorities and jurisdictions and residents of these
coastal communities to use these maps for emergency planning and
preparedness.

Similar maps are planned for the rest of the US states and territories in
the Pacific Ocean, the US East Coast and Gulf Coast states, and Caribbean
territories.

General information about the NWR program is online at:

<https://www.weather.gov/nwr>

General information on the information and services of the U.S.
Tsunami Warning System is online at:

<https://www.tsunami.gov/>
