

# Preface

These proceedings contain the contributed papers for the Fourth International Workshop on Narrative Extraction from Texts (Text2Story2021<sup>1</sup>) held in conjunction with the ECIR 2021 conference in Lucca, Italy, on the 1st of April 2021. Twenty papers were submitted for peer-review to this workshop. Out of these, 11 papers were accepted for this volume, 6 as regular papers, 1 demo paper, 1 nectar paper, 1 project description and 2 work in progress papers. Each submitted paper was reviewed by three members of an international programme committee. In addition to the selected papers, the workshop features three invited speakers: José Alves, Célia Rodrigues, and Leila Zia. José Alves and Célia Rodrigues gave a talk entitled “Storytelling through infographics”. Leila Zia had a conversation with Alípio Jorge about how Wikimedia understands the Text2Narrative process.

We would like to thank ECIR for hosting us, our keynote speakers, the programme committee, the paper authors, and the participants, who have made this workshop possible. Editors Ricardo Campos and Alípio Jorge were financed by the ERDF – European Regional Development Fund through the North Portugal Regional Operational Programme (NORTE 2020), under the PORTUGAL 2020 and by National Funds through the Portuguese funding agency, FCT - Fundação para a Ciência e a Tecnologia within project PTDC/CCI-COM/31857/2017 (NORTE-01-0145-FEDER-03185).
