

STUDY BACKGROUND AND OBJECTIVES

Maitland Conservation Mandate: "To prevent the loss of life and property due to flooding and erosion"

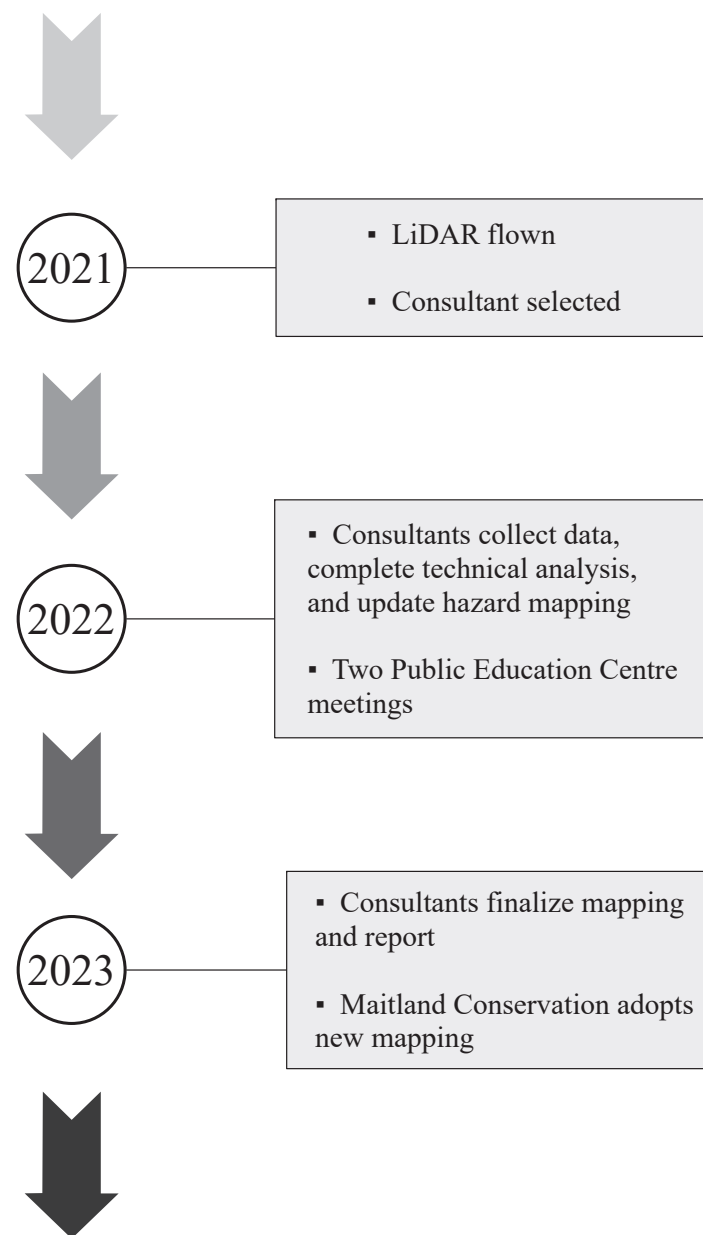

Objectives and Outcomes

- Update shoreline hazard mapping to consider climate change
- Enhanced knowledge of current risks to human safety and structures

3D perspective of existing erosion hazard (to be updated as part of on-going study)

Project Timeline

Study Benefits

- New information on projected climate change impacts
- Mapping helps locate new development away from hazards
- Study outputs identify structures exposed to coastal hazards
