

Accommodate:

The accommodate strategy leverages adaptive approaches to reduce coastal risk and permit continued occupation of communities on hazardous lands. Examples include floodproofing existing buildings, raising building foundations and road elevations, upgrading stormwater management systems, upgrading emergency plans and emergency vehicles.

Floodproof Existing Buildings

Raise building foundation to reduce flood risk.

Install window coverings to prevent flood water entry into basement.

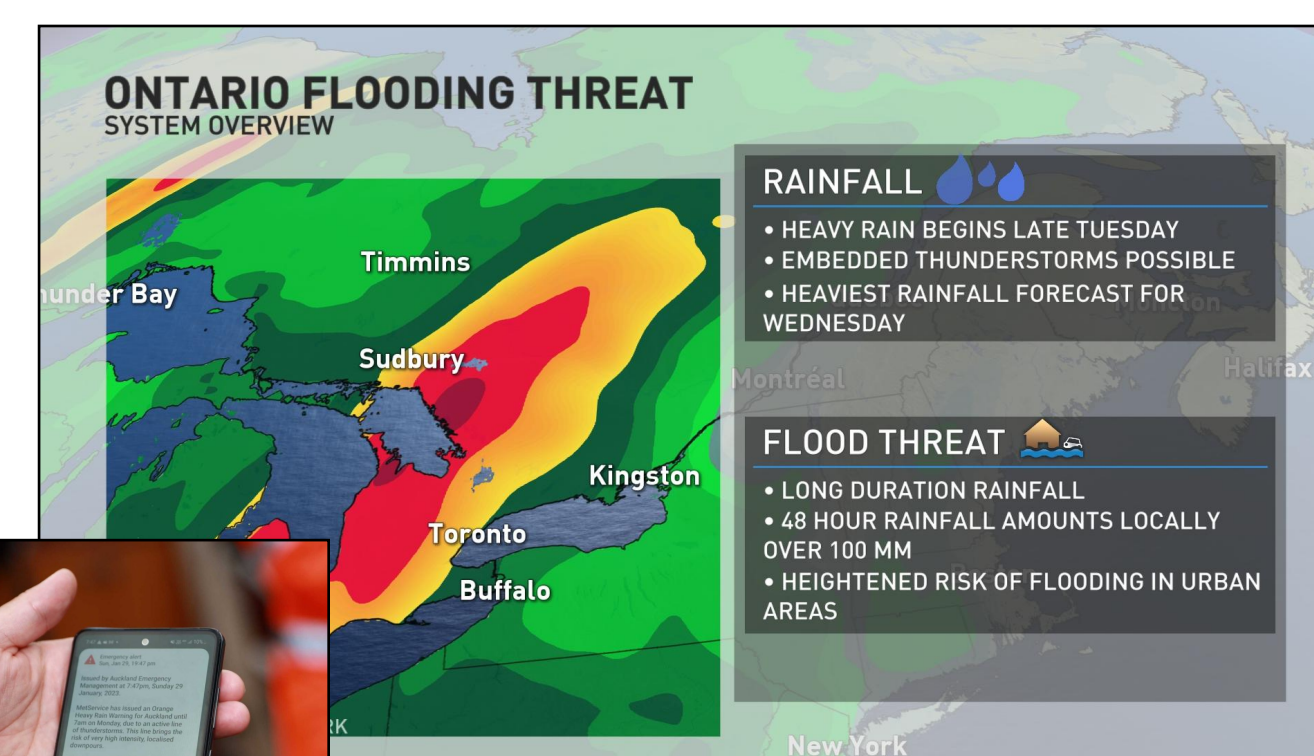

Install backflow valves to prevent sewer backup.

Emergency Preparedness

Upgrade emergency vehicles to improve access to flooded streets

Weather alerts and timely information to help people prepare for threatening conditions.
